

Le Origini Dell'universo

Italia: Civiltà e Cultura offers a comprehensive description of historical and cultural development on the Italian peninsula. This project was developed to provide students and professors with a flexible and easy-to-read reference book about Italian civilization and cultural studies, also appropriate for cinema and Italian literature classes. This text is intended for students pursuing a minor or a major in Italian studies and serves as

an important learning tool with its all-inclusive vision of Italy. Each chapter includes thematic itineraries to promote active class discussion and textual comprehension check-questions to guide students through the reading and understanding of the subject matter. The eighth volume of the International Yearbook of Futurism Studies is again an open issue and presents in its first section new research into the international impact of Futurism on artists and artistic movements in France,

Great Britain, Hungary and Sweden. This is followed by a study that investigates a variety of Futurist inspired developments in architecture, and an essay that demonstrates that the Futurist heritage was far from forgotten after the Second World War. These papers show how a wealth of connections linked Futurism with Archigram, Metabolism, Archizoom and Deconstructivism, as well as the Nuclear Art movement, Spatialism, Environmental Art, Neon Art, Kinetic Art and many other trends of the 1960s and 70s. The second

section focuses on Futurism and Science and contains a number of papers that were first presented at the fifth bi-annual conference of the European Network for Avant-Garde and Modernism Studies (EAM), held on 1-3 June 2016 in Rennes. They investigate the impact of science on Futurist aesthetics and the Futurist quest for a new perception and rational understanding of the world, as well as the movement's connection with the esoteric domain, especially in the field of theosophy, the Hermetic tradition, Gnostic

The Archive section offers a survey of collections and archives in Northern Italy that are concerned with Futurist ceramics, and a report on the Fondazione Primo Conti in Fiesole, established in April 1980 as a museum, library and archive devoted to the documentation of the international avant-garde, and to Italian Futurism in particular. A review section dedicated to exhibitions, conferences and publications is followed by an annual bibliography of

A GREAT MULTIDISCIPLINARY ESSAY IN FEW PAGES. NEW IDEA, USEFULL NOW AND IN THE FUTURE

Come possa la GRAZIA DIVINA avere ispirato a un uomo di oggi l'idea di fare un libro di cruciverba sul tema della religione e del cattolicesimo è veramente un mistero. Eppure, Cristiano ha elaborato con tanta pazienza e cura una piccola opera didattica di

catechesi che si propone di istruire ed evangelizzare grandi e piccini e DIO sa quanto bisogno c'è oggi di nuove proposte concrete per far conoscere alle generazioni di oggi e di domani, in forme anche nuove e creative, il fondamentale e necessario annuncio del VANGELO: DIO c'è! DIO ci ama come un PADRE! Gesù Cristo è il suo FIGLIO eterno! Gesù Cristo è morto in croce per noi, per la nostra salvezza! Gesù Cristo è risorto e vivo ed è apparso agli apostoli!

'Bertoloni Meli reexamines such major texts as Galileo's Dialogues Concerning Two New Sciences, Descartes' Principles of Philosophy, and Newton's Principia, and in them finds a reliance on objects that has escaped proper understanding. From Pappus of Alexandria to Guidobaldo dal Monte, Bertoloni Meli sees significant developments in the history of mechanical experimentation, all of them crucial for understanding Galileo.

A varied and charming collection of 17 papers that bring something new about the people from many countries and backgrounds who traveled to, from and within Egypt and the Near East, either singly or as a group, and explored, observed and recorded, or stayed for a short period of time to improve their health or simply to enjoy the experience. While some travelers kept a diary or journal that has survived until today, others did not. Their travels have to be extracted from the wide range of manuscript sources that are thankfully retained in libraries and archives, or which still remain with their descendants. Sometimes, the name of a traveler is only contained in a few words within a single piece of correspondence or

journal entry, yet from such small beginnings and through detective work to link the chance meetings between travelers with a location, or news of a shared event, it is often possible to chart part of a traveler's journey and bring to life a person who has long been forgotten. These minor characters and their travails often bring a new perspective to well-known places and events.

This issue of CIRPIT REVIEW features the Cirpit Proceedings of three Conferences promoted by

Cirpit Association in the year 2012, in collaboration with public and private institutions, universities and Philosophical Departments (CISRECO - ROMA TRE Univ, SIENA Univ.), which saw the participation of several Italian and foreign scholars of intercultural philosophy and inter-religious dialogue (Giacomo Marramao, Giuliano Boccali, V.Pérez Prieto, S.Gasparetti Landolfi, Giangiorgio Pasqualotto, Franz Martin Wimmer, Joseph Prabhu, Piergiorgio Solinas, Young-chan Ro, Michiko Yusa, Ralph Weber, Marcello Ghilardi, Giorgio Taffon, Augusto Cavadi, Achille Rossi, Giuseppe Cognetti,

Roberta Cappellini). The Review also features contributions by Pietro Barcellona, Jacob Parappally, Gabriele Piana, Gianni Vacchelli, Filippo Dellanoce. The topics discussed regard the actual problems and perspectives of interculturality, pluralism and dialogue, focusing on the many different visions of the world, cultures, philosophies , behaviors, values, and with the problem of peace: the real practical question of human coexistence on the planet .Questo numero della Cirpit Review 4/2013 accoglie gli Atti di tre Convegni promossi dall'Associazione Cirpit, in collaborazione con

alcune istituzioni pubbliche e private, università e dipartimenti filosofici (CISRECO -. Università ROMA TRE, Università di SIENA), che hanno visto la partecipazione di diversi studiosi italiani e stranieri di filosofia interculturale e di dialogo interreligioso (Giacomo Marramao, Giuliano Boccali, V.Pérez Prieto, S.Gasparetti Landolfi, Giangiorgio Pasqualotto, Franz Martin Wimmer, Joseph Prabhu, Piergiorgio Solinas, Young-chan Ro, Michiko Yusa , Ralph Weber, Marcello Ghilardi, Giorgio Taffon, Augusto Cavadi, Achille Rossi, Giuseppe Cognetti, Roberta Cappellini). La rassegna ospita anche i contributi di Pietro

Barcellona, Jacob Parappally, Gabriele Piana, Gianni Vacchelli, Filippo Dellanoce. Gli argomenti trattati riguardano gli attuali problemi e prospettive relative all'interculturalità, al pluralismo e al dialogo e sono incentrati sulle molteplici visioni del mondo, culture, filosofie, comportamenti, valori e sul problema della pace: la vera questione pratica della convivenza umana sul pianeta .

A collection of essays discussing the famed Italian film director, writer, and intellectual. More than thirty years after the tragic death of Pier Paolo Pasolini, this volume is intended to

acknowledge the significance of his living memory. His artistic and cultural production continues to be a fundamental reference point in any discourse on the state of the arts, and on contemporary political events, in Italy and abroad. This collection of essays intends to continue the recognition of Pasolini's teachings and of his role as engaged intellectual, not only as acute observer of the society in which he lived, but also as semiologist, writer, and filmmaker, always heretical in all his endeavors. Many directors, reporters, and contemporary writers see in the "inconvenient intellectual"

personified by Pasolini in his writings, in his films, and in his interviews, an emblematic figure with whom to institute and maintain a constant dialog, both because of the controversial topics he addressed, which are still relevant today, and because of the ways in which he confronted the power structures. His analytical ability made it impossible for him to believe in the myth of progress; instead, he embraced an ideal that pushed him always to struggle on the firing line of controversy.

Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own

celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian

design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.

A Guide to the Bible

In this book the author, by starting from the Einstein's field equation of the General Theory of Relativity, corrects the Schwarzschild solution, and shows that, in

the correct Schwarzschild solution, there is not any event horizon and therefore there is not any black hole. Moreover, the author extends all this to its direct consequences, in particular correcting the Kerr solution, the Reissner-Nordstrøm solution and the Kerr-Newman solution. Then, the author extends these four correct solutions (of Schwarzschild, of Kerr, of Reissner-Nordstrøm and of Kerr-Newman) also to the case in which the cosmological constant is greater than zero. On the other hand, the author, by

starting from the general form of the Einstein's field equation of the General Theory of Relativity, demonstrates also in general the non-existence of any event horizon, and therefore the non-existence of any black hole, in the field of application of the General Theory of Relativity. Finally, the author also explores the consequences of all this on the entropy of the Universe, on the Hawking emission process, on the Big Bang Theory and on the astronomical observations.

Un maiale nello spazio? E in quali pianeti potrebbe vivere? Se lo chiedono George e la sua migliore amica Annie, dopo aver constatato che Freddy, il porcellino regalato dai nonni al ragazzo, è cresciuto troppo per poter stare in giardino.

Intanto, il padre di Annie sta lavorando a un esperimento per scoprire di cosa sia fatto l'Universo e per elaborare, insieme ai suoi colleghi, la Teoria del Tutto, in grado di spiegare ogni fenomeno conosciuto. Ma contro di lui e contro Terence, il padre di George, trama

un'organizzazione segreta, legata alle grandi compagnie petrolifere e intenzionata a sabotare le ricerche sulle fonti di energia pulita. L'unico che può fare qualcosa è il dottor Viktor Ermin, ma George e Annie devono raggiungerlo in un'altra galassia! Hawking ci racconta, con la voce sicura e semplice di un grande genio, un viaggio incredibile alle origini della materia, dove le stelle sembrano uguali, ma i sistemi solari distano milioni di anni luce; dove nubi di gas e di materia oscura si alternano a folle di

pianeti e asteroidi; dove ogni cosa si è formata nello stesso modo e segue le stesse leggi; e dove, a causa di impercettibili fluttuazioni, ogni cosa è sempre diversa.

«Potrei dimostrare non come gli uomini pensano nei miti, ma come i miti operano nelle menti degli uomini senza

che loro siano informati di questo fatto». Questa frase di Claude Lévi-Strauss è la perfetta sintesi dell'analisi sviluppata in questo libro. Ma oltre a questa peculiarità del mito, viene qui tentata la riunione delle menti libere e degli artisti che, secondo l'autore, sono fra coloro in grado di contrastare il potere dei miti. Una chiamata a raccolta concreta, perché in appendice al volume ci sono proposte operative a cui è possibile partecipare, se ci si è convinti - leggendo il libro - dell'importanza di esserci. The nature of 'fascism' has been hotly contested by scholars since the term was first coined by Mussolini in

1919. However, for the first time since Italian fascism appeared there is now a significant degree of consensus amongst scholars about how to approach the generic term, namely as a revolutionary form of ultra-nationalism. Seen from this perspective, all forms of fascism have three common features: anticonservatism, a myth of ethnic or national renewal and a conception of a nation in crisis. This collection includes articles that show this new consensus, which is inevitably contested, as well as making available material which relates to aspects of fascism independently of any sort of consensus and also covering fascism of the inter and post-war periods. This is

Fascism: Fascism and culture

In this book, the author, by taking into account also the contribution of the gravitational potential energy to the

determination of the gravitational masses of the particles in a gravitational field (contrary to the erroneous common use), finds that for the particles with rest mass greater than zero there is always an escape velocity (less than the velocity of light in vacuum c) from any gravitational field and that the particles with rest mass equal to zero are always free to go away from any gravitational field. Consequently, there is not any event horizon, and therefore there is not any black hole. Moreover, the author also shows that the presence of an event horizon would imply the violation of the principle of conservation of energy. In particular, all this is confirmed also by the symmetry with respect to time of the Einstein's field equation of the General Theory of Relativity and by the correct solutions of this same equation. Consequently, this

book can be useful also for explaining in a linear way the possibility of the Big Bang and the possibility of a cyclic universe. Finally, the experimental results are compatible so far with this book.

Come, quando e perché è nato il cosmo? Qual è l'origine del tempo e dello spazio? Come possiamo definire il 'nulla' primordiale? Fino a dove la scienza può risalire alle cause e ai fattori che determinano la realtà? Sono quesiti intorno ai quali si interrogano senza sosta da molti decenni i cosmologi moderni.
