Mastering Criminal Law explores the basic principles useful in the study of criminal law, offering real world examples to understand these concepts. It provides a clear and concise consideration of the fundamental structure of a crime including statutory interpretation and sentencing. It has chapters on the typical crimes covered in most criminal law casebooks, namely, homicide, rape, assault and battery, and theft. Additionally, it covers accomplice liability, solicitation, attempt and conspiracy. It also covers defenses, including the right to present a defense. It distinguishes different approaches such as the Common Law and Model Penal Code and provides examples of different state statutes. This book is part of the Carolina Academic Press Mastering Series edited by Russell L. Weaver,

University of Louisville School of Law.

"Mastering Evidence is a clear, concise discussion of the rules of evidence. It is designed to be a secondary source for students enrolled in their first course in evidence. Most courses in evidence, and, of course, the multi-state bar examination in evidence, focus primarily on the Federal Rules of Evidence. This book takes the same approach, fully explaining the details of those rules. It is also organized according to the same structure as the Federal Rules and is, therefore, easy to follow. For students who are concerned about the state rules of evidence, comments about traditional rules are made where appropriate. In short, this work should provide a good source for all students taking a course in evidence. It presents the rules in a readable fashion that makes it possible to understand complex concepts. This book is part of the Carolina Academic Press Mastering Series edited by Russell L. Weaver, University of Louisville School of Law."

How videogames offer a new way to do journalism. Journalism has embraced digital media in its struggle to survive. But most online journalism just translates existing practices to the Web: stories are written and edited as they are for print; video and audio features are

Online Library Emanuel CrunchTime For Basic Federal Income Taxation (Emanuel CrunchTime Series)

produced as they would be for television and radio. The authors of Newsgames propose a new way of doing good journalism: videogames. Videogames are native to computers rather than a digitized form of prior media. Games simulate how things work by constructing interactive models; journalism as game involves more than just revisiting old forms of news production. Wired magazine's game Cutthroat Capitalism, for example, explains the economics of Somali piracy by putting the player in command of a pirate ship, offering choices for hostage negotiation strategies. Videogames do not offer a panacea for the ills of contemporary news organizations. But if the industry embraces them as a viable method of doing journalism—not just an occasional treat for online readers—newsgames can make a valuable contribution.
