readily at hand. But as with so many things in life, critical clues often go unnoticed until science, accident, and intrigue collide. The collision was initiated by a Polish archaeologist who received permission to collect DNA samples from a group of royal mummies at the Cairo National Museum in 1973. A tragic victim of the Yom Kippur War, his samples sat dormant gathering dust until they were found and processed in 1998. Meanwhile during the early 1970s an international team noticed, while x-raying the same mummy collection, some extremely unexpected physiological details among several of them. As with the radiological data, the chromosomal evidence proved to be equally disquieting. When taken together they argued for the introduction of a unique genetic anomaly in the human genome during the Egyptian late Eighteenth Dynasty. The source was extraterrestrial.
