Conversation-powered leadership How can leaders make their big or growing companies feel small again? How can they recapture the “magic”—the tight strategic alignment, the high level of employee engagement—that drove and animated their organization when it was a start-up? As more and more executives have discovered in recent years, the answer to this conundrum lies in the power of conversation. In Talk, Inc., Boris Groysberg and Michael Slind show how trusted and effective leaders are adapting the principles of face-to-face conversation in order to pursue a new form of organizational conversation. They explore the promise of conversation-powered leadership—from the time-tested practice of talking straight (and listening well) to the thoughtful adoption of social media technology. And they offer guidance on how to balance the benefits of open-ended

talk with the realities of strategic execution. Drawing on the experience of leaders at diverse companies from around the world, Talk, Inc., offers provocative insights and user-friendly tips on how to make organizational culture more intimate, more interactive, more inclusive, and more intentional—in short, more conversational.

What makes a great leader? It's a question that has been tackled by thousands. In fact, there are literally tens of thousands of leadership studies, theories, frameworks, models, and recommended best practices. But where are the clear, simple answers we need for our daily work lives? Are there any? Dave Ulrich, Norm Smallwood, and Kate Sweetman set out to answer these questions—to crack the code of leadership. Drawing on decades of research experience, the authors conducted extensive interviews with a variety of respected CEOs, academics, experienced executives, and seasoned consultants—and heard the same five essentials repeated again and again. These five rules became The Leadership Code. In The Leadership Code, the authors break

down great leadership into day-to-day actions, so that you know what to do Monday morning. Crack the leadership code—and take your leadership to the next level.

learning to swim by being dropped into the deep end of the pool. Now the deputy managing editor at Fortune, Gilman learned the hard way about what makes a good boss. He shares his insights from the good, bad, ugly, entertaining, and sometimes just plain bizarre stories from more than two decades in the management trenches.

The vision of this book is to engage readers in a debate on how we see HR as a function and profession here and now, how we see the practice and the practitioner. The intent is to reflect on what we are seeing, hearing and experiencing about the function in an inclusive fashion. This book offers a practitioner's take to human resources management as a profession and function keeping in mind the most current and contemporary practices, problems and perspectives in India. The book is meant for young professionals, students and practitioners in the field of HRM. The book truly reflects HRM as it is practiced today with stories of places (organizational case studies) where it is at its best. Shorn of all theory, this book raises and answers questions such as given the rapid advancement in the profession, should the term HR be redefined? Why does the quality of the function depend so much on the way it is positioned within the organisation? What shapes a CEO's attitude towards HR? What are the big demands on HR today and in times to come? How does one advance in HR? Written by practitioners with first-hand HR experience, HR Here and Now is a thought-provoking book set firmly in the Indian context.

The author argues that the roles of human resource professionals must be redefined to meet the competitive challenges organizations face today and into the future. He provides a framework that identifies four distinct roles of human resource professionals: strategic player, administrative expert, employee champion, and change agent. He includes many examples to demonstrate that human resource professionals must operate in all four areas simultaneously in order to contribute fully. He urges a shift of these professionals' mentality from "what I do" to "what I deliver" and makes specific recommendations for how individuals in human resources can partner with line managers to make organizations more competitive.

The international best seller *Human Resource Champions* helped set the HR agenda for the 1990s and enabled HR professionals to become strategic partners in their organizations. But earning a seat at the executive table was only the beginning. Today's HR leaders must also bring substantial value to that table. Drawing on their 16-year study of over 29,000 HR professionals and line managers, leading HR experts Dave Ulrich and Wayne Brockbank propose *The HR Value Proposition*. The authors argue that HR value creation requires a deep understanding of external business realities and how key stakeholders both inside and outside the company define value. Ulrich and Brockbank provide practical tools and worksheets for leveraging this knowledge to create HR practices, build organizational capabilities, design HR strategy, and marshal resources that create value for customers, investors, executives, and employees. Written by the field's

Effective Human Resource Management is the Center for Effective Organizations' (CEO) sixth report of a fifteen-year study of HR management in today's organizations. The only long-term analysis of its kind, this book compares the findings from CEO's earlier studies to new data collected in 2010. Edward E. Lawler III and John W. Boudreau measure how HR management is changing, paying particular attention to what creates a successful HR function—one that contributes to a strategic partnership and overall organizational effectiveness. Moreover, the book identifies best practices in areas such as the design of the HR organization and HR metrics. It clearly points out how the HR function can and should change to meet the future demands of a global and dynamic labor market. For the first time, the study features comparisons between U.S.-based firms and companies in China,
