Information professionals have been paying more attention and putting a greater focus on privacy over cybersecurity. However, the number of both cybersecurity and privacy breach incidents are soaring, which indicates that cybersecurity risks are high and growing. Utilizing cybersecurity awareness training in organizations has been an effective tool to promote a cybersecurity-conscious culture, making individuals more cybersecurity-conscious as well. However, it is unknown if

employees' security behavior at work can be extended to their security behavior at home and personal life. On the one hand, information professionals need to inherit their role as data and information gatekeepers to safeguard data and information assets. On the other hand, information professionals can aid in enabling effective information access and dissemination of cybersecurity knowledge to make users conscious about the cybersecurity and privacy risks that are often hidden in the cyber universe. This volume provides theoretical perspectives on and approaches to the development or enhancement of positive psychological capacities within various multi-cultural professional and organizational contexts. Specifically, it presents theoretical frameworks for the identification, development and optimization of positive psychological capacities through a contemporary,

multi-cultural and multi-disciplinary lens. In recent years, the applicability of positive psychological intervention (PPI) techniques has transposed the boundaries of clinical practice into a wide array of complementary domains such as law, education, business and even design sciences such as architecture. These interventions target the enhancement of positive psychological capacities (e.g. strength-identification and use; high-performance learning; appreciative design; job-crafting) in order to not only improve individual functioning, well-being and the treatment of

various forms of psychopathology but also to enhance team functioning/performance, organizational growth and community development. Despite its importance, very little research has been done on the design of PPIs applicable to multi-cultural contexts. The contributions to this volume provide insights into this hitherto neglected area of research.

This text provides the in-depth understanding of the mechanisms that guide coding and reimbursement. The text is meant to be useful to surgeons in practice, both in general

surgery and in surgical subspecialties; practice management teams of surgical practices and to resident physicians in surgery. Part 1 of the text addresses the CPT coding process, the relative valuation system (RVU), the ICD-9 and ICD-10 systems of classification, Medicare Part B payment rules for physicians, the DRG system and Medicare Part A payment for hospitals, alternative payment models, and the myriad of quality measures of importance to surgeons. Part 2 of the text addresses specific coding in areas

where surgeons historically have had the most difficulty. This is not meant to substitute for the available texts, software or courses on coding, but to provide the historical background and rationale for the specific coding rules. Principles of Coding and Reimbursement for Surgeons will be of great value to general surgeons and surgical subspecialists in private practice, academic institutions, and employed positions. It will provide direction to management teams from practice and institutional levels. It is also of

use to surgical trainees and to researchers in health policy issues.

Uncover the artistic masterworks hidden across New York City in this charmingly illustrated exploration of one of the world's greatest creative treasure troves. There's so much to love about New York, and so much to see. The city is full of art, and architecture, and history -- and not just in museums. Hidden in plain sight, in office building lobbies, on street corners, and tucked into Soho lofts, there's a treasure trove of art

waiting to be discovered, and you don't need an art history degree to fall in love with it. Art Hiding in New York is a beautiful, giftable book that explores all of these locations, traversing Manhattan to bring 100 treasures to art lovers and intrepid New York adventurers. Curator and urban explorer Lori Zimmer brings readers along to sites covering the biggest names of the 20th century -- like Jean-Michel Basquiat's studio, iconic Keith Haring murals, the controversial site of Richard Serra's Tilted Arc, Roy Lichtenstein's

subway station commission, and many more. Each entry is accompanied by a beautiful watercolor depiction of the work by artist Maria Krasinski, as well as location information for those itching to see for themselves. With stunning details, perfect for displaying on any art lover's shelf, and curated itineraries for planning your next urban exploration, this inspirational book is a must-read for those who love art, New York, and, of course, both. The Deep State isn't finished trying to destroy

President Donald Trump—they've only just begun. Coup d'Etat blows the lid off the Deep State's efforts to prevent the Trump presidency, disrupt his agenda, and prevent his reelection. In this book you'll learn:

- **The truth behind Robert Mueller's Special Counsel baseless investigation.**
- **The identity of the Trump cabinet member who proposed wearing a wire to take down Trump.**
- **How the FBI entrapped members of the Trump team—and how they unsuccessfully tried the same with Corsi.**
- **How the Democratic**

establishment faked evidence of Russian interference. • The truth behind Julian Assange's arrest, and what the Deep State wants to prevent him from exposing. • How the FBI abused FISA law to spy on Trump—and how they tried to hide it. • Mueller's continued coverup that the media refuses to report. This is the book the Deep State and the media don't want you to read. Social workers are called upon to shift from a human-centric bias to an ecological ethical sensibility by embracing love as integral to

their justice mission and by extending the idea of social justice to include environmental and species justice. This book presents the love ethic model as a way to do eco-justice work using public campaigns, research, community arts practice and other nonviolent, direct action strategies. The model is premised on an active and ongoing commitment to the eco-values of love, eco-justice and nonviolence for the purpose of upholding the public interest. The love ethic model is informed by the stories of eco-

activists who used nonviolent actions to address ecological issues such as: pollution; degradation of the environment; exploitation of farm animals; mining industry overriding First Nation Peoples' land rights; and human health and social costs related to the natural resource industries, private land developments and government infrastructure projects. Informed by practice insights by activists from a range of eco-justice concerns, this innovative book provides new directions in social work and environmental studies

involving transformational change leadership and dialogical group work between interest groups. It should be considered essential reading for social work students, researchers and practitioners as well as eco-activists more generally.

**A Wall Street Journal Bestseller In a world of
unrelenting change and unprecedented
challenges, we need organizations that are**

resilient and daring. Unfortunately, most organizations, overburdened by bureaucracy, are sluggish and timid. In the age of upheaval, top-down power structures and rule-choked management systems are a liability. They crush creativity and stifle initiative. As leaders, employees, investors, and citizens, we deserve better. We need organizations that are bold, entrepreneurial, and as nimble as change itself. Hence this book. In Humanocracy, Gary Hamel and Michele Zanini make a passionate, data-

driven argument for excising bureaucracy and replacing it with something better. Drawing on more than a decade of research and packed with practical examples, Humanocracy lays out a detailed blueprint for creating organizations that are as inspired and ingenious as the human beings inside them. Critical building blocks include: Motivation: Rallying colleagues to the challenge of busting bureaucracy Models: Leveraging the experience of organizations that have profitably challenged the

bureaucratic status quo Mindsets: Escaping the industrial age thinking that frustrates progress Mobilization: Activating a pro-change coalition to hack outmoded management systems and processes Migration: Embedding the principles of humanocracy—ownership, markets, meritocracy, community, openness, experimentation, and paradox—in your organization's DNA If you've finally run out of patience with bureaucratic bullshit . . . If you want to build an organization that can outrun

change . . . If you're committed to giving every team member the chance to learn, grow, and contribute then this book's for you. Whatever your role or title, Humanocracy will show you how to launch an unstoppable movement to equip and empower everyone in your organization to be their best and to do their best. The ultimate prize: an organization that's fit for the future and fit for human beings. Given users' heavy reliance of modern communication technologies such as mobile

and tablet devices, laptops, computers, and social media networks, workplace cyberbullying and online harassment have become escalating problems around the world. Organizations of all sizes and sectors (public and private) may encounter workplace cyberbullying within and outside the boundaries of physical offices. Workplace cyberbullying affects the entire company, as victims suffer from psychological trauma and mental health issues that can lead to anxiety and depression, which, in turn, can cause

absenteeism, job turnover, and retaliation. Thus, businesses must develop effective strategies to prevent and resolve such issues from becoming too large to manage. The Handbook of Research on Cyberbullying and Online Harassment in the Workplace provides in-depth research that explores the theoretical and practical measures of managing bullying behaviors within an organization as well as the intervention strategies that should be employed. The book takes a look at bullying behavior across a

variety of industries, including government and educational institutions, and examines social and legislative issues, policies and legal cases, the impact of online harassment and disruption of business processes and organizational culture, and prevention techniques. Featuring coverage on a broad range of topics such as sexual abuse and trolling, this book is ideally designed for business managers and executives, human resource managers, practitioners, policymakers, academicians, researchers, and

students.

This guide provides healthcare students and professionals with a foundational background on adverse childhood experiences (ACEs) - traumatic early life experiences, which can have a profound impact on health in later life. ACEs can include being a victim of abuse, neglect or exposure to risk in the home or community. How healthcare students and professionals learn to recognize, react and respond to persons affected by trauma will lay the foundation for their relationships with

patients. This book intentionally uses micro-to-macro lenses accompanied by a structural competency framework to elucidate health implications across the lifespan. It explores the nature of adversity and its effects on the physical, emotional, cognitive and social health of individuals, communities and society. The book, written by two experienced psychiatric nurses, will equip healthcare students and professionals with an understanding for critical change in practice and offer action steps designed to

assist them with prevention and intervention approaches and steps to help build resilience. This book will be core reading for healthcare students within mental health, pediatric and primary care nursing courses. It will also be of interest to students and professionals in the social work, psychology and public health fields who are exploring resilience and trauma-informed practices

Tired, disoriented, and confused, Robert East was no match for the wolves when they arrived. Robert East loved his older brother, Tom, but always resented Tom's favored role in the family cattle business based at their San Antonio Viejo ranch near Hebbronville, Texas, just north of the Rio Grande. Tom was a figure to be reckoned with, a cattleman with ambitions to supplant their Uncle Bob Kleberg, head of the enormous King Ranch, as the leading cattle raiser in Texas. Robert, by contrast, was a cowboy who cared little for what occurred beyond the San Antonio Viejo's main gate. Handsome and ornery, with no head for business, he nevertheless chafed in his

brother's shadow until 1984, when Tom died young of a heart attack, just as their father, Tom East, Sr., had 40 years earlier. Suddenly Robert was the new and untested patrón of 250,000 acres of East Family ranchland—and the majority owner of the ocean of natural gas pooled beneath East rangeland. It was his turn to issue the orders. Robert's contentious nature drove the Easts into bitter intra-family legal hostilities that persisted for a decade. He lost his beloved sister, Lica, to cancer, and as old age advanced, he found himself alone and isolated on a remote ranch with only an unreliable foreman and a scattering of vaqueros and other workers for company. The physical wear and tear from decades of working

cattle on horseback began to show. Robert's knees gave out, and he developed serious cardiovascular problems. His doctors prescribed pain pills, sedatives, and medications for his chronic depression. In 2000, drillers hit the most productive gas well in the U.S, if not the world, on East property, making the rich old man suddenly and spectacularly wealthy beyond his comprehension. Soon enough the wolves began to circle, and Robert's grotesque final days were at hand. The advent of the internet and social media were landmarks in furthering communication technologies. Through social media websites, families, friends, and communities could connect in a way never seen. Though

these websites are helpful tools in facilitating positive interaction, they have also allowed users to verbally attack and bully each other with no fear of repercussion. This book examines the relations between Nigeria and South Africa and their implications for regional influence across the African continent. With the largest and third largest economies in the region and a historical status as the major peacemakers on the continent, it is often argued that Africa's fate is directly linked to the success or failure of these regional powers. While there is

widespread reference to each state's capabilities and regional influence in the extant literature, little analysis is offered on relations between Nigeria and South Africa and their impact on regional governance and provision of public goods on the continent. This book attempts to fill the gap by engaging issues such as the hegemonic competence of the states, their credentials for a permanent seat at the UNSC, their efforts towards regional integration, and their efforts towards combating the dark side of globalization including climate change, drug trafficking and xenophobia. It also engages a gender perspective to these states' relations as well as their experiences of transitional justice. Providing an in-depth

Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and

those who work with these groups and provide services to them. Stress related to migration affects migrants and their extended families either directly or indirectly. The process of migration is not just a phase, but leads on to a series of adjustments, including acculturation, which may occur across generations. Factors such as changes in diet, attitudes and beliefs, and overall adjustment are important in settling down and making the individuals feel secure. This period of adjustment will depend upon the individual migrant's pre-migration experiences, migration process and post-migration experiences, but also upon an individual's personality, social support and emotional

response to migration. Socio-demographic factors, such as age, gender, educational, and economic status will all play a role in post-migration adjustment. In order to understand the impact on individuals, not only the type of migration and different stressors, but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored. Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate, the mental health needs of migrants are often ignored by policy makers and clinicians. The Oxford Textbook of Migrant Psychiatry is designed to serve as the

Individual chapters summarise theoretical constructs related to theories of migration, the impact of migration on mental health and adjustment, collective trauma, individual identity and diagnostic fallacies. The book also covers the practical aspects of patient management including cultural factors, ethnopsychopharmacology, therapeutic interaction and therapeutic expectation, and psychotherapy. Finally, the book will examine special

real-world politics as they argue that successful candidates run two campaigns: one for votes, the other for resources. Using campaign finance data, original survey research, and hundreds of interviews with candidates and political insiders, Herrnson and Panagopoulos look at how this dual strategy affects who wins and how it ultimately shapes the entire electoral system. The Eighth Edition considers the impact of the Internet and social media on campaigning in the 2018 elections; the growing influence of interest groups; and the influence of new voting methods on candidate, party, and voter mobilization tactics.

Public Relations, Society and the Generative Power of History examines how histories are used to explore how the past is constructed from the present, how the present is always historical, and how both past and present can power imagined futures. Divided into three distinct parts, the book uses historical inquiry as a springboard for engaging with interdisciplinary, critical and complex issues in the past and present. Part I examines the history of corporate PR, the centrality of the corporation in PR

scholarship and the possibility of resisting corporate hegemony through PR efforts. The theme of Part II is 'Historicising gender, ethnicity and diversity in PR work,' focusing on how gendered and racialised identities have been constructed and resisted both within the profession and through the result of its work. Part III engages with 'Histories of public relations in the political sphere,' bringing together work on the different ways in which public relations has evolved in changing political contexts, both formally as a function within political institutions and in the context of contributions to broader narratives of nationalism and identity. Featuring contributions from leading academics, this book challenges traditional PR historiography and contests the 'lessons' derived from existing literature to address the implications of key areas of critically engaged PR theory.
