_____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

Drop shipping is a retail fulfillment model that allows you to purchase products individually from a wholesaler and ship them directly to your customer. Instead of purchasing a large number of products, you simply go into partnership with a drop shipping supplier and list their merchandise for sale. Then, once you get a buyer/receive an order, you forward it to the supplier for fulfillment. The supplier will ship the product directly from their warehouse to your customer, and charge you only for the price of the shipped item (product). The drop shipping model has some number of advantages. Apart from being easy to start with low capital and low risks, locational flexibility coupled with wide range of product selection are also some of the reasons why drop shipping is a great business. However, one must be cautious of some factors to ensure a successful drop shipping

business. Dealing with many customer and supplier errors which may affect delivery should be properly tackled. This book contains detailed information that can help you successfully run an e-commerce business. It will also teach you all you need to know about the drop shipping model, which will also help you run a successful e-commerce business. So take your time to read all the information in this book and try to use it as a guideline, most especially when you are new in the e-commerce world.

Just getting started with product research and sourcing? Stuck trying to find ideas or find that "perfect" winning product? Want to find good selling products that others are ignoring? Interested in wholesale or private label products? If you answered yes, then this book is for you. If you are an experienced seller or are looking to do arbitrage this book will have less value as I don't discuss sourcing by arbitrage. I don't do arbitrage, so I don't teach it. This book is written for the new or struggling seller wanting to source wholesale or private label products. What you will learn: Basic steps for finding top selling products How to generate product ideas and look for trends How to validate demand Tips for finding suppliers Analyzing data to help you pick a product It took me 5 months of research before I pulled the trigger on my first products to sell on Amazon. Five months and countless hours. I have pages of notes with product ideas in many different categories. Some were wholesale products, others were ideas for my own products. I had some money set aside to buy inventory. But I couldn't commit. I was looking for...not necessarily thee perfect product, but, well yeah, the perfect product. Fear of choosing "wrong" was holding me back. I knew that product selection was key to success so I needed to choose right. Another part of the problem was I had bigger ideas-I wanted to create a

brand and I had some ideas as to what sorts of products I would carry. But those ideas required more capital than I was willing to invest for my first product. As a result, I put so much pressure on myself to dream big and think towards the future that I did...nothing! Another hold up was I was a little skittish to follow the advice to source from Chinese suppliers. It seemed so complicated for a beginner. Could I not take a little less profit and source domestically? Were there not manufacturers that could produce my ideas in North America? Yes, and yes. Ultimately the delays helped me because I learned a lot by joining Facebook groups and listening to and learning from the experiences of others. I devoured the advice in forums as well as blogs, books, webinars, and courses. I learned of the pitfalls of private label that the gurus selling you the dream never talk about. And finally, I did pull the trigger. I put together this guide to help any of you who are feeling a little gun-shy too. I put this book together for all of you who have the brains to say "Hey, if everyone buys top 100 selling products wont that saturate the market?" I put this book together to help you find great products from many different approaches. After reading this, you should feel confident enough to find a product and get started with your e-commerce business.

Dropshipping is a method of retail fulfillment where stores do not actually stock their products. When someone buys a product, the store buys it from another party and then ships it to the customer directly. The merchant neither handles nor sees the product. Dropshipping is different from the conventional retail model in that, in dropshipping the seller does not own an inventory. He or she purchases an order from a third party. The dropshipping model, like everything else, has drawbacks and benefits. You need less capital: this is arguably the biggest advantage. You do not need thousands of dollars to start an ecommerce store. Conventional retailers need to have a huge amount of capital to build their inventory. In dropshipping, you only purchase a product once a customer has placed an order and made the payment. An initial inventory investment is not needed. Easy to start: an ecommerce business becomes much easier to run when you do not handle physical products. You will not worry about a warehouse, packing and shipping, tracking inventory, handling returns, and much more. Low overhead: since you will not be dealing with a warehouse or purchasing inventory, expect low overhead expenses. A lot of people run a dropshipping businesses from their home office with their laptop and only use about \$100 per month. The expenses may increase as your business grows but they will still be low. Flexible location: if you have an internet connection, you can manage your dropshipping business from anywhere.

For sure, you've heard a lot about selling physical products on Amazon lately. But why Amazon? Simply because it's the biggest online store to ever have been - and probably that will ever be - created! If you're interested in e-commerce, Amazon is the right place for you. Another often-overlooked reason to sell on Amazon is its Prime clients. When you let Amazon handle the shipping, your products become eligible to be sold to millions of Amazon Prime clients that will receive any order of any size in just 2 days. So if you're asking yourself "Should I sell there?" the answer is YES! "But aren't there tons of competitors?" Yes, but IT'S NOT IMPORTANT! By opening its platform to third-party sellers, Amazon immediately created one of the biggest opportunities ever for entrepreneurs: it opened its store on its pages, selling to over 225 million clients! There are different ways you can sell on Amazon, but probably selling products with the distributor's own label is by far the best method to reach success. You're basically creating a brand with private labelling of a product that already sells well on Amazon. This not only makes you avoid having to reinvent the wheel, trying to create and market something new, but also making you compete for the "buy box". When you create your own brand, you distinguish yourself by being the only seller offering your product. This way you can keep all your profits, 100% of the time! The aim is to find a product, create a brand and sell more products in different countries that buy from Amazon. This book will guide you through the fundamentals of Amazon FBA. You will learn: - What Amazon FBA is - What are and how to use the algorithms - What the best market strategy is - Time is money - Finding products - Getting clicks ...and more! But wait, it's not over yet! You have another possibility to make big money. Have you decided to start your online activity by selling products? Shopify is the solution. If you're interested in selling any-size products or any services, Shopify is the simplest platform to build your ecommerce. We will now see how to use the Shopify platform in the following chapters: - What Shopify is - Maximize your profit - Shipping fees - Get the right Shopify key word - Backlink Shopify - Steps to build your online shop - Strategies for the correct pricing ...and much more! The term "e-commerce" was coined to indicate any sort of online transaction. E-commerce is a great way to find products straight from home. Shopify has grown significantly since its launch in 2006. The greatest thing about it is that you don't need to own a company to use this resource. You can sell things from home, if you wish. This makes Shopify a great way to sell what you make.
