Black Cotton is an ongoing comic book series set in an alternate reality that revolves around an exorbitantly wealthy black family, the Cottons, created by Brian Hawkins and Patrick Foreman, illustrated by Marco Perugini, and published by Scout Comics. Set in an alternate reality where the social order of “white” and “black” is reversed, when it comes to social standing and class, the Cottons are at the top of the food chain, part of the One Percent, and are seemingly untouchable. However, that all changes when Zion, their police officer son, who decided to not follow in the footsteps of his father and matriculate towards running the family business, is involved in the shooting of a minority white woman. In a reality similar to our own, social tensions are already high, race is a hot topic, and the call for equality between white and black is aggressively being pursued. Thus, Zion Cotton shooting Elizabeth Nightingale, a twenty-something college student on scholarship for track, ignites their city in a fury of protests and a call for action against racial injustice. Led by the family’s patriarch, Elijah Cotton, and matriarch, Jaleesa Cotton, the Cottons are thrustled into the middle of a highly controversial predicament and immediately attempt to use their wealth, prestige, and power to remedy the problem. However, while the youngest Cotton, Xavier, a teenager, actively protests the social injustices with his friends, the middle child, Qia Cotton, the acting CCO of Black Cotton Ventures, a multi-billion dollar manufacturing conglomerate, does damage control for her wayward brother. Ultimately, more division is created between both families as the Nightingales, unwilling to be assuaged, seek justice for Elizabeth, their daughter, who survived. “Black Cotton is a comic, but it’s also a mindset that’s being explored in a comic.”

Tax Administration 2019 Comparative Information on OECD and other Advanced and Emerging Economies

OECD/G20 Base Erosion and Profit Shifting Project Tax Challenges Arising from Digitalisation – Interim Report 2018 Inclusive Framework on BEPS

The eighth edition of the OECD’s Tax Administration Series, this report provides internationally comparative data on aspects of tax systems and their administration in 58 advanced and emerging economies. The publication presents the results of the 2018 International Survey on Revenue Administration (ISORA), a multi-organisation international survey to collect national-level information and data on tax administration governed by four partner organisations: CIAF, the IMF, IOFA and the OECD. For the 2018 survey round, the Asian Development Bank (ADB) agreed to participate along with the four partner organisations.

New York Times Bestseller The Trump administration is remaking the government. It’s Even Worse Than You Think: What the Trump Administration Is Doing to America tells us exactly how it is making America worse again. Bestselling author and longtime Trump observer David Cay Johnston shines a light on the political termites who have infested our government under the Trump Administration, destroying it from within and compromising our jobs, safety, finances, and more. No journalist knows Donald Trump better than David Cay Johnston, who has been following him since 1988. It’s Even Worse Than You Think: What the Trump Administration Is Doing to America goes inside the administration to show how the Federal agencies that touch the lives of all Americans are being undermined. Here is just some of what you will learn: The Wall. Mexican President Enrique Pena Nieto told President Trump that Mexico will never pay for the border wall. So, Trump is proposing putting a tariff on Mexican imports. But a tariff will simply raise the price of Mexican goods in the US, meaning American consumers will end up paying for the wall—if it ever gets built. Climate Change. Welcome to the new EPA, run by Scott Pruitt, a lawyer who has spent much of his career trying to destroy the agency he now heads. Secrecy reigns at the new EPA because Pruitt meets with industry executives to find out which clean air and clean water provisions they most want to roll back, and keeps staffers in the dark to make sure these pro-pollution plans don’t leak prematurely. Stocking the Swamp. Contrary to his promise to “drain the swamp” in Washington, DC, Trump has filled his cabinet with millionaires and billionaires, from Treasury Secretary Steven Mnuchin, a Goldman Sachs and hedge fund veteran who made much of his fortune foreclosing on homeowners to billionaire heiress Education Secretary Betsy DeVos, who has already put the interests of bankers ahead of debt-burdened students and their families. The Kleptocracy. Under Donald Trump conflict of interest is passé. When Trump isn’t in Washington, he stays at one of his properties, where the taxpayers pick up the tab for staffers, Secret Service, and so on, all at full price. And back in Washington, everyone now knows that the Trump International Hotel is the only place to stay if you want to do business with the administration. Meanwhile sons Donald Jr. and Eric run an eyes-wide-open blind trust of Trump holdings to avoid the appearance of conflict of interest—but not the reality.

The very word taxes sends shivers up spines. Yet, very few realize the tremendous impact that taxation has had on civilization. Charles Adams changes that in this fascinating history. Taxation, says Mr. Adams, has been a catalyst of history, the powerful influence if not the direct cause of many of the famous events of history that have marched across the world’s stage as empires collided and battled for the right to tax the loser. For Good and Evil is the first book to examine how taxation has been a key factor in world events. Like the Rosetta Stone – a tax document – the book sheds fresh light onto much of history. Did you know that biblical Israel split after Solomon’s death because his son refused to cut taxes? That Rome rose to greatness due to a liberal tax regime but declined under corrupt and inefficient ones? That in Britain, Lady Godiva made her famous ride as a tax protest? That in Switzerland William Tell shot the apple off his son’s head as punishment for tax resistance? Or that Fort Sumter, where the first shots of the Civil War were fired, was a Customs House? Combining facts with thought-provoking comment he frequently draws parallels between tax events of the past and those of the present. Finding fault with the Western civilization is taxed, Adams provides ideas for curing those faults by using the valuable lessons that history has taught. The special value of this refreshing new look at history lies in the lessons to be drawn by all thinking taxpayers. “Taxes are the fuel that makes civilization run, but how we tax and spend determines to a large extent whether we are prosperous or poor, free or enslaved, and most importantly, good or evil.” Once you read For Good and Evil, you’ll never feel the same about taxes!

Il Volume affronta le problematiche pratico-applicative più attuali e, al tempo stesso, complesse in tema di risoluzione delle controversie tra Amministrazioni finanziarie, avendo particolare riguardo agli aspetti che presentano profili di criticità sul piano operativo. In ambito internazionale, la procedura amichevole (cd. “Mutual Agreement Procedure” - MAP), di cui all’art. 25 del Modello di Convenzione OCSE, volta a risolvere le controversie tra Stati che traggono origine da fenomeni di doppia imposizione, ha assunto un ruolo centrale all’esito dei lavori del cd. Progetto BEPS (“Base Erosion and Profit Shifting”) che ha coinvolto i Paesi aderenti all’OCSE e al G20. Tale meccanismo è stato oggetto di analisi dell’Action 14 del Progetto BEPS, il cui documento finale “Making Dispute Resolution Mechanisms More Effective, Action 14 – 2015 Final Report” si è posto l’obiettivo di rafforzare l’effettività e l’efficienza delle “Mutual Agreement Procedure” cercando di riuolare i rischi di incertezza e di doppia imposizione nonché di assicurare l’implementazione dei trattati contro le doppie imposizioni per un’effettiva e tempestiva soluzione delle controversie mediante le procedure amichevoli.

Better investment fiscal regimes for oil, gas, and mining can make a substantial contribution to the revenue needs of many developing countries while ensuring an attractive return for investors, according to a new policy paper from the International Monetary Fund. Revenues from extractive industries (EIs) have major macroeconomic implications. The EIs account for over half of government revenues in many petroleum-rich countries, and for over 20 percent in mining countries. About one-third of IMF member countries find (or could find) resource revenues “macro-critical” – especially with large numbers of recent new discoveries and planned oil, gas, and mining developments. IMF policy advice and technical assistance in the field has massively expanded in recent years – driven by demand from member countries and supported by increased donor finance. The paper sets out the analytical framework underpinning, and key elements of, the country-specific advice given. Also available in Arabic: ????? ?????? ?????? ?????? ?????? “TRACY HOGG HAS GIVEN PARENTS A GREAT GIFT—the ability to develop early insight into their child’s temperament.” –Los Angeles Family When Tracy Hogg’s Secrets of the Baby Whisperer was first published, it soared onto bestseller lists across the country. Parents everywhere became “whisperers” to their newborns, amazed that they could actually communicate with their baby within weeks of their child’s birth. Tracy gave parents what for some amounted to a miracle: the ability to understand their baby’s every cry and cry so that they could tell immediately if the baby was hungry, tired, in real distress, or just in need of a little TLC. Tracy also dispelled the insidious myth that parents must go sleepless for the first year of a baby’s life—because a happy baby sleeps through the night. Now you too can benefit from Tracy’s more than twenty years’ experience. In this groundbreaking book, she shares simple, accessible programs in which you will learn: • E.A.S.Y.—how to get baby to eat, play, and sleep on a schedule that will make every member of the household’s life easier and happier. • S.L.O.W.—how to interpret what your baby is trying to tell you (so you don’t try to feed him when he really wants a nap). • How to identify which type of baby yours is—Angel, Textbook, Touchy, Spirited, or Grumpy—and then learn the best way to interact with that type. • Tracy’s Three Day Magic—how to change any and all bad habits (yours and the baby’s) in just three days. At the heart of Tracy’s simple but profound message: treat the baby as you would like to be treated yourself. Reassuring, down-to-earth, and often flying in the face of conventional wisdom, Secrets of the Baby Whisperer promises parents not only a healthier, happier baby but a more relaxed and happy household as well.

A revealing look at austerity measures that succeed—and those that don’t Fiscal austerity is hugely controversial. Opponents argue that it can trigger downward growth spirals and become self-defeating. Supporters argue that budget deficits have to be tackled aggressively at all times and at all costs. Bringing needed clarity to one of today’s most challenging economic issues, three leading policy experts cut through the political noise to demonstrate that there is not one type of austerity but many. Austerity assesses the relative effectiveness of tax increases and spending cuts at reducing debt, shows that austerity is not necessarily the kiss of death for political careers as is often believed, and charts a sensible approach based on data analysis rather than ideology. The Global Investment Competitiveness report presents new insights and evidence on drivers of foreign direct investment (FDI) in developing countries, and FDI’s role in development. The report’s survey of 750 executives of multinational corporations finds that a business-friendly legal and regulatory environment is a key driver of investment decisions in developing countries, along with political stability, security, and macroeconomic conditions. The report’s topic-specific chapters explore the potential of FDI to create new growth opportunities for local firms, assess the power of tax holidays and other fiscal incentives to attract FDI, analyze characteristics of FDI originating in developing countries, and examine the experience of foreign investors in countries affected by conflict and fragility. Three key features of this

Global Investment Competitiveness report distinguish it from other publications on FDI. First, its insights are based on a combination of first-hand perspectives of investors, extensive analysis of available data and evidence, and international good practices in investment policy design and implementation. Secondly, rather than exploring broad FDI trends, the report provides detailed and unique analysis of FDI depending on its motivation, sector, geographic origin and destination, and phase of investment. Thirdly, the report offers practical and actionable recommendations to policymakers in developing countries wishing to reform their business climates for increased investment competitiveness. As such, the report is meant to complement other knowledge products of the World Bank Group focused even more explicitly on country-level data, detailed diagnostics, and presentation of best practices. We are confident this report will bring value and fresh perspectives to a variety of audiences. To governments and policymakers, including investment promotion professionals, the report offers direct insights into the role of government policies and actions in investors’ decision-making. To foreign investors and site location consultants, the report provides information on FDI trends and drivers across sectors and geographies. For academic audiences, the new datasets on investment incentives and FDI motivations enables opportunities for additional research and analysis. Lastly, for development assistance providers and other stakeholders, the report highlights key approaches for maximizing FDI’s benefits for development.

This interim report of the OECD/G20 Inclusive Framework on BEPS is a follow-up to the work delivered in 2015 under Action 1 of the BEPS Project on addressing the tax challenges of the digital economy.

This publication is a response to the need, often expressed by governments, for clearer guidance on the policy and administrative aspects of applying transfer pricing analysis to some of the transactions of multinational enterprises (MNEs) in particular. Such guidance should not only assist policy makers and administrators in dealing with complex transfer pricing issues, but should also assist taxpayers in their dealings with tax administrations. Without an effective response to transfer pricing issues, profits earned in one jurisdiction might appear to be shifted to another jurisdiction. This may have the net effect of minimising tax revenues in a country where economic activity of the MNE takes place, and therefore the ability to finance country’s development.

Today’s moviegoers and critics generally consider some Hollywood products—even some blockbusters—to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie “art.” Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In Hollywood Highbrow, Shyon Baumann for the first time tells how social and cultural forces radically changed the public’s perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art work, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies—and not just European ones—deserved to be considered art.

Dal “Ludus Triumphorum” (gioco dei Trionfi) che allietava i nobili nelle corti del Rinascimento, fino ad arrivare alla nascita della cartomanzia; questo libro analizza le misteriose carte, ridando valore alle autentiche tecniche divinatorie degli autori classici e delle grandi scuole iniziatiche. Cosa apprenderai dal Segreto dei Tarocchi: La simbologia, l’iconografia e il significato dell’intero mazzo dei Tarocchi, spiegato in maniera semplice e approfondita. I metodi di divinazione ideati dai grandi occultisti del passato: Etteilla, Eliphas Levi, Oswald Wirth, Papus, Arthur Edward Waite, Aleister Crowley. Come capire se le figure di corte (Re, Regine, Fanti e Cavalieri) rappresentano persone reali o aspetti psicologici del consultante. Come riconoscere le persone nella realtà dalla carta, in base alle loro caratteristiche fisiche (età, colore capelli, occhi). Come calcolare i tempi di previsione e la data di un avvenimento che dovrà verificarsi in futuro o che è accaduto in passato. This publication analyses the role played by conditional cash transfer (CCT) or “co-responsibility” programmes. These programmes are among the main instruments used over the past 15 years to combat poverty in the region and have attracted attention and been replicated beyond its borders. Their purpose is to halt the intergenerational transmission of poverty by developing human capacities in the most vulnerable families. To that end, they deliver direct monetary transfers, subject to certain conditionalities relating to school attendance and health checks. Thus, CCTs not only help to reduce income poverty but also contribute to human-capacity-building, a key asset for the sustainable development and progress of our societies.
