Logan From the moment I first saw him, I knew I was screwed. Bennet Long wasn't just any handsome Omega with sinfully blue eyes and an body that could make an Alpha like me ache long after I'd watched him go. He was off limits. Completely forbidden. Not because I couldn't take him. I knew the minute we first touched and I saw the way his cheeks flushed pink that I could have him. Make him mine. No, I couldn't even let myself think about taking Bennet Long-not because I couldn't, but because it was wrong. I was fifty-five. He was barely old enough to buy his own beer. After one failed marriage already and a lifetime of military service, I knew I wasn't suitable to be around any Omega at all-but the last Omega I needed to be throwing myself at was one as young, damaged and naive as him. And then there was the other catch...the one that turned Bennet Long from a no-go zone into the juiciest piece of forbidden fruit I could imagine... Bennet I'd always found myself attracted to older Alphas, but after my last relationship came to such a violent, terrifying end, I never thought I'd actually be with one ever again. But ever since that awful, painful night, my body had been hurt in ways that I couldn't explain. My heat started coming on stronger. More unpredictable. More desperate. Being around any Alpha at all when one hit me was a bad idea of the highest order... But being around my best friend's Alpha military hero dad? With Logan's broad, strong shoulders, thick, muscular arms and firm, I couldn't have stopped myself even if I'd wanted to. Logan was everything that I knew I didn't need in my life. Authoritative. Commanding. Emotionally absent. But the things he made me feel were too strong to deny. Could I try to anyway? Not a chance.

Riley It was the most emotional time of his life. His papa couldn't stop crying, his father told him exactly what to do, so he wouldn't ruin his life. When the pressure gets too much, sixteen-year-old Riley agrees he's too young to raise his child, so he signs away his rights and gives him to a loving couple chosen by his parents, leaving a void in his life that can never be filled... What happens when the perfect opportunity to raise his child presents itself... even if it means going undercover as the nanny. **Grayson** All Grayson has ever wanted was a family of his own, after growing up with self-involved parents. The first chance he gets he says yes, but to the wrong omega. Max, the child he always wanted. Riley, the omega he never expected. Almost too perfect to be true? Finally the family he always wanted. Or is it? What happens when Grayson finds out the secret Riley has been hiding? Can the family and love they've found withstand the truth coming out?

On an icy night in October 1984, a Piper Navajo commuter plane carrying 9 passengers crashed in the remote wilderness of northern Alberta, killing 6 people. Four survived: the rookie pilot, a prominent politician, a cop, and the criminal he was escorting to face charges. Despite the poor weather, Erik Vogel, the 24-year-old pilot, was under intense pressure to fly--a situation not uncommon to pilots working for small airlines. Overworked and exhausted, he feared losing his job if he refused to fly. Larry Shaben, the author's father and Canada's first Muslim Cabinet Minister, was commuting home after a busy week at the Alberta Legislature. After Paul Archambault, a drifter wanted on an outstanding warrant, boarded the plane, rookie Constable Scott Deschamps decided, against RCMP regulations, to remove his handcuffs--a decision that profoundly impacted the men's survival. As they fought through the night to stay alive, the dividing lines of power, wealth and status were erased and each man was forced to confront the precious and limited nature of his existence. The survivors forged unlikely friendships and through them found strength and courage to rebuild their lives. Into the Abyss is a powerful narrative that combines in-depth reporting with sympathy and grace to explore how a single, tragic event can upset our assumptions and become a catalyst for transformation.

The #1 New York Times bestselling memoir of U.S. Navy SEAL Chris Kyle, and the source for Clint Eastwood's blockbuster, Academy-Award nominated movie. "An amazingly detailed account of fighting in Iraq--a humanizing, brave story that's extremely readable." – PATRICIA CORNWELL, New York Times Book Review "Jaw-dropping...Undeniably riveting." –RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

How Creative Behaviors Really Evolve

The eureka moment is a myth. It is an altogether naïve and fanciful account of human progress. Innovations emerge from a much less mysterious combination of historical, circumstantial, and accidental influences. This book explores the origin and evolution of

several important behavioral innovations including the high five, the Heimlich maneuver, the butterfly stroke, the moonwalk, and the Iowa caucus. Such creations' striking suitability to the situation and the moment appear ingeniously designed with foresight. However, more often than not, they actually arise 'as if by design.' Based on investigations into the histories of a wide range of innovations, Edward A. Wasserman reveals the nature of behavioral creativity. What surfaces is a fascinating web of causation involving three main factors: context, consequence, and coincidence. Focusing on the process rather than the product of innovation elevates behavior to the very center of the creative human endeavor.

The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

When he's sent to alpha Rex Bronan's home to care for his four-year-old son, Con immediately spots a loving father who has trouble showing that love. Most people would probably keep their mouths shut so they could keep their job. But Con doesn't always do things the way other people would. Rex has raised his son alone for three years. His wife dumped him a year after his son was born because he was such a workaholic. He knows he isn't the best father in the world, but he didn't really think he was the worst either. Not until that mouthy omega Con started pointing out all his flaws. Rex has always been with women, and he hasn't really noticed another guy sexually since college. Even then he'd never acted on anything with a guy. Finding Con attractive is confusing for Rex, but the biggest issue he has with this newfound attraction to his manny is the fact that he's twenty years older than Con.

"An expertly drawn narrative, well paced and above all intriguing in its portrayal of an odd, little known episode in the Second World War." —National Post The Globe and Mail calls The Dictator "suspenseful . . . layered and morally complex" With a deft touch and a wonderful ability to show the humorous in the tragic, David Layton has written a novel that explores the relationship between fathers and sons, and the way in which events of the past translate down through the generations. The Dictator is at turns funny and insightful.

Quinlan sacrificed his life for Dusty's family, and now Dusty's grown and ready to claim Quinlan as a lover. Can he convince Quinlan that in Dusty's eyes, he's never been the manny?"

The instant New York Times bestseller from author, comedian and actor Patton Oswalt, a "heartfelt and hilarious" (USA TODAY) memoir about coming of age as a performer.

during the late 1990s while obsessively watching classic films at a legendary theater in Los Angeles. "[Oswalt has] a set of synapses like a pinball machine and a prose match" (The New York Times). Between 1995 and 1999, Patton Oswalt lived with an unshakable addiction. It wasn't drugs, alcohol, or sex: it was film. After moving to Angeles, Oswalt became a huge film buff (or as he calls it, a sprocket fiend), absorbing classics, cult hits, and new releases at the famous New Beverly Cinema. Silver celluloid became Patton's life schoolbook, informing his notion of acting, writing, comedy, and relationships. Set in the nascent days of LA's alternative comedy scene, Screen Fiend chronicles Oswalt's journey from fledgling stand-up comedian to self-assured sitcom actor, with the colorful New Beverly collective and a cast of now-not-so-young comedians supporting him all along the way. "Clever and readable...Oswalt's encyclopedic knowledge and frothing enthusiasm for films (from sleek noir classics, B movies, to cliché-riddled independents, to big empty blockbusters) is relentlessly present, whirring in the background like a projector" (The Boston Globe). This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of "alternative facts", this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.

Legend says that Midwinter Wolf listens to the deepest wishes of a shifter's heart, and brings him what he most needs in the moment. Raleigh's living the best life he can with his pups and his mate, until the simmering violence in his mating erupts and he and his pups run for the sanctuary of Mercy Hills. There, he begins to unfold the parts of his life he's kept hidden away and, most importantly, opens his heart to an alpha unlike any other he's ever met. Cas was born the last and smallest of four extremely alpha alphas. He's learned to use wit and cunning to win his fights, but there's nothing he can do to protect his heart from the omega who comes calling on Midwinter Moon, looking for shelter and a chance at a new life. In that moment, the rebellious young alpha is brought firmly to heel as his heart recognizes the omega of his dreams. But another alpha has a claim, if not on Raleigh's heart, then on his body. If Cas wants to keep him, he must use all his skills to win his mate free of the past. But can a single alpha wolf, no matter how determined, defeat years of tradition? Omega's Flight is a 210,000 word novel in the ongoing saga of the Mercy Hills Shifter Pack. It contains adult themes and deals with themes of domestic violence, pregnancy loss and depression.
