"A Vintage Books original"--Copyright page.

Informed by a wealth of information that has come to light in recent years, this engaging biography tells the complete story of the life and musical work of Finnish composer Jean Sibelius (1865-1957). Drawing on Sibelius's own correspondence and diaries, contemporary reviews, and the remarks of family and friends, the book presents a rich account of the events of the musician's life. In addition, this volume is the first to set every work and performable fragment by Sibelius in its historical and musical context. Filling a significant gap, the biography also provides the first accurate information about much of the composer's early music. Writing for the general music-lover, Andrew Barnett combines his own extensive knowledge of Sibelius's music with the insights of other scholars and musicians. He lays to rest a number of myths and untruths—that Sibelius wrote no chamber music of value, for example, and that he stopped composing in 1926 and didn't need to compose to earn a living. Barnett completes the volume with the most thorough worklist available and an authoritative chronology of Sibelius's entire output.

*Campfire Stories is a collection of short stories as told by a group of friends while they sit around a campfire. These friends, The Chosen Family, have turned story time into a game. They must decide if each story is true, fiction, or embellished. Can a killer get right with his God before going to prison? Can true love survive a pandemic lock-down? Will a book found in the floor boards reveal a traumatic past? Will a family's dog lead a detective to a town's secret? Can a missing camper, a broken leg, or a pretty redhead bring an end to life-long friendships? Throughout the camping trip and story hours, there is something stalking them in the woods just outside of camp. At first the campers brush it off as other campers "fooling around." But one of them believes it is something far more dangerous and unbelievable. By day the campers and their families play in the water, eat, drink, and relax. Each night, however, is creepier than the one before. By the end of the weekend, they cannot wait to get out of those woods and never go back.*

*Although Emanuel Swedenborg (1688-1772) is commonly known for his spiritual philosophy, his early career was focused unnatural science. During this period, Swedenborg thought of the world as like a gigantic machine, following the laws of mechanics and geometry. This volume analyzes this mechanistic worldview from the cognitive perspective, by means of a study of the metaphors in Swedenborg's texts. The author argues that these conceptual metaphors are vital skills of the creative mind and scientific thinking, used to create visual analogies and abstract ideas. This means that Swedenborg's mechanistic and geometrical worldview, allowed him to perceive the world as mechanical and geometrical. Swedenborg thought "with" books and pens. The reading gave him associations and clues, forced him to interpret, and gave him material for his intellectual development.*

**Everybody knows, and maybe even loves, a microgenre. Plague romances and mommy memoirs. Nudie-cutie movies, Nazi zombies, and dinosaur erotica. Baby burlesks, Minecraft fiction, grindcore, premature ejaculation poetry...microgenres come in all varieties and turn up in every form of media under the sun, tailor-made for enthusiasts of all walks of life. Coming into use in the last decade or so, the term "microgenre" classifies increasingly niche-marketed worlds in**

popular music, fiction, television, and the Internet. Netflix has recently highlighted our fascination with the ultra-niche genre with hilariously specific classifications -- "independent supernatural dramedy featuring a strong female lead" - that can sometimes hit a little too close to home. Each contribution in this collection introduces readers to a different microgenre, drawn from a range of historical periods and from a variety of media. The Microgenre presents a previously untreated point of cultural curiosity, revealing the profound truth that humanity's desire to classify is often only matched by the unsustainability of the obscure and hyper-specific. It also affirms, in colorful detail, what most people suspect but have trouble fathoming in an increasingly homogenized and commercial West: that imaginative projects are just that, imaginative, diverse, and sometimes completely and hilariously inexplicable.

From the New York Times bestselling author of *Bad Feminist*: a searingly honest memoir of food, weight, self-image, and learning how to feed your hunger while taking care of yourself. "I ate and ate and ate in the hopes that if I made myself big, my body would be safe. I buried the girl I was because she ran into all kinds of trouble. I tried to erase every memory of her, but she is still there, somewhere. . . . I was trapped in my body, one that I barely recognized or understood, but at least I was safe." In her phenomenally popular essays and long-running Tumblr blog, Roxane Gay has written with intimacy and sensitivity about food and body, using her own emotional and psychological struggles as a means of exploring our shared anxieties over pleasure, consumption, appearance, and health. As a woman who describes her own body as "wildly undisciplined," Roxane understands the tension between desire and denial, between self-comfort and self-care. In *Hunger*, she explores her past—including the devastating act of violence that acted as a turning point in her young life—and brings readers along on her journey to understand and ultimately save herself. With the bracing candor, vulnerability, and power that have made her one of the most admired writers of her generation, Roxane explores what it means to learn to take care of yourself: how to feed your hungers for delicious and satisfying food, a smaller and safer body, and a body that can love and be loved—in a time when the bigger you are, the smaller your world becomes.

In Poland in the 1940s and '50s, a new kind of Catholicism intended to remake European social and political life—not with guns, but French philosophy. This collective intellectual biography examines generations of deeply religious thinkers whose faith drove them into public life, including Karol Wojtyła, future Pope John Paul II, and Tadeusz Mazowiecki, the future prime minister who would dismantle Poland's Communist regime. Seeking to change the way we understand the Catholic Church, World War II, the Cold War, and communism, this study centers on the idea of "revolution." It examines two crucial countries, France and Poland, while challenging conventional wisdom among historians and introducing innovations in periodization, geography, and methodology. Why has much of Eastern Europe gone back down the road of exclusionary nationalism and religious prejudice since the end of the Cold War? Piotr H. Kosicki helps to understand the crises of contemporary Europe by examining the intellectual world of Roman Catholicism in Poland and France between the Church's declaration of war on socialism in 1891 and the demise of Stalinism in 1956.

**"This book is a photo documentary of one of Africa's most recent brutal civil wars which has been quickly forgotten. The photos are exclusive and real life storytellers. This book features photos of genocides, unimaginable human suffering, neglect of development by former factional warlords who exploited the country's mineral resources, such as gold and diamond, and of course the most barbaric style of how unarmed civilians, mainly women and children are murdered in cold blood in corners of the world hardly visited by CNN and other cable news networks ... This documentary is a witness to man's viciousness against his kind when power-hungry Liberians killed their compatriots for sport. It is hoped the world will not forget the Liberians killed, as recorded in these 120 pages." Renowned Holocaust scholar Raul Hilberg considered the German railway system that delivered European Jews to ghettos and death camps in Eastern Europe to be not only an essential component of the "machinery of destruction" but also emblematic of the amoral bureaucracy that helped to implement the Jewish genocide. German Railroads, Jewish Souls centers around Hilberg's seminal essay of the same name, a landmark study of German railways in the Nazi era long unavailable in English. Supplemented with additional writings from Hilberg, primary source materials, and historical commentary from leading scholars Christopher Browning and Peter Hayes, this is a rich and accessible introduction to a topic in Holocaust history that remains understudied even today.**

*What if Dwarfs, Elves and Magicians were not a fantasy, but one possible outcome of earth's future. That is what the four story's heroes are about to find out. A Marine, a college Student, a Horticulturalist, and a Thief are seized by a wizard using the magical Sable Stones to aide in the destruction of a seemingly unstoppable evil. To help ensure victory they are put through extensive fighter, mage, druid, and thief training and given one month to recover four legendary items to aide them in their final quest. The heroes then descend into the evil dungeon fortress to face, and hopefully defeat the horrors inside. In a time of neither here nor there Rebekah and her brothers travel to town to purchase supplies for their family's inn. They are each also given a single coin to spend as they wish. Rebekah inadvertently buys a book; a diary, and innocently unleashes havoc on all she has ever known and loved. The evil, power-hungry Ara-Quan has come through the mysterious Great Forest into Rebekah's world and will stop at nothing to get the diary. In a race against time, Rebekah must decipher the diary, learn how to survive and save the world she once knew. Can the strange wolf and the elfin creature Aechibus be trusted? Ultimately, she must cross paths with Ara-Quan, but will she survive?*

*In retrospect, historical change often appears to be both logical and inevitable. Yet, as a process, as a series of moments, it is by nature open-ended. The protagonists are unaware of the potential consequences of their choices, as well as the meaning of their actions in the greater scheme of things. An individual, in real time and in the middle of events, has little scope for understanding the whole. The dynamic of a regime change involves a journey away from a particular past towards a chosen future, while the practices of the old regime are called into question. The competing visions for a better future often include a reactionary option, looking back towards an older period, perceived as a golden age waiting to be restored. In the aftermath of a regime change the new cadres, seeking to consolidate their power, form the new conservative bloc of the society. When revolutionary forces again begin to gather, the regime disintegrates, and the cycle begins again. So far, regime changes have been analysed as unique, one-off events. This book traces what such processes, regardless of their ideological colour, have in common. How does political power change hands? What are the mental and material tools of change? From the last stages of World War I to the present Crimean crisis, the case studies in this book offer timeless insights for understanding ideological and military conflicts, including the undercurrents of the present Russo-Western relations.*

A valued adviser and trusted insider in the highest echelon of U.S. military and political leaders, General Walter Bedell Smith began his public service career of more than forty years at age sixteen, when he joined the Indiana National Guard. His bulldog tenacity earned him an opportunity to work with General George C. Marshall in 1941, playing an essential role in forming the offices of the Combined and Joint Chiefs of Staff; and after his appointment as chief of staff to Dwight D. Eisenhower in 1942, Smith took a central part in planning and orchestrating the major Allied operations of World War II in Europe. Among his many duties, Smith negotiated and signed the surrenders of the Italian and German armed forces on May 7, 1945. Smith's postwar career included service as the U.S. ambassador to the Soviet Union, director of the Central Intelligence Agency, and undersecretary of state. Despite his contributions to twentieth-century American military and diplomatic history, the life and work of Smith have largely gone unappreciated. In *Beetle: The Life of General Walter Bedell Smith*, D. K. R. Crosswell offers the first full-length biography of the general, including insights into his close relationships with Marshall and Eisenhower. Meticulously researched and long overdue, *Beetle* sheds new light on Eisenhower as supreme commander and the campaigns in North Africa, Italy, and Europe. *Beetle* is the fascinating history of a soldier, diplomat, and intelligence chief who played a central role in many decisions that altered mid-twentieth-century American history. This stirring collection of diaries written by young people, aged twelve to twenty-two years, during the Holocaust is given new life in this enhanced e-book. This updated edition includes a new preface by Alexandra Zapruder examining the book's history and impact. Additionally, an in-depth, interdisciplinary curriculum in history, literature, and writing developed by the author and a team of teachers, working in cooperation with the educational organization Facing History and Ourselves, is now available to support use of the book in middle- and high-school classrooms.

The seventh and final volume of the author's "remarkable" diary is filled with the reflections of an older woman as she journeys through the world (Los Angeles Times). "One of the most remarkable diaries in the history of letters" ends as the author writes not with her last two years of pain but at a joyous moment on a trip to Bali (Los Angeles Times). As she ages, Anaïs Nin reflects how the deeply personal and introspective nature of her writings intertwines with her public life and her connections with other people, including her devoted readers. "One of the most extraordinary and unconventional writers of [the twentieth] century."

New York Times Book Review Edited and with a preface by Gunther Stuhlmann

A veteran of both world wars and the Korean War, Gen. Gerald C. Thomas helped change the Marine Corps in the twentieth century. Though not as well-known as John Lejeune, Chesty Puller, and A. A. Vandegrift, he was, as this book clearly demonstrates, responsible for the transformation of the Marines into a highly effective amphibious assault force and Cold War force in readiness. In this volume, the well-known military historian Allan R. Millett provides not only an assessment of General Thomas's career but an objective analysis of the creation of the modern Marine Corps. At the same time, he offers an expert interpretation of the "inside" leadership of the Corps. Millett has based the book on documentary research in private and official papers, including the general's own oral memoir and draft autobiography.

A History

Ante Pavelic was the leader of the fascist party of Croatia (the Ustaše), who, on Adolf Hitler's instruction, became the leader of Croatia after the Nazi invasion of 1941. Pavelic was an extreme Croatian nationalist who believed that the Serbian people were an inferior race - he would preside over a genocide that ultimately killed an estimated 390,000 Serbs during World War II. Croatia under Ante Pavelic provides the full history of this period, with a special focus on the United States' role in the post-war settlement. Drawing on previously unpublished documents, Robert McCormick argues that President Harry S. Truman's Cold War priorities meant that Pavelic was never made to answer for his crimes. Today, the Ustaše remains difficult legacy within Croatian society, partly as a result of Pavelic's political life in exile in South America. This is a new account of US foreign policy towards one of the Second World War's most brutal dictators and is an essential contribution to Croatian war-time history.
