This book provides an important study of the theology of Thomas F. Torrance, who is generally considered to have been one of the most significant theologians writing in English during the twentieth century, with a view toward showing how his theological method and all his major doctrinal views were shaped by his understanding of the doctrine of the Trinity. Torrance pursued a theology that was realist because he attempted to think in accordance with the unique nature of the object that is known. In holding to such a methodology, he drew an analogy between

Download Ebook F

theology and natural science. This book demonstrates how, for Torrance, God relates with humanity within time and space so that creation finds its meaning in relation to God and not in itself; this enabled him to avoid many theological pitfalls such as agnosticism, subjectivism and dualism while explaining the positive implications of various Christian doctrines in a penetrating and compelling manner. This book offers an important resource for students of theology and for scholars who are interested in seeing how serious dogmatic theology shapes and should shape our understanding of the

Christian life.

In spite of his tragic death in November 1963, John F. Kennedy remains one of the most popular American presidents. Aside from the great set-piece speeches that helped to define him as a world leader, he possessed a richly warm sense of humor and a ready wit honed both at home and on politics. This collection presents hundreds of examples of that very wit, from Kennedy's opinions on the campaign trail to his view of the Cuban Missile Crisis. Christina Koning's previous books include A Treasury for Mothers and Fabulous Time.

World War II saw the development of the heavy bomber as a decisive weapon which, in sufficient numbers, could overcome defensive fighters and guns and lay waste to strategic targets. The addition of nuclear weapons to the bomber's armament made it even more

formidable, and by the late 1940s, US planners saw the growth of a Soviet nuclear-armed bomber fleet as a terrifying threat to North American security. Conventional subsonic fighters with guns and free-flight air-to-air rockets would be incapable of reaching these incoming bombers in time to prevent even one from delivering a devastating nuclear attack. As a result, supersonic speed, long-range guided missiles and precise radar-based control of an interception became prerequisites for a new breed of fighters,

beginning with the F-102. A massive research and development effort produced the F-102A '1954 Fighter', the J57 afterburning turbojet, its Hughes MX-1554 fire control system and, in due course, the Semi-Active Ground Environment (SAGE) radar and communications network that covered North America to guide its airborne defences. In service, F-102As also provided air defence in Europe with USAFE, in the Far East and in Southeast Asia, where they protected US airbases in South Vietnam and Thailand from

air attack by North Vietnamese fighters and bombers and escorted B-52s and fighter-bombers on their attack sorties. This illustrated study from leading expert Peter E. Davis details the design, development, and deployment of the futuristic F-102, including its complex research program and role in Vietnam.

State surveyors will reference F-Tags during nursing homes inspections. That's how they check that skilled nursing facilities (SNFs) are following federal regulations and they're in State Operations Manual, Appendix PP. But it's so long! And there are so many F-Tags! I don't want to read all that. And how will you keep track of them all? Never fear, this book will go over all the F-Tags, especially the ones that get cited most often for safety violations. Check out this book for an easy-to-understand guide

From the internationally acclaimed author of Measuring the World, here is a dazzling tragicomedy about the three sons of a lost father. Arthur Friedland is a wannabe writer who one day takes his sons to a performance by the Great Lindemann, Master of Hypnosis. Arthur declares himself immune to hypnosis and a disbeliever in magic. But the Great Lindemann knows better, and after he extracts Arthur's deepest secrets and

tells him to make them real, Arthur empties the family bank account and vanishes. He goes on to become a world-famous author, a master of the mystical. (F is for fake.) But what of his abandoned boys? The painfully shy Martin grows up to be a priest without a vocation. (F is for faith, and lack of it.) Eric becomes a financier on the brink of ruin (F is for fraud), while Ivan, hoping for glory as a painter, instead becomes a forger. (F is for forgery, too.) During the summer before the global financial crisis, they are thrown together again with cataclysmic results. Wildly funny and

Compounds with Elements of the Main Group 6 (SIV, SVI, Se Te) and with I

This third volume of the Supplement Series supplying the Main Volumes of the series "Perfluorohalogenoorgano Compounds of Main Group Elements", Part 1 to 9, completes the treatment of the compounds of the Main Group VI elements. It covers sulfur(IV) compounds, sulfonic acids, sulfonic anhydrides, and sulfonates, sulfur(VI) oxides, sulfonyl nitrogen compounds, sulfonyl halides, sulfur(VI) halides, and the compounds of selenium and tellurium. It also includes the perfluorohalogenoorgano compounds of iodine in

oxidation states higher than one and contains a formula index for the Supplement Volumes 1, 2, and 3. The Supplement Series will be concluded by the description of the nitrogen compounds. Concept, organization, and selection as to the coverage of the material are the same as in the Main Volumes. Title compounds are newly synthesized ones as well as those compounds already referred to in the Main Volumes and for which new facts have been published. Conventions as to the presentation of the data are given in the prefaces of the Main Volumes. In contrast to the convention for NMR chemical shifts used previously, chemical shifts downfield from the standard are designated as positive, according to the
