Read on your PC, Mac, smart phone, tablet or Kindle device. You "That Girl From the Dummy Line" is a first person account of growing up in severe poverty in the delta farm region of northeastern Arkansas in 50s and 60s in a tar-papered shack built on a dirt road known as the dummy line. The dummy line girl was the third of ten children born to an illiterate farmer and his wife, who didn't understand their daughter's love of education or her desire to go to college as she excelled in school. Indeed, they actively attempted to prevent her from leaving home to seek a college degree. The dummy line girl spent much of her childhood working in the cotton fields. Farm work and other chores took a toll on the dummy line girl's ability to stay on track with her studies and goals. Further complicating her life was a dysfunctional relationship with her parents and an abusive older sister. The local public school system became her refuge and provided her with the hope she needed in order to plan a better future for herself. This is a story about a girl who refused to accept the path given her by accident of birth - a girl who wanted more and believed she deserved more and was willing to work for it.

Fourteen-year-old Kathleen is walking home from a concert on a dark Liverpool night in 1974 when she's violently raped. The attacker, unimaginably, is her trusted parish priest. Terrified, Kathleen never tells her pious Catholic mother, and when she discovers she is pregnant, she pays a terrible price for her silence. Her mother believes Kathleen to be a fallen child and sends her to have her ill-begotten baby in Ireland. Kathleen toils in a notorious Magdalene Laundry, where heartless nuns dole out merciless penance on shamed girls. Kathleen never recovers from her trauma, and years later she's become the overprotective, paranoid mother of a second child. Meanwhile, Faye, a widowed mother of three worries about her teenage son, Tim. He's increasingly withdrawn, but when several parcels are mysteriously delivered the shocking truth about what is going on in his life is slowly revealed. She turns to an old flame believing he is at the root of Tim's problems and as the couple rekindles their love, Tim's troubles deepen. Faye pours out her sorrows in letters to a friend, and slowly, shocking family secrets and interwoven relationships reveal themselves. As it turns out, Kathleen isn't the only fallen one in this story of love, forgiveness, and powerful family ties. Every Family Has One is the anticipated sequel to The Catholic Woman's Dying Wish. It can be read as a stand-alone sequel.

**A fun family devotional inspiring children to understand the fruit of the Spirit It's common for kids to memorize the fruits of the Spirit: love, joy, peace, goodness, self-control, and all the rest. But that doesn't mean they understand what it means. Is peace just not fighting with your siblings? Does self-control mean resisting a second dessert? When Mom and Dad explain these concepts just in terms of morality, we miss the mark. Christie Thomas is skilled at taking complex ideas and making them accessible to kids . . . and adults learn a lot along the way too. Each of her devotionals is designed to help parents connect their children with the Holy Spirit through a Scripture passage, thought-provoking questions, ways to apply each verse, and a prayer. And for each fruit, parents can use the optional hands-on activities when there's extra time. Perfect for kicking off the New Year as a family, these 100 devotional experiences include illustrated examples of each fruit of the Spirit. They demonstrate the hands, heart, and habits of Jesus and also teach children to spend time with the good God who loves them. By understanding how he covers them with his goodness and how his Spirit helps them grow their own beautiful, Jesus-reflecting character, the whole family will connect to the Vine and grow abundant fruit together.**

What makes this story extraordinary is the author tells it from the perspective of being in the experience as a child. In this book, it is easy to see how childhood experiences often hold adult answers. The reader of this story innocently ends up assessing his or her own upbringing. The story speaks to anyone who has ever had parents. In this story, we realize that sometimes we just have to return to childhood in order to say good-bye. While this book makes us laugh & cry, its true power comes through family redemption! This is a rare work because it is told entirely in the voice of a child who is untiringly trying to earn his parents love while also trying to grow up. It is a luminous demonstration of family emotions. When childhood is a struggle for survival there is scant energy left for growing up. This book movingly reveals the consequences of that type childhood and offers deliverance. The genesis of the story is the author could not remember his childhood; it was suggested he start writing from his earliest recollection as a way of nurturing childhood memories. When he did, the voice of the child he once was, was passionate & direct. The author grew up in a home of alcoholism, violence, and dysfunction; yet, had no idea this experience created its own evolving trauma.

In the tradition of Jo Ann Beard's *Boys of My Youth*, and Mary Karr's *The Liar's Club*, Paula McLain has written a powerful and haunting memoir about the years she and her two sisters spent as foster children. In the early 70s, after being abandoned by both parents, the girls were made wards of the Fresno County, California court and spent the next 14 years-in a series of adoptive homes. The dislocations, confusions, and odd pleasures of an unrooted life form the basis of a captivating memoir. McLain's beautiful writing and limber voice capture the intense loneliness, sadness, and determination of a young girl both on her own and responsible, with her siblings, for staying together as a family.

How to Survive and Then Thrive

Adults who have suffered from an abusive childhood often have a difficult time functioning normally and forming meaningful relationships. They grew up in an environment that was considered abnormal by society's standards, so it becomes very hard for them to understand what exactly a normal relationship is. The mental and social effects of emotional abuse are perhaps the most complicated and prevalent. No matter what type of abuse a child suffers from, they will experience some kind of emotional or social consequence as a result. Once the child becomes an adult, these traits or thinking patterns have become second nature and it becomes far more difficult to change. A person's will is at the heart of their ability to change. 'Will' is what controls the human personality. It gives a person permission to express themselves. 'Will' must give them permission to change, in order for reprogramming of the mind to truly work. When a person takes control of their conditioning, they take back the keys to their own destiny. They no longer allow their traumatic past to control their lives or allow others to manipulate them. Recovering from childhood abuse is a long and trying process, but it is one that allows the adult child to finally break free from the fear and anger that once controlled their life. It is possible to lead a happy and fulfilling life if the individual is willing and able to work through their issues and face their fears. From understanding what abuse is and the many forms it takes to family dynamics and reconditioning of the mind, this book will walk the individual in need of healing towards positive restoration and renewal.

To be human is to be in relationships. We can't survive without them but it's in relationships that we can so easily get unravelled. Some relationships just seem to do us in. Either we feel like we lose ourselves or feel burnt out from futile efforts to make things right for another. In our relationships we can experience the very best of ourselves and the very worst. The message of *Growing Yourself Up* is that you can't separate understanding the individual from understanding relationships. All of life's relationships are integral to increasing self-awareness and maturity. And it's not necessarily the comfortable relationships that promote personal growth. In this 2nd edition of the bestselling book, Jenny examines how to help others without fostering dependency, and how to determine what kind of help you or others want from therapists. This is in response to the many lay and professional people who have found this book valuable personally and want to know how to help others grow. Drawing from Bowen family systems theory, the book takes you on a journey through each stage of life to see

predictable patterns of relationships and to show how to use this knowledge to make purposeful adjustments in yourself; as well as lending a mature helping hand to others. The result is a sturdier self, sturdier relationships and a refreshing new way to view life's challenges and opportunities.

Attacked and injected with a drug which slows his metabolism to a fraction of normal, Martin James becomes an unwilling time traveler who hurtles through the years. His children grow up, his wife grows older, and his only hope is finding the people who injected him in the first place- not an easy task when one day for Martin lasts four years. And while Martin James strives to find a cure before everyone he loves is gone, others are uncertain if his journey can be stopped at all. W. Lawrence weaves a dystopian future filled with the best and worst of humanity, highlights the blessings and curses of technology, and pushes the limits of faith and hopelessness. Above all, Syncing Forward is a tale of one man's love for his family, and their devotion to saving him from being lost forever.

Excerpts from Baklava for President: "The first clue that a meal was unsavory was our father's claim he was presenting us with a delicacy." "Maybe priests were just as bad at math as Jesus." "Frankly, Homeland Security would be wise to contact our yiayias for a diplomacy consult." "Once the egg cracking contest began, we were no longer family-we were soldiers on a battlefield trying to vanquish our adversaries." "When I die, I want to go to Heaven savoring that last, rich, salty bite of spanakopita on my lips." For K. D. Papandreou, growing up in a Greek-American family was a topsy-turvy experience. While breakfast cereal and morning cartoons were allowed on Saturdays, Sundays were always church daze. And trips to Grandma's house were fun because there was always plenty of spanakopita and honey candies. Still they knew, once they crossed that threshold, that American rules and customs no longer applied. That meant no Oreos, pizza, or TV. It also meant trying to avoid eating tripe stew on the holidays. Luckily, the tooth fairy was a regular visitor, so they had pocket change to spend on gum, chocolate, and other essentials. K. D. has decided to call Baklava for President a memoir so there's no finger pointing about her childhood recollections. And she's taken the liberty of cleverly altering everyone's names so she won't have to go into the Witness Protection Program after her family reads this. But she knows there is one thing they all agree about: food is love and, if something is good, more is better.

*Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and*

targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
