An instant New York Times bestseller, this prequel to the acclaimed Cork O'Connor series is "a pitch perfect, richly imagined story that is both an edge-of-your-seat thriller and an evocative, emotionally charged coming-of-age tale" (Kristin Hannah, #1 New York Times bestselling author) about fathers and sons, small-town conflicts, and the events that shape our lives forever. Aurora is a small town nestled in the ancient forest alongside the shores of Minnesota's Iron Lake. In the summer of 1963, it is the whole world to twelve-year-old Cork O'Connor, its rhythms as familiar as his own heartbeat. But when Cork stumbles upon the body of a man he revered hanging from a tree in an abandoned logging camp, it is the first in a series of events that will cause him to question everything he took for granted about his hometown, his family, and himself. Cork's father, Liam O'Connor, is Aurora's sheriff and it is his job to confirm that the man's death was the result of suicide, as all the evidence suggests. In the shadow of his father's official investigation, Cork begins to look for answers on his own. Together, father and son face the

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. “ A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one. ” –Jonathan Yardley, The Washington Post Book World

elected UK mayor. These professionals have achieved astounding and awe-inspiring success. They've won national accolades in competitive fields such as film, theatre, music, fine art, campaigning and politics... and like 1.5 million people in the UK today, they all also happen to have a learning disability. In *Made Possible*, these eight remarkable individuals present their authentic experiences – in their own words – and show us what society misses out on by overlooking them, pitying them, patronising them, simply tolerating them and labelling them in terms of their conditions. Edited by social affairs journalist Saba Salman, this collection of groundbreaking and illuminating essays shatters preconceptions and offers a glimpse of the many types of success that can be achieved by people with a learning disability. Crucially, it reveals how people can make invaluable contributions to society when their potential is acknowledged and supported by those around them.

Relative Justice

An impossible son. An impossible murder. The honeymoon is definitely over. When Emery Hazard and his husband, John-Henry Somerset, arrive home from their honeymoon, they're shocked (understatement of the year) to find a boy waiting for them on their doorstep. Colt, fifteen and eager to pick a fight, claims to be Hazard's son. It's almost a relief, then, for Hazard and Somers to be called out to assist the Dore County Sheriff's Department with what seems to be an impossible murder: a man has been found stabbed to death in a stretch of woods, and the only set of footprints in the soft ground belong to the victim. The more Hazard and Somers learn about the dead man, the more confusing the case becomes. While searching his home, they discover a secure room from which several high-end computers have been stolen. A woman makes a daring theft as the house is being secured and escapes with valuable documents. The dead man's neighbor, who found the body, is obviously lying about how she discovered him. And something very strange is going on with the victim's sons, who are isolated at school and seem to have found their few friends through the youth group at a local church--and in a close relationship with the hip, young, attractive pastor. An attempt on Colt's life leaves Hazard's (possible) son in the hospital. When Hazard and Somers learn that the attack came after Colt tried to investigate the murder on his own, they realize he is now in the killer's crosshairs, and Hazard and Somers must race to uncover the truth. The results from the paternity test aren't back yet, but father or not, Emery Hazard isn't going to let anyone harm a child. Please note that Relative Justice follows The Keeper of Bees; it should not be read as the first Hazard and Somerset book.

debates over 'the politics of mental health'. With contributions from those working in services – including adult mental health, learning disabilities and child and adolescent therapists – the writers consider how contemporary politics devolves responsibility for mental illness onto those suffering distress. The evolving political and social attitudes clients bring to therapy are also addressed in several chapters, and there is a focus on groups in society who have been marginalized and neglected in mental and physical health services. Cognitive Analytic Therapy and the Politics of Mental Health offers a fresh understanding of the contemporary politics of mental health that will be of interest to all therapists and mental health professionals.

In the early hours of 28th July 2016, Colette McCulloch was hit by a lorry and killed on the A1. Eighteen hours earlier she had walked out of the specialist care facility for autistic adults where she was being treated. Here, Andy and Amanda McCulloch tell the story of their daughter's life and untimely death: the years in which her autism went undiagnosed, her lifelong battle with eating disorders and the lack of support for her complex needs. The book is interspersed with Colette's own vivid and eloquent writing, her poetry and prose articulating her experiences grappling with a world forever at odds with her. Colette's story is a call to action and ultimately leaves a message of hope for a future in which autistic people will be better understood and able to flourish.

*An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their lives and homes. And so it began-a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. NEW YORK TIMES BESTSELLER • REESE'S BOOK CLUB PICK • From a leading voice on racial justice, an eye-opening account of growing up Black, Christian, and female that exposes how white America's love affair with "diversity" so often falls short of its ideals. "Austin Channing Brown introduces herself as a master memoirist. This book will break open hearts and minds."—Glennon Doyle, #1 New York Times bestselling author of *Untamed* Austin Channing Brown's first encounter with a racialized America came at age seven, when she discovered her parents named her Austin to deceive future employers into thinking she was a white man. Growing up in majority-white schools and churches, Austin writes, "I had to learn what it means to love blackness," a journey that led to a lifetime spent navigating America's racial divide as a writer, speaker, and expert helping organizations practice genuine inclusion. In a time when nearly every institution (schools, churches, universities, businesses) claims to value diversity in its mission statement, Austin writes in breathtaking detail about her journey to self-worth and the pitfalls that kill our attempts at racial justice. Her stories bear witness to the complexity of America's social fabric—from Black Cleveland neighborhoods to private schools in the middle-class suburbs, from prison walls to the boardrooms at majority-white organizations. For readers who have engaged with America's legacy on race through the writing of Ta-Nehisi Coates and Michael Eric Dyson, *I'm Still Here* is an illuminating look at how white, middle-class, Evangelicalism has participated in an era of rising racial hostility, inviting the reader to confront apathy, recognize God's ongoing work in the world, and discover how blackness—if we let it—can save us all.

system, and its devastating effect on innocent lives After two three-year-old girls were raped and murdered in rural Mississippi, law enforcement pursued and convicted two innocent men: Kennedy Brewer and Levon Brooks. Together they spent a combined thirty years in prison before finally being exonerated in 2008. Meanwhile, the real killer remained free. The Cadaver King and the Country Dentist recounts the story of how the criminal justice system allowed this to happen, and of how two men, Dr. Steven Hayne and Dr. Michael West, built successful careers on the back of that structure. For nearly two decades, Hayne, a medical examiner, performed the vast majority of Mississippi's autopsies, while his friend Dr. West, a local dentist, pitched himself as a forensic jack-of-all-trades. Together they became the go-to experts for prosecutors and helped put countless Mississippians in prison. But then some of those convictions began to fall apart. Here, Radley Balko and Tucker Carrington tell the haunting story of how the courts and Mississippi's death investigation system -- a relic of the Jim Crow era -- failed to deliver justice for its citizens. The authors argue that bad forensics, structural racism, and institutional failures are at fault, raising sobering questions about our ability and willingness to address these crucial issues.

If eugenics -- the science of eliminating kinds of undesirable human beings from the species record -- came to overdetermine the late nineteenth century in relation to disability, the twentieth century may be best characterized as managing the repercussions for variable human populations. *A Cultural History of Disability in the Modern Age* provides an interdisciplinary overview of disability as an outpouring of professional, political, and representational efforts to fix, correct, eliminate, preserve, and even cultivate the value of cripp bodies. This book pursues analyses of disability's deployment as a wellspring for an alternative ethics of living in and alongside the body different while simultaneously considering the varied social and material contexts of devalued human differences from World War I to the present. In short, this volume demonstrates that, in Ozymandias-like ways, the Western Project of the Human with its perpetuation of bodymind hierarchies lies crumbling in the deserts of failed empires, genocidal furies, and the rejuvenating myths of new nation states in the 20th century. An essential resource for researchers, scholars and students of history, literature, culture, philosophy, rehabilitation, technology, and education, *A Cultural History of Disability in the Modern Age* explores such themes and topics as: atypical bodies; mobility impairment; chronic pain and illness; blindness; deafness; speech; learning difficulties; and mental health while wrestling with their status as unreliable predictors of what constitutes undesirable humanity.

What is life like for women with learning disabilities detained in a secure unit? This book presents a unique ethnographic study conducted in a contemporary institution in England. Rebecca Fish takes an interdisciplinary approach, drawing on both the social model of disability and intersectional feminist methodology, to explore the reasons why the women were placed in the unit, as well their experiences of day-to-day life as played out through relationships with staff and other residents. She raises important questions about the purpose of such units and the services they offer. Through making the women's voices heard, this book presents their experiences and unique perspectives on topics such as seclusion, restraint, and resistance. Exploring how the ever present power disparity works to regulate women's behaviour, the book shows how institutional responses replicate women's bad experiences from the past, and how women's responses are seen as pathological. It demonstrates that women are not passive recipients of care, but shape their own identity and futures, sometimes by resisting the norms expected of them (within allowed limits) and sometimes by transgressing the rules. These insights thus challenge traditional institutional accounts of
