

Il Primo Inverno La Piccola Era Glaciale E L'inizio Della Modernità Europea (1570 1700)

This volume presents a selection of papers from the 13th International Conference on Military Geosciences (ICMG), held 24-28 June 2019 in Padua, Italy. It covers a wide range of subjects within the confines of military geoscience written by scientists with a variety of different backgrounds from many countries throughout the world. Many of the papers focus on subjects related to Italy and World War I, but additional subject areas include international perspectives in the military geosciences, international security, geospatial intelligence and remote sensing, subterranean and underground warfare, analyses of historical battlefields and fortifications, and military archaeology. The book will be of interest to academics (e.g., military historians, military archaeologists, military geographers and geologists), applied geoscientists (e.g., engineering geologists and geologists working in other areas of applied geology), professional geoscientists, and those with a general interest in military geoscience and history.

Guerra Per Sempre

A Unique Home-Study Method Developed by the Famous Berlitz Schools of Language

Le stagioni

Girolamo Donzellini was born in 1513. He was a religious dissenter, a physician, and a bibliophile involved in the Medical Republic of Letters. He was put to death by the Venetian Inquisition in 1587, after being tried five times in his lifetime. Extending beyond an individual case study to a granular and probing account of the many connections between Venetian physicians and heterodox religious movements in the wake of the Protestant Reformation, this innovative monograph reveals sixteenth-century Venice. In addition to Donzellini himself, the web of actors includes printers, scholars, women, and alchemists who were all committed to fighting against religious dogma and violence in a time and place when both were the order of the day. This book will appeal to researchers and students alike interested in the History of Medicine, the History of religious heterodoxy and tolerance, as well as the History of the Catholic Inquisition in Venice.

In Living Memory

La Divina Commedia ... additata al giovanetti per cura del prof. Francesco Regonati. [Selections, with a commentary.]

A Network of Heterodox Physicians in Sixteenth-Century Venice

A collection of essays discussing the famed Italian film director, writer, and intellectual. More than thirty years after the tragic death of Pier Paolo Pasolini, this volume is intended to acknowledge the significance of his living memory. His artistic and cultural production continues to be a fundamental reference point in any discourse on the state of the arts, and on contemporary political events, in Italy and abroad. This collection of essays intends to continue the recognition of Pasolini’s teachings and of his role as engaged intellectual, not only as acute observer of the society in which he lived, but also as semiologist, writer, and filmmaker, always heretical in all his endeavors. Many directors, reporters, and contemporary writers see in the “inconvenient intellectual” personified by Pasolini in his writings, in his films, and in his interviews, an emblematic figure with whom to institute and maintain a constant dialog, both because of the controversial topics he addressed, which are still relevant today, and because of the ways in which he confronted the power structures. His analytical ability made it impossible for him to believe in the myth of progress; instead, he embraced an ideal that pushed him always to struggle on the firing line of controversy.

Raccontami Una Storia - la Realta Delle Donne

Della Storia Di Genova

La piccola era glaciale e l'inizio della modernità europea (1570-1700)

An uncompromising study of the fictions, the failures, and the real man behind the myth of Magellan. With Straits, celebrated historian Felipe Fernández-Armesto subjects the surviving sources to the most meticulous scrutiny ever, providing a timely and engrossing biography of the real Ferdinand Magellan. The truth that Fernández-Armesto uncovers about Magellan ’ s life, his character, and the events of his ill-fated voyage offers up a stranger, darker, and even more compelling narrative than the fictional version that has been celebrated for half a millennium. Magellan did not attempt—much less accomplish—a journey around the globe. In his lifetime he was abhorred as a traitor, reviled as a tyrant, self-condemned to destruction, and dismissed as a failure. Straits untangles the myths that made Magellan a hero and discloses the reality of the man, probing the passions and tensions that drove him to adventure and drew him to disaster. We see the mutations of his character: pride that became arrogance, daring that became recklessness, determination that became ruthlessness, romanticism that became irresponsibility, and superficial piety that became, in adversity, irrational exaltation. As the real Magellan emerges, so do his real ambitions, focused less on circumnavigating the world or cornering the global spice market than on exploiting Filipino gold. Straits is a study in failure and the paradox of Magellan ’ s career, showing that renown is not always a reflection of merit but often a gift and accident of circumstance.

Biology Pamphlets

Quella che è stata definita la «piccola era glaciale», tra il 1570 e il 1700, vide le temperature abbassarsi con variazioni da tre a cinque gradi, dando avvio a una vera e propria «rivolta della natura» che sortì effetti devastanti sui raccolti. Philipp Blom dimostra la sorprendente correlazione tra questa circostanza e la nascita dell'Illuminismo, analizzando le ricadute culturali dello sconvolgimento climatico in Europa. Con un registro narrativo e appassionante, Blom costruisce un affresco in cui combina storia delle idee, della cultura materiale, delle scienze della natura, intorno a una suggestione di grande attualità: l'impatto che il cambiamento del clima produce sulla vita delle società. Così, l'avvento della piccola era glaciale diventa il punto di partenza per interrogare e mettere in relazione avvenimenti e discipline che concorrono alla formazione del mondo e del pensiero moderno. Attingendo ai racconti di testimoni diretti – tra cui Montaigne e Shakespeare – Blom riesce a proiettare il lettore nella realtà dei secoli XVI-XVII. La descrizione della vita delle comunità nel nuovo scenario ridisegnato dalla natura prende vita grazie alle affascinanti connessioni tra innovazioni nel campo della scienza, dell'economia, della tecnica e fenomeni artistici. Il capovolgimento della prospettiva operato da Blom riguarda infatti anche l'aspetto iconico: se abbiamo sempre guardato ai paesaggi invernali di Avercamp, Bruegel e altri come a rappresentazioni di un mondo in armonia con il susseguirsi delle stagioni, qui diventano ulteriori prove della catastrofe climatica. L'affresco di ghiaccio del lungo inverno europeo si rivela il pretesto per rileggere la storia da una prospettiva inedita.
