In The History of Archaic Rome, Dionysius purposely viewed Roman history as an embodiment of all that was best in Greek culture. Gabba places Dionysius's remarkable thesis in its cultural context, comparing this author with other ancient historians and evaluating Dionysius's treatment of his sources. In truth, the last decades B.C. made the historian's task an enormous challenge. On the one hand, the ancient writers knew Rome to be the greatest empire the world had seen, seemingly impregnable in military power and still capable of expansion. On the other hand, they were acutely aware that it recently had barely survived half a century of civil strife. Gabba recalls to us how little was confidently known of Rome's actual origins in an illuminating examination of Dionysius's methodology as a historian.

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

"History of the Empire From the Death of Marcus" by Herodian. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten - or yet undiscovered gems - of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

After the death of his wife, antiquarian Sir Richard Colt Hoare (1758-1838) left his only child in England and embarked on a series of journeys through continental Europe in pursuit of 'novelty, pleasure and information' in order to assuage his grief. At the end of the 1780s he deliberately diverged from the more conventional tourist trail in favour of a route through the then less-documented areas of Italy and down into Sicily, using classical authors as his guides. This work, first published in 1819, draws heavily on his daily journal entries to elucidate areas and points of interest that he felt had been overlooked in previous guides to Italy. Quotations from Horace, Tacitus and Pliny pertaining to ancient sites and practices are frequently included in Hoare's narrative, and he meticulously recreates the journey from Rome to Brundisium described by Horace in his Satires.

More than a decluttering guide, this book " speaks to the heart and soul of the minimalist lifestyle . . . a must-have manual for serenity in the modern world! " (Anne Sage, author of Sage Living). For anyone looking to declutter, organize, and simplify, author Erin Boyle shares practical guidance and personal insights on small-space living and conscious consumption. At once pragmatic and philosophical, Simple Matters is an essential manual for anyone who wants to bring more purpose and sustainability to their daily lives. Boyle demonstrates how the benefits of " living small " are accessible to us all—whether we ’ re renting a tiny apartment or purchasing a three-story house. Filled with personal essays, projects, and helpful advice on how to be inventive and resourceful in a tight space, Simple Matters shows that living simply is about making do with less and ending up with more: more free time, more time with loved ones, more savings, and more things of beauty.

A Voyage to South America

The Art of Tidying Up

Motherhood in the Age of Anxiety

T he present work, the result of some forty years of investigative research, is a logical progression from my previous books: the expose of the international control of monetary issue and banking practices in the United States; a later work revealing the secret network of organizations through which these alien forces wield political power through which their hidden plans are implemented; and now; to the most vital issue of all, the manner in which these deprecations affect the daily lives and health of American citizens. Despite the great power of the hidden rulers, I found that only one group has the power to issue life or death sentences to any American-our nation's physicians. The great power, were themselves subjected to very strict controls over every aspect of their professional lives. These controls, surprisingly enough, were not wielded by any state or federal agency, although almost every other aspect of American life is now under the absolute control of the bureaucracy. The physicians have their own autocracy, the American Medical Association. This group, which is headquartered in Chicago, Illinois, had gradually built up its power until it assumed total control over medical schools and the accreditation of physicians. The trail of these manipulators led me straight to the same lairs of the international conspirators whom I had exposed in previous books. I knew that the trail led to a dangerously low level, and imposed bureaucratic controls on every American. I now discovered that their conspiracies also directly affected the health of every American. This conspiracy has resulted in a documented decline in the health of our citizens. We now rank far down the list of civilized nations in infant mortality and other signs of health. The shocking record of these cold-blooded tycoons who not only plan and carry out famines, economic depressions, revolutions and wars, but who also find their greatest profits in their manipulations of our medical care. The cynicism and malice of these conspirators is something beyond the imagination of most Americans. They deliberately manipulate the public through "charitable" organizations and then use these same organizations as key groups to bolster their Medical Monopoly. Fear and intimidation are the basic techniques by which the conspirators maintain their control over all aspects of our health care, as they ruthlessly crush any competitor who challenges their profits. As in other aspects of our lives, their most constantly used weapon against us is their employment of federal agents and federal agencies to carry out their intrigues. The proof of this operation may be the most disturbing revelation of my work.

Il termine "wa" si può tradurre con “armonia”, tuttavia porta con sé una molteplicità di significati la cui comprensione permette di cogliere ogni aspetto della cultura tradizionale giapponese, caratterizzata da un particolare senso della bellezza, della pazienza e della serenità. L'essenza di wa è percepibile ovunque in Giappone e si manifesta in natura, nell'architettura, nella gestione degli spazi domestici e pubblici. In questa sola parola si può percepire lo spirito del Giappone, che è stato fortemente influenzato dai principi della filosofia buddhista in ogni aspetto nella vita quotidiana. Emi Onishi ci spiega come entrare profondamente in contatto con i valori della tradizione giapponese più autentica, introdurre nella propria vita esercizi di semplice applicazione e arricchendo così la nostra vita quotidiana di pace, bellezza, armonia e benessere. Conoscere l'haiku Creare lo spazio nagomi in casa Imparare la meditazione metta Scoprire l'armonia del minimalismo Parlare usando parole di pace e di armonia Il tempio giapponese, un luogo dove ritrovare se stessi nella natura Imparare a vivere in armonia

The Art of Tidying Up tackles the contemporary issue of de-cluttering your life. This includes not just the physical aspects of de-cluttering a home or a room, but also the emotional clutter that many experience. This book teaches hoarders how to recognize, understand and conquer the emotions and compulsions that lead to clutter. Kim Preston has implemented every day to clear away clutter and keep it away. More than just “the physical stuff”, The Art of Tidying Up blends compassion and critique to create a detailed plan to achieve a minimalist mindset, both physically and emotionally.

In Mortal Combat

The manual consists of the story of Dr. Hayashi including unpublished photos and main exercises of the Hayashi Reiki system.

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In Mortal Combat is comprehensive in it discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the “forgotten war” is a must-read for any history aficionado.

When Brady Wayne Darby, a condemned man whose life is marked by death, guilt, and despair, meets Thomas Carey, a weary man of God, he learns about the prospects of rebirth, forgiveness, and hope.

The Revelation of the End Times!

In the writings of Philostratus (ca. 170-ca. 250 CE), the renaissance of Greek literature in the second century CE reached its height. His Life of Apollonius of Tyana, Lives of the Sophists, and Imagines reconceive in different ways Greek religion, philosophy, and art in and for the world of the Roman Empire. In this volume, Heroicus and Gymnasticus, two works of equal creativity and sophistication, together with two brief Discourses (Dialexeis), complete the Loeb edition of his writings. Heroicus is a conversation in a vineyard amid ruins of the Protesilaus shrine (opposite Troy on the Hellespont), between a wise and devout vinedresser and an initially skeptical Phoenician sailor, about the beauty, continuing powers, and worship of the Homeric heroes. With information from his local hero, the vinedresser reveals unknown stories of the Trojan campaign especially featuring Protesilaus and Palamedes, and describes complex, miraculous, and violent rituals in the cults of Achilles. Gymnasticus is the sole surviving ancient treatise on sports. It reshapes conventional ideas about the athletic body and expertise of the athletic trainer and also explores the history of the Olympic Games and other major Greek athletic festivals, portraying them as distinctive venues for the display of knowledge.

This last book in the six-volume series from NEXTmanga combines cutting-edge illustration with fast-paced storytelling to deliver biblical truth to an ever-changing, postmodern culture. More than 10 million books in over 40 different languages have been distributed worldwide in the series.

The book that inspired Marie Kondo's The Life Changing Magic of Tidying Up, Nagisa Tatsumi's international bestseller offers a practical plan to figure out what to keep and what to discard so you can get--and stay--tidy, once and for all. Practical and inspiring, The Art of Discarding (the book that originally inspired a young Marie Kondo to start cleaning up her closets) offers hands-on advice and easy-to-follow guidelines to help readers learn how to finally let go of stuff that is holding them back -- as well as sage advice on acquiring less in the first place. Author Nagisa Tatsumi urges us to reflect on our attitude to possessing things and to have the courage and conviction to get rid of all the stuff we really don't need, offering advice on how to tackle the things that pile up at home and take back control. By learning the art of discarding you will gain space, free yourself from "accumulation syndrome," and find new joy and purpose in your clutter-free life.

Mathematics Education as a Research Domain: A Search for Identity

Minerals and Electrolytes

ALAN J. BISHOP Monash University, Clayton, Victoria, Australia
RATIONALE Mathematics Education is becoming a well-documented field with many books, journals and international conferences focusing on a variety of aspects relating to theory, research and practice. That documentation also reflects the fact that the field has expanded enormously in the last twenty years. At the 8th International Congress on Mathematics Education (ICME) in Seville, Spain, for example, there were 26 specialist Working Groups and 26 special ist Topic Groups, as well as a host of other group activities. In 1950 the 'Commission Internationale pour l'Etude et l'Amelioration de l'Enseignement des Mathematiques' (CIEAEM) was formed and twenty years ago another active group, the 'International Group for the Psychology of Mathematics Education' (PME), began at the third ICME at Karlsruhe in 1976. Since then several other specialist groups have been formed, and are also active through regular conferences and publications, as documented in Edward Jacobsen's Chapter 34 in this volume.

Over 100 new historical documents from the rulers of ancient Sumer, Babylonia, and Assyria. Includes new text and edition of the Ur-Namma law code. Book adds tremendous amount of new material to our reconstruction of the history of ancient Mesopotamia.

This book addresses the relationships of mineral and electrolyte needs and interactions to sports and exercise. There are chapters written by experts with long histories of research in this area. Chapters include descriptions of specific research projects, as well as literature reviews. Convincing evidence that exercise and sport activities do affect the mineral status of individuals is examined.

Gill's tarot pack is based on the structure of "The Tree of Life". Much of the imagery in "The Gill Tarot Deck" draws from passages in classical religious literature. "The Gill Tarot" by Elizabeth Josephine Gill presents 78 stunning full-color pictures which enable the reader to see his or her own reflection of life.

Bring Order and Purpose to Every Room in Your Home Getting organized can feel like an impossible task. But it doesn't have to be complicated. The things you actually use need a designated home. The rest of the stuff is clutter and needs to be removed. Once you've determined which is which, order can easily be maintained. Let bestselling author Melissa Michaels help you get organized with this simple, step-by-step guide. Make the most of your space and create a home that works for your family. Reduce stress by decluttering and keeping only the things you regularly use. Featuring more than 300 easy organization tips that address every room, discover how simple and stress-free it can be to restore and maintain order in the space you call home.

This book provides a comparative account of the process of urban regeneration and examines the factors influencing these processes, as well as the consequences of their implementation. Through a mixture of theoretical discussion and a series of case studies a thorough examination is made of the extent to which these different European old industrial conurbations are facing similar problems. Photovoltaics

Simple Matters

The Hardmen: Legends and Lessons from the Cycling Gods

Photovoltaics (PV) is the field of technology and research related to the application of solar cells for energy by converting sun energy directly into electricity. Due to the growing demand for clean sources of energy, the manufacture of solar cells and photovoltaic arrays has expanded dramatically in recent years. Photovoltaic production has been doubling every two years, increasing by an average of 48 percent each year since 2002, making it the world's fastest-growing energy technology. They are best known as a method for generating electric power by using solar cells packaged in photovoltaic modules, often electrically connected in multiples as solar photovoltaic arrays, to convert energy from the sun into electricity. This book gathers the latest research from around the globe in this dynamic field.

The editor-in-chief of the late cult magazine domino presents a follow-up to the best-selling domino: the book of decorating that describes 80 items that are what the author identifies as all one needs to live comfortably, practically and stylishly, from essential furnishings to aesthetic accents.

All histories of Hollywood are wrong. Why? Two words: Colonel Selig. This early pioneer laid the foundation for the movie industry that we know today. Active from 1896 to 1938, William N. Selig was responsible for an amazing series of firsts, including the first two-reel narrative film and the first two-hour narrative feature made in America; the first American movie serial with cliffhanger endings; the first westerns filmed in the West with real cowboys and Indians; the creation of the jungle-adventure genre; the first horror film in America; the first successful American newsreel (made in partnership with William Randolph Hearst); and the first permanent film studio in Los Angeles. Selig was also among the first to cultivate extensive international exhibition of American films, which created a worldwide audience and contributed to American domination of the medium. In this book, Andrew Erish delves into the virtually untouched Selig archive at the Academy of Motion Picture Arts and Sciences Library to tell the fascinating story of this unjustly forgotten film pioneer. He traces Selig's career from his early work as a traveling magician in the Midwest, to his founding of the first movie studio in Los Angeles in 1909, to his landmark series of innovations that still influence the film industry. As Erish recounts the many accomplishments of the man who first recognized that Southern California is the perfect place for moviemaking, he convincingly demonstrates that while others have been credited with inventing Hollywood, Colonel Selig is actually the one who most deserves that honor.

A guide to coping with the medical, self-care, and emotional issues of spinal bifida, with an emphasis on becoming as independent as possible.

Book 2 of The Survivalist Series No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, Going Home, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to Going Home, Morgan knows that their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange new world--and they're starting to get restless. With the help of his closest companions, Morgan fights to keeps his home secure--only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's One Second After, and The End by G. Michael Hopf will revel in A. American's apocalyptic tale.

This volume derives from a series of lectures delivered as the 'general course' at the Hague Academy of International law in July 1989. Like those lectures, this volume does not pretend to provide a complete treatise covering all international law. Rather, it offers a particular perspective on the principal subjects of traditional international law, elaborates new developments, and dares reexamine assumptions and premises. The book is built on three themes. The first addresses law as politics, and international law as the law of a political system, now comprised of more than 180 separate, independent states. The essential autonomy of states accounts for the political (as well as economic and cultural) heterogeneity in a pluralist and fragmented system, and international law as its common denominator of normative expression. A second theme explores change in international law as reflecting change in the values and purposes of the international political system. It traces the pursuit through law of the traditional ideal of the state system to secure every state's right to realize its own agenda through its own institutions, and the superimposed contemporary purpose to promote individual human rights and welfare in every society. The third theme perceives a movement in the law from 'conceptualism' to 'functionalism', from logical deduction out of abstract principles to pragmatic attention to practical needs and solutions to new and old human problems. Each of these themes dominates in several chapters but the other themes are not absent from any of them. Each will add a fresh perspective and contribute to understanding the nature and operation of international law in the international political system at the turn of a new century.

The Art of Discarding

The present book is the result of the reflection of many individuals in mathematics education on questions such as: Is mathematics education a science? Is it a discipline? In what sense? The reader will find a range of possible answers to these questions, a variety of analyses of the actual directions of research in different countries, and a number of visions for the future of research in mathematics education.

This is a book of the key text of the Kabbalah, a work known as the Zohar ("Splendour"). The Zohar is a commentary on the Torah and although it is sometimes ascribed to a second-century rabbi, Simon Bar-Yochai, the form in which it is most widely known originates with Moses of Leon, a native of Granada, who died in 1305.The kabbalists believe that the undefinable origin of all things is Ein Sof - the cause of causes, the infinite, that which underlies everything. The universe emanates from the divine in successive layers called esefiroti. Everything exists in God, but God extends infinitely beyond existence. All we know and are is linked together, pervaded and maintained by the divine. According to this work, the light of God must be concealed in order to be revealed to creation. Even though the kabbalists believe that ultimately Ein Sof is beyond expression or understanding, the contemplation of God's presence in all things causes our thoughts to be purified.

A lively and provocative look at the modern culture of motherhood and at the social, economic, and political forces that shaped current ideas about parenting What is wrong with this picture? That's the question Judith Warner asks in this national bestseller after taking a good, hard look at the world of modern parenting--at anxious women at work and at home and in bed with unhappy husbands.

When Warner had her first child, she was living in Paris, where parents routinely left their children home, with state-subsidized nannies, to join friends in the evening for dinner or to go on dates with their husbands. When she returned to the States, she was stunned by the cultural differences she found toward how people think about effective parenting--in particular, assumptions about motherhood. None of the mothers she met seemed happy; instead, they worried about the possibility of not having the perfect child, panicking as each developmental benchmark approached. Combining close readings of mainstream magazines, TV shows, and pop culture with a thorough command of dominant ideas in recent psychological, social, and economic theory, Perfect Madness addresses our cultural assumptions, and examines the forces that have shaped them. Working in the tradition of classics like Betty Friedan's The Feminine Mystique and Christopher Lasch's The Culture of Narcissism, and with an awareness of a readership that turned recent hits like The Bitch in the House and Allison Pearson's I Don't Know How She Does It into bestsellers, Warner offers a context in which to understand parenting culture and the way we live, as well as ways of imagining alternatives--actual concrete changes--that might better our lives.
