A groundbreaking exploration of what it means to be a late bloomer in a culture obsessed with SAT scores and early success, and how finding one's way later in life can be an advantage to long-term achievement and happiness. We live in a society where kids and parents are obsessed with early achievement, from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing job at Google or Facebook—or even better, creating a startup with the potential to be the next Google or Facebook or Uber. We see software coders becoming millionaires or even billionaires before age 30 and feel we are failing if we are not one of them. But there is good news. A lot of us—most of us—do not explode out of the gates in life. That was true for author Rich Karlgaard, who had a mediocre academic career at Stanford (which he got into by a fluke), and after graduating, worked as a dishwasher, nightwatchman, and typing temp before finally finding the inner motivation and drive that ultimately led him to start up a high-tech magazine in Silicon Valley, and eventually to become the publisher of Forbes magazine. There is a scientific explanation for why so many of us bloom later in life. The executive function of our brains doesn't mature until age 25—and later for some. In fact our brain's capabilities peak at different ages. We actually enjoy multiple periods of blooming in our lives. Based on several years of research, personal experience, and interviews with neuroscientists and psychologists, and countless people at different stages of their careers, Bloom reveals how and when we achieve full potential—and why an algorithmic acuity in math is such an anomaly in terms of career success.

"Where are those dogs going? To a dog party! A big dog party!" Now children can join the party, too. Go, Dog. Go!, one of the most popular children's books of all time, is celebrating it's 50th anniversary and is now available as party book complete with cutout party hats, nut cups, place cards, a poster to decorate, reusable stickers, and a board game. Kids can help the dogs get to the big dog party up in the tree and then have a party of their very own!

Akin to Monty Roberts's The Man Who Listens to Horses and going light-years beyond The Hidden Life of Dogs, this extraordinary book takes a radical new direction in understanding our life with canines and offers us astonishing new lessons about our pets. From changing the misbehaviors and habits that upset us, to seeing the world from their unique and natural perspective, to finding a deep connection with another being, BONÉS WOULD RAIN FROM THE SKY will help you receive an incomparable gift: a profound, lifelong relationship with the dog you love.
