"Incorporated in 1887, South St. Paul grew rapidly as the blue-collar counterpart to the bright lights and sophistication of its cosmopolitan neighbors Minneapolis and St. Paul. Its prosperous stockyards and slaughterhouses ranked the city among America's largest meatpacking centers. The proud city fell on hard economic times in the second half of the twentieth century. Broad swaths of empty buildings were razed as

In 1990, South St. Paul began to chart out its own successful path to renewal with a pristine riverfront park, a trail system and a business park where the stockyards once stood. Author and historian Lois A. Glewwe brings the story of the city's revival to life in this history of a remarkable community"--Back cover.

Ethics in Fiscal Administration: An Introduction integrates ethics into the public administration curriculum by weaving ethical dilemmas into the financial management and budgeting process of the public and nonprofit sectors. Inquiry-based discussion prompts challenge students to examine scenarios that

they are likely to encounter in professional public service careers. Critics of the public sector often use the analogy that government should be run more like a business. Issues such as profitability versus social value preclude the public sector from becoming a mirror image of the private sector; however, ethical decision making in fiscal administration is an important concern across sectors. Using examples drawn from the public and nonprofit arenas, Ethics

Dr. Riki Ott exposes the profound legacy of the Exxon Valdez oil spill and how readers can help reshape our global energy future. The author chronicles the long-lasting environmental harm to Prince William Sound, Alaska, and investigates the health problems suffered by many cleanup workers. Exxon's spill provided a portal to understanding a startling truth: oil is much more toxic than we previously thought. *Sound Truth and Corporate Myth\$* frames the larger story of discovery of the truly toxic nature of oil. This book

Online Library Fireman Sam Annual 2013 (Annuals 2013)

shows how one particular fraction of crude oil, polycyclic aromatic hydrocarbons or PAHs, may well be the new DDT of the 21st century. In 1999, the U.S. Environmental Protection Agency listed 22 PAHs in crude oil as "persistent, bioaccumulative, and toxic (PBT) pollutants." Sharing this list of extreme human health hazards are the more commonly known pollutants--mercury, lead, dioxin, PCBs, and DDT. The latter are all highly regulated chemicals and some, such as DDT and PCBs, have been banned in the United States. Sound Truth and Corporate Myth\$ traces 15 years of lingering harm to humans and

Online Library Fireman Sam Annual 2013 (Annuals 2013)

wildlife from the Exxon Valdez oil spill. It reveals how corporate greed, government short-sightedness, and manipulation of the truth and the media have kept the public from learning the deadly nature of PAHs. The author provides relevant information and practical recommendations for people and policy-makers at this critical juncture in the history of civilization. This book will inspire people to reduce their own consumption of fossil fuels and, in so doing, help permanently shift society to a clean energy future.
