Flower Garden Calendar, Chiefly of Annuals

Designed to Furnish Brief Directions for the Cultivation and Management of the Vegetable and Flower Garden; Illustrated With Engravings; Containing Select Lists of Seeds and Plants (Classic Reprint)

Everyone longs for fragrant spring blossoms – Snapdragons, Bellis of Ireland, Sweet Peas, Sweet Williams and other beauties. But few grow them successfully in their own gardens because they haven't learned the simple techniques that make it possible. Expert flower grower Lisa Mason Zeigler introduces us to the long-blooming stars of the spring garden, the hardy annuals – those flowers that thrive when they are planted during cool conditions (instead of waiting until the warmth of spring). Forget "Some Like It Hot," she advises, and give them a cool start. Plant them in the right spot at the right time, nestle their roots deep into rich organic soil, and stand back. In no time at all, you'll have a low-maintenance, vibrant spring flower garden that keeps on blooming when other annuals are dead and gone.

Fight garden pests and increase your yields the natural way with this tried and true technique! Planting vegetables and flowers together is one of the oldest ways to create a healthy, bountiful garden, but there's more to the method than you might think. Vegetables Love Flowers will walk you through the ins and outs of companion planting, from how it works to which plants go together and how to grow the best garden for your climate. With the right information and some careful planning, you can help your plants thrive—and beautify your garden in the process.

Excerpt from The Flower Garden, or Monthly Calendar of Practical Directions for the Culture of Flowers Garden ensures a pretty general knowledge of its management. I cannot create a florist by a stroke of my pen, any more than I can make a neat gardener in a summary way, out of a common laborer, who never had a rake in his hand. That the present hints should be presented in Calen dar form, appears advisable, to avoid confusion, and to bring the respective flowers, and their culture, under immediate consideration, at the precise time they ought to meet attention; and as in the Kitchen Garden I made that form to commence with the month of November, SO likewise may the Floral year, with great propriety, be considered to begin with the same month, the culture of its earliest products being then to be attended to, and preparation made for their appear ance in the following spring.
