Energy projects in Latin America are a major contributor to economic growth worldwide. This book is the first to offer a comprehensive, in-depth analysis of specific issues arising from energy and natural resources contracts and disputes in the region, covering a wide range of procedural, substantive, and socio-legal issues. The book also includes how states have shifted from passive business partners to more active controlling players. The book contains an extensive treatment and examination of the particularities of arbitration practice in Latin America, including arbitrability, public order, enforcement, and the complex public-private nature of energy transactions. Specialists experienced in resolving international energy and natural disputes throughout the region provide detailed analysis of such issues and topics, including: state-owned entities as co-investors or contracting parties; role of environmental law, indigenous rights and public participation;

issues related to political changes, corruption, and quantification of damages; climate change, renewable energy, and the energy transition; force majeure, hardship, and price reopeners; arbitration in the electricity sector; take-or-pay contracts; recognition and enforcement of awards; tension between stabilization clauses and human rights; mediation as a method for dispute settlement in the energy and natural resources sector; and different comparative approaches taken by national courts in key Latin American jurisdictions. The book also delivers a clear explanation on the impact made to the arbitration process by Covid-19, emerging laws, changes of political circumstances, the economic global trends in the oil & gas market, the energy transition, and the rise of new technologies. This invaluable book will be welcomed by in-house lawyers, government officials, as well as academics and rest of the arbitration community involved in international arbitration with particular interest in the energy and natural resources sector. In this book, The leading experts in international commercial arbitration presented their point of view from their respective countries on the present situation of arbitration in Latin America. They reached the conclusion that international commercial

arbitration in Latin American countries is currently in a state of good health, after analyzing: The general ratification of the international arbitration regulatory conventions. The legislative amendments enacted in the different parliaments. The judicial activity in Latin American countries, In which case law, with its inevitable surprises, follows the lines of the best case law in countries familiar with arbitration. The widespread participation on behalf of Latin American companies together with their legal advisors in arbitration proceedings is quite effective, not so much as the defendant party, but in many cases, As aggressive plaintiffs. Many ad hoc arbitrations are being held, but, above all, The statistics from the arbitration administrative institutions demonstrate the importance of arbitration in Latin America. The usage of bi- or multilateral treaties of international public law to protect investments, As a basis for setting up the arbitral proceedings for international private law, confirms the prosperity of arbitral proceedings in Latin America.

Arbitration is the most common mechanism for disputes' settlement in developing countries. Following the move to free market economies, arbitration will play an increasingly fundamental role in

order to protect foreign investors in the Middle East and North African Region (MENA). This book examines the pulse and dynamics of international investment arbitration and the new era of mediation in state contracts in the region. The author explores the harmonization of international arbitration and the sensitive issue of le Contrat Administratif in Middle East civil law countries. The volume also discusses the pivotal role of international organizations such as UNCTAD and ICSID in codifying fair and prompt mechanisms for dispute settlement. Using Latin American countries as a prime example of how international legislative instruments serve international investment law principles and comparing Latin American experiences where appropriate, the book demonstrates how lessons can be learned in respect of alternative dispute resolution, international commercial arbitration and investor-states arbitration. It provides suggestions and recommendations for the future and includes useful appendices detailing recent worldwide trends, regional and international instruments in the arbitration world.

Although negotiation still lies at the heart of international commercial agreements, much of the detail has migrated to the Internet and has become part of electronic commerce. This incomparable one-volume work—now in its sixth edition—with its deeply informed emphasis on both the face-to-face and electronic components of setting up and performing an international commercial agreement, stands alone among contract drafting guides and has proven its enduring worth. Following its established highly practical format, the book's much-appreciated precise information on a wide variety of issues—including those pertaining to intellectual property, alternative dispute resolution, and regional differences—is of course still here in this new edition. There is new and updated material on such matters as the following: • the need for contract drafters to understand and to use the concepts of “standardization” (i.e., the work of the International Organization for Standardization (ISO) as a contract drafting tool); • new developments and technical progress in e-commerce; • new developments in artificial intelligence in contract drafting; • the possible use of electronic currencies such as Bitcoin as a payment device; •

foreign direct investment; • special considerations inherent in drafting licensing agreements; • online dispute resolution including the innovations referred to as the “robot” arbitrator; • changes in the arbitration rules of major international organizations; and • assessment of possible future trends in international commercial arrangements. Each chapter provides numerous references to additional sources, including a large number of websites. Materials from and citations to appropriate literature in languages other than English are also included. In its recognition that a business executive entering into an international commercial transaction is mainly interested in drafting an agreement that satisfies all of the parties and that will be performed as promised, this superb guide will immeasurably assist any lawyer or business executive to plan and carry out individual transactions even when that person is not interested in a full-blown understanding of the entire landscape of international contracts. Business executives who are not lawyers will find that this book gives them the understanding and perspective necessary to work effectively with the legal experts.

The scope and importance of International Commercial Arbitration (ICA) has expanded exponentially in the last few decades and has become the natural and logical method to resolve international business and economic disputes. This collective work captures the development of ICA from different perspectives and uniquely brings together the ideas, suggestions and perspectives of in-house counsel as the most important users of ICA, along with outside counsel, arbitrators themselves, and major arbitration organizations who all help provide the service. Most, if not all, of the contributing authors have served as counsel or arbitrator in arbitrations and have further contributed, through their writings, teachings or activities in arbitral and other institutions, to the evolution of ICA covered by this collective work.

Accordingly, *International Commercial Arbitration Practice: 21st Century Perspectives* is an indispensable tool for the reader-practitioner, arbitrator, academic, magistrate or student—not only to obtain useful general information on ICA practice today but to gain insightful views as to the influence of this institution in the settlement of international commercial disputes in specific economic areas, industries and commercial activities. *International Commercial Arbitration Practice: 21st Century Perspectives* brings the process alive and provides the reader with a useful practice guide whether he or she represents a client participating in an international commercial arbitration, is in-house counsel for a company considering arbitration as a possible method of dispute resolution, or is an arbitrator with cases at hand. The book is organized by Parts which contain thematically related chapters. Part I deals with an overview of key elements in ICA practice and includes chapters on how arbitration is conducted under different legal systems such as common law, civil law, and shari'a law, as well as a chapter on cultural issues in international arbitration. Part II contains geographical regional overviews covering most regions of the world (Western Europe, Russia/NIS countries, Asia (particularly China & Hong Kong and the Indian Subcontinent), Middle East & North Africa, Latin America, the U.S., Canada, and Australia & New Zealand. Part III includes

individual industry sector views of how ICA is conducted in individual industry and business sectors such as oil & gas, LNG, mining, construction, telecommunications, satellite communications, intellectual property, sports, banking & finance, insurance & reinsurance, securities, shipping & maritime, corporate shareholder and bankruptcy settings. These chapters are highly instructive because many of them were written by current or former in-house counsel in these industries or, in some cases, by outside counsel who focus on these industries. Part IV of the book describes recent trends at several major global commercial arbitration institutions such as the ICC, ICDR, LCIA, CPR and WIPO. Part V deals with questions of how technology has been changing ICA practice in recent years, including chapters relating to the use of technology by some major arbitral institutions, videoconferencing in ICA, and online arbitration of internet domain name and e-commerce cases.

and in-depth analysis of the laws of Argentina, Bolivia, Brazil, Chile (including the new law on international commercial arbitration of September 2004), Paraguay, and Uruguay, as well as of the relevant international treaties, such as the MERCOSUR-Agreements of 1998. The book follows the structure of the UNCITRAL-Model Law, which guarantees easy access to the sometimes complicated national laws. The direct topical comparative analysis provides for a deeper insight than mere country reports. Interviews with nearly 100 judges, lawyers, and scholars assure that the practical reality is well reflected in the analysis. A bilingual annex contains the English translations of all relevant legislation.

Arbitration clauses in international commercial contracts are often reused from existing contracts. By so doing, the parties choose to apply, for example, either ad hoc or institutional arbitration and the UNCITRAL, ICC, LCIA, SCC, Swiss or other arbitration rules without necessarily being aware of the consequences. Moreover, parties often assume that an arbitration clause has the effect of excluding any kind of interference from a court of law and of rendering any but the chosen law redundant. This book highlights the specific features of various forms of arbitration and enables lawyers to make informed choices when drafting arbitration clauses. Chapters explain the framework for arbitration, its relationship with national law, and the features of the main arbitration institutions in Europe. The book also highlights new trends in other parts of the world that may have repercussions on the theory of international arbitration.

impact the way arbitration—in both commercial and investment disputes—is practiced. Distinguished international arbitrators and academic experts analyze a wide array of topics, covering a broad spectrum of juristic traditions, geographic areas, foreign investment protection laws, and dispute resolution mechanisms and issues. Topics covered include the following: evolution of the definitions of arbitrable standards; amendments to procedural rules; States' policy choices as reflected in recent investment treaties; procedural trends to restrict access to investment arbitration; the effects of the Achmea decision in the European Union; growing use of the public policy exception; dispute settlement of public-private partnership agreements; and diversification of dispute resolution methods (e.g., business courts). An important feature of the book is the ability it offers to compare various contemporary transformations of dispute settlement mechanisms, with attention to developments in a number of jurisdictions including the United States, the European Union, China, Canada, Switzerland, Turkey, and the Latin American countries. With its comprehensive analysis of how economic nationalism may lead to limiting the jurisdictional, procedural, and substantive scope of arbitration, the authors underscore the crucial importance of a robust system of international arbitration of economic disputes to ensure a stable and secure world order. The global coverage of the contributions and the insightful views offered in them speak eloquently about their usefulness and outreach for arbitration practitioners and scholars, as well as for professionals involved in drafting policies for economic development or in the negotiation

This initial volume collects and thoroughly indexes selected primary documents essential to a full understanding of the adjudications contained in subsequent volumes. It is designed to be a convenient, stand-alone reference valuable in connection with investor-state arbitrations of all kinds. Among the documents compiled are treaties, arbitration rules, and other legal texts relied upon by arbitrators and parties. The work orders the documents in a logical, user-friendly manner, and includes a detailed index and a full bibliography.

comprehensive analysis of the Panama Convention, its implementing legislation in the United States, and United States court decisions construing its provisions. By comparing the Panama and New York Conventions, it identifies important differences, such as the Panama Convention's mandatory application of the Rules of Procedure of the IACAC to ad hoc arbitrations and differences in the Conventions' provisions concerning the grounds for recognition and enforcement of arbitral awards. By comparing Chapter 3 of the Federal Arbitration Act with the other provisions of the federal act, this book exposes problems in the implementing law as well as ways in which Chapter 3 improves on the federal law implementing the New York Convention. Through a critical review of Convention jurisprudence in the United States, it highlights at least three areas in which the courts need to do a much better job: the Convention's field of application application of the IACAC Rules differentiation between the New York and Panama Conventions International Commercial Agreements and Electronic Commerce

aspects of international arbitration in New York. Serving as an essential strategic guide, this book allows practitioners to represent clients more effectively in cases where New York is implicated as either the place of arbitration or evidence or assets are located in New York. Each chapter elucidates a vital topic, including the existing New York legal landscape, drafting considerations for clauses designating New York as the place of arbitration, and material and advice on selecting arbitrators. The book also covers a series of topics at the intersection of arbitral process and the New York courts, including jurisdiction, enforcing arbitration agreements, and obtaining preliminary relief and discovery. Class action arbitration, challenging and enforcing arbitral awards, and biographical materials on New York-based international arbitrators is also included, making this a comprehensive, valuable resource for practitioners.

International Arbitration in the United States is a comprehensive analysis of international arbitration law and practice in the United States (U.S.). Choosing an arbitration seat in the U.S. is a common choice among parties to international commercial agreements or treaties. However, the complexities of arbitrating in a federal system, and the continuing development of U.S. arbitration law and practice, can be daunting to even experienced arbitrators. This book, the first of its kind, provides parties opting for "private justice" with vital judicial reassurance on U.S. courts' highly supportive posture in enforcing awards and its pronounced reluctance to intervene in the arbitral process. With a nationwide treatment describing both the default forum under federal arbitration law and the array of options to which parties may agree in state courts under state international

arbitration statutes, this book covers aspects of U.S. arbitration law and practice as the following: .institutions and institutional rules that practitioners typically use; .ethical considerations; .costs and fees; .provisional measures; and .confidentiality. There are also chapters on arbitration in specialized areas such as class actions, securities, construction, insurance, and intellectual property. This is the first of a regular compilation of arbitration awards in cases administered by the International Centre for Dispute Resolution (ICDR) of the American Arbitration Association. The book features articles and commentaries by many leading figures in international arbitration and summaries of important court decisions concerning ICDR arbitration cases in the United States and enforcement of ICDR awards outside the United States. Featuring over a dozen ICDR awards with commentaries, the ICDR Awards & Commentaries also includes articles and casenotes from a prestigious group of authors.

This book examines the formation, nature and effect of the arbitrators' contract, addressing topics such as the appointment, challenge, removal and duties and rights of arbitrators, disputing parties and arbitration institutions. The arguments made in the book are based on a semi-autonomous theory of the juridical nature of international arbitration and a contractual theory of the legal nature of these relationships.

From these premises, the book analyses the formation of the arbitrator's contract in both ad hoc and institutional references. It also examines the institution's contract with the disputing parties and its effect on the arbitrator's contract under institutional references. The book draws from national arbitration laws and institutional rules in various jurisdictions to give a global view of the issues examined in it. The arbitrator's contract is analysed from a global perspective of arbitral law and practice with insights from various jurisdictions in Africa, Asia, Europe, North and South America. The primary focus of the book is an analysis of the formation of the arbitrator's contract and the terms of this contract and the institution's contract. The primary question of the consequences (if any) of the breaches of the terms of these contracts and its impact on the exclusion or limitation of liability of arbitrators and institutions is also analysed with the conclusion that since these transactions are contractual and the terms can be categorised as in any normal contract, then normal contractual remedies can be applied to the breaches of

these terms. International Commercial Arbitration and the Arbitrator's Contract will be of great value to arbitration practitioners and researchers in arbitration. It will also be very useful to students of arbitration on the topics of arbitrators and arbitration institution.

Different Forms and Their Features

International arbitration has developed into a global system of adjudication, dealing with disputes arising from a variety of legal relationships: between states, between private commercial actors, and between private and public entities. It operates to a large extent according to its own rules and dynamics - a transnational justice system rather independent of domestic and international law. In response to its growing importance and use by disputing parties,

international arbitration has become increasingly institutionalized, professionalized, and judicialized. At the same time, it has gained significance beyond specific disputes and indeed contributes to the shaping of law. Arbitrators have therefore become not only adjudicators, but transnational lawmakers. This has raised concerns over the legitimacy of international arbitration. Practising Virtue looks at international arbitration from the 'inside', with an emphasis on its transnational character. Instead of concentrating on the national and international law governing international arbitration, it focuses on those who practice international arbitration, in order to understand how it actually works, what its sources of authority are, and what demands of legitimacy it must meet. Putting those who practice arbitration into the centre of the system of international arbitration allows us to appreciate the way in which they contribute to the development of the law they apply. This book invites eminent arbitrators to reflect on the actual practice of international arbitration, and its contribution to the transnational justice system. This volume on the UNIDROIT principles of international commercial contracts provides quick access to all case law and legal literature for specific problems, paired with in-depth scholarly analysis.
