

It's Fun To Draw Robots And Aliens (It's Fun To Draw (Paper))

Michael Allred (b. 1962) stands out for his blend of spiritual and philosophical approaches with an art style reminiscent of 1960s era superhero comics, which creates a mixture of both postmodernism and nostalgia. His childhood came during an era where pop art and camp embraced elements of kitsch and pastiche and introduced them into the lexicon of popular culture. Allred's use of both in his work as a cartoonist on his signature comic book Madman in the early 1990s offset the veiled autobiography of his own spiritual journey through Mormonism and struggles with existentialism. Thematically, Allred's work deals heavily with the afterlife as his creations struggle with the grander questions--whether his modern Frankenstein hero Madman, cosmic rock 'n' roller Red Rocket 7, the undead heroine of iZombie (co-created with writer Chris Roberson), or the cast of superhero team book The Atomics. Allred also enjoys a position in the creator-driven generation that informs the current batch of independent cartoonists and has experienced his own brush with a major Hollywood studio's aborted film adaptation of Madman. Allred's other brushes with Hollywood include an independent adaptation of his comic book The G-Men from Hell, an appearance as himself in Kevin Smith's romantic comedy Chasing Amy (where he provided illustrations for a fictitious comic book), the television adaptation of iZombie, and an ongoing relationship with director Robert Rodriguez on a future Madman film. Michael Allred: Conversations features several interviews with the cartoonist from the early days of Madman's success through to his current mainstream work for Marvel Comics. To read them is to not only witness the ever-changing state of the comic book industry, but also to document Allred's growth as a creative genius.

Drawing a horse just standing alone on the page is tricky enough, but with the help of this book you'll not only be able to draw as many as you like, but you'll master the art of horses in action—horses rearing up, kicking out, pulling a plow, running through a field, and so much more. You'll learn how to draw rodeo horses and race horses, military horses and farm horses. With easy step-by-step instructions, kids can learn how to draw:
**A galloping horse
A rolling horse
A dressage horse
A Shetland pony
A pony family
A pony in a stable
And eight more!**
Each spread features a unique horse or pony illustration with unintimidating and easy-to-follow directions. **New lines are always drawn in red** so that kids can see how the drawing builds from step to step. Experiment with markers, crayons, scrap paper, paint, and more! Once little artists grow confident in their horse-drawing abilities, they can use the skills they learn from this book to create their own personal masterpieces! And while you learn how to draw horses, you may even discover a few horse facts you didn't know. Perfect for anyone who has fallen in love with horses and wants to explore their artistic side!

At last, fans of the LEGO BOOST robot building kit have the learning resource they've been missing! Enter The LEGO BOOST Activity Book: a full-color guide that will help readers learn how to build and code LEGO creations that move, explore their environment, grab and lift objects, and more. The LEGO BOOST kit lets younger builders create fun, multifunctional robots by combining bricks with code, but it doesn't come with a manual. With the help of this complete guide to the LEGO BOOST set, you'll be on your way to building and programming BOOST robots in no time. You'll begin your exploration by building a basic rover robot called MARIO to help you learn the fundamentals of the BOOST programming environment. Next, you'll add features to your rover to control its movement and make it repeat actions and react to colors and sounds. Once you've learned some programming basics, you'll learn how to program your robot to do things like follow lines on the ground, scan its environment to decide where to go, and even play darts. As final projects, you'll create two complete robots: BrickPecker to help you organize your bricks and CYBOT, a robot that talks, shoots objects, and executes voice commands. As you advance through the book, optional lessons aim to deepen your understanding of basic robotics concepts. Brain BOOSTer sections let you dig into the math and engineering behind your builds while a host of experiments seek to test your skills and encourage you to do more with your robots. With countless illustrations, extensive explanations, and a wealth of coding examples to guide you, The LEGO BOOST Activity Book is sure to take you from beginning builder to robotics whiz and give your robot-building brain that needed boost!

Budding artists will be delighted by this introductory guide to drawing robots. It includes 14 simple art projects, each presented with illustrated step-by-step instructions. A full-color finished model is also provided for each project for reference, but creativity and imagination is encouraged. Ideal supplements for enhancing STEAM curriculums and for maker spaces projects.

Robot Envy is an online community with thousands of fans and hundreds of artists coming together to celebrate the world's best robot art. It began back in 2012 with a successful kickstarter campaign featuring a specialty sketchbook/package design project created by davpunk. Since then, the Robot Envy network has flourished, promoting a new artist every week for the past 3 years. This "robolution" inspired a second sketchbook titled, "Robot Envy: Reconstruction," which featured brand new sketches and designs from davpunk. Founder Dave Pasciuto (davpunk) said, "We have curated the best robot inspired artwork on the planet. It's time to promote the creators and bring their work to life. This is why we launched Robot Envy: Zenith." Robot Envy: Zenith features a collection of the finest robot artwork in existence. One giant robot book with over 60 incredible robot artists: illustrators and sculptors from around the world. We feature some of the most inspiring artists today--like Jake Parker, Steve Talkowski, Dacosta, Brian Despain, Boris Bakliza, Emerson Tung, Bambino Monkey and Eric Joyner--just to name a very few! The book itself is an impressive 8.5 x 11 (portrait orientation), hardcover, 256 page, full-color art book. The interior pages beautifully display all of the amazing artwork in vivid detail. Hands down, this is coolest art book you can possibly own. So join the Robolution and activate Robot Envy: Zenith today!
