First published in 1946, Charles R. Knight's *Life Through the Ages* was for many a beloved first look at the strange animals of the prehistoric past. For much of the 20th century, Knight's reconstructions were the key resource for popular images of ancient life. His paintings and drawings were displayed as part of museum exhibits, notably at the American Museum of Natural History in New York and the Field Museum in Chicago, were used as illustrations in numerous books and magazine articles, and even influenced movie portrayals of dinosaurs and other prehistoric beasts. Knight's work was highly regarded both for its artistic skill and for its scientific accuracy, closely based as it was on the latest paleontological discoveries.

on the knowledge of its time. Although new discoveries and ongoing research have changed the view of many of the animals depicted by Knight, his work remains valuable and is still treasured by the new generations of scientists and paleoartists. For this Commemorative Edition, many of Knight's original drawings were re-photographed. A new Foreword by Stephen Jay Gould reflects on Knight's work, and a new Introduction by Philip J. Currie discusses recent scientific findings and Knight's restorations.

This delightful and ingenious pop-up book traces a caterpillar's evolution from lowly cocoon to magnificent winged butterfly. Along the way we find cunning insects hidden in the grass, inchworms munching their way through a jungle of leaves, and a floral paradise where the newly hatched butterfly makes its home. Intricately constructed with the dazzling color and delicate details that have become UG's trademark, this book also tells young readers one of nature's most basic stories.

Provides readers of all ages with a colorful tour of medieval castles through detailed pop-up diagrams with informative and factual text about their construction, inhabitants, and the era in which they were used.

Consummate pop-up master Robert Sabuda offers an elegant ode to possibility that will inspire anyone setting off on a new life chapter. All of life's possibilities are just a page turn away in this beautiful pop-up book from renowned paper artist Robert Sabuda. Throughout, phrases and images evoking potential (an acorn, an egg, a paper airplane) are answered by a glorious 3-D image on the following spread (a towering tree, a flock of birds, a rocket soaring upward). An ideal gift for graduates from kindergarten to college and beyond, *Believe* is the perfect way to celebrate life's passages and look forward to new horizons.

The classic fairy tale is illustrated with pop-up castles and characters.

Funny Bones tells the story of how the amusing calaveras—skeletons performing various everyday or festive activities—came to be. They are the creation of Mexican artist José Guadalupe (Lupe) Posada (1852–1913). In a country that was not known for freedom of speech, he first drew political cartoons, much to the amusement of the local population but not the politicians. He continued to draw cartoons throughout much of his life, but he is best known today for his calavera drawings. They have become synonymous with Mexico’s Día de los Muertos (Day of the Dead) festival. Juxtaposing his own art with that of Lupe’s, author Duncan Tonatiuh brings to light the remarkable life and work of a man whose art is beloved by many but whose name has remained in obscurity. The book includes an author’s note, bibliography, glossary, and index.

Although Tibetan Buddhism continues to grow in popularity, the crucial relationship between teacher and student remains largely misunderstood.

Dangerous Friend offers an in-depth exploration of this mysterious and complex bond, a relationship of paramount importance in Tibetan Buddhist practice.

Online Library Encyclopedia Prehistorica: Mega Beasts

According to Tibetan Buddhist tradition, the student must have complete trust in the teacher (the "dangerous friend") if he or she is to achieve any understanding. It is the teacher's responsibility to uphold the integrity of the tradition, the basis of which is compassion for all beings, by transmitting it properly to an appropriate student. Likewise, it is the student's responsibility to meet the challenge of carrying on the lineage of teachings. By entering such a relationship, both teacher and student accept the burden of protecting those teachings by understanding them completely and correctly, by practicing them fully and faultlessly, and by transmitting them without omission. Dangerous Friend includes discussions of the following topics:

- *Meeting and recognizing an appropriate teacher.*
- *Understanding the gravity of entering the teacher-student relationship.*
- *Shifting one's approach from spiritual materialism to genuine Buddhist practice.*
- *Accepting the challenge of being truly kind, honest, and courageous.*

The creators of the New York Times best-selling Encyclopedia Prehistorica series offer a mythic look at the mysteries of the past with an entire pantheon of remarkable pop-ups. (Age 5 and up) For all of recorded history, humans have sought to understand Earth's mysteries in the realm of the divine -- and aspired to conduct themselves as heroes. Only gods, of course, could push the sun across the sky, forge entire continents, and impel mountains to touch the clouds. In this stunning volume, the incomparable team of Matthew Reinhart and Robert Sabuda take us to Ra-Atum's land in Ancient Egypt; above the Grecian clouds to Zeus's Mount Olympus; up to Norse god Odin's frozen north; to the Far East, where the Jade Emperor sits in the heavens; into the wilds of Oceania, where Pele's

volcanic rage simmers below the earth; and to many more lands and times, all rich with sacred myths and legends.

Matthew Reinhart's phenomenal paper engineering, as evidenced in *Cinderella* and *The Jungle Book*, brings an added dimension --literally-- to the classic telling of childhood's most treasured nursery rhymes. Featuring classic rhymes such as "Mary had a Little Lamb" and "Twinkle, Twinkle, Little Star," readers can experience these timeless verses like never before. This special collector's edition comes complete with a specially designed, cloth-covered cover that also includes an additional pop. Each of the 250 copies in existence has been signed and numbered by Matthew Reinhart.

Larger-than-life bugs spring from the pages, peek out from behind flaps and hide under tabs, inviting young entomologists to marvel at the mind-boggling variety of arthropod life. What reader can resist a chance to look inside a cockroach's body to see how it works or open a wasps' nest to see what's inside?
