Annika's hands slid into Charlee's coppery curls and drew her lips close. For a long moment they hovered there as their gazes danced together. Then Annika pressed her mouth softly against Charlee's, drinking

in its sweetness, slowly at first, then more urgently. Annika supported her as they slowly slid to their knees, their lips never parting. They knelt there in the sand, hands hungrily exploring each other's body. Charlee tentatively ran both hands along Annika's spine, thrilling in the feel of the tremble she created with her touch. Hungrily Annika pulled down the zipper of Charlee's jacket, surprised to find the other woman wore nothing underneath it. Sucking in a deep breath, she let her eyes drink in the sight of Charlee's bare melon-sized breasts. Soon Annika was using both hands to worship Charlee's breasts, lifting and molding the big boobs, pressing them together. Charlee threw her head back arching her spine as

This book intertwines academic and activist voices to engage with more than three decades of lesbian activism in the Yugoslav space. The empirically rich contributions uncover a range of lesbian initiatives and the fundamental, but rarely acknowledged, role that lesbian alliances have played in articulating a feminist response to the upsurge of nationalism, widespread violence against women, and high levels of lesbophobia and homophobia in all of the post-Yugoslav states. By offering a distinctly intergenerational and transnational perspective, this

collection does not only shed new light on a severely marginalised group of people, but constitutes a pioneering effort in accounting for the intricacies – solidarities, joys, and tensions – of lesbian activist organising in a post-conflict and post-socialist environment. With a plethora of authorial standpoints and innovative methodological approaches, the volume challenges the systematic absence of (post-)Yugoslav lesbian activist enterprises from recent social science scholarship. Lesbian Activism in the (Post-)Yugoslav Space will be of interest to students and scholars across a range of disciplines, including gender studies, history, politics, anthropology, and sociology.

Examining more than a dozen films from Jewish artists, this book reveals how the postmodern impulse to turn the lens inward intersects provocatively with historical tropes and stereotypes of the Jew. It focuses on Jewish filmmakers working on the margins and examines the work of Jonathan Caouette, Chantal Akerman and many more. First published in 1993, the award-winning *Cherry Grove, Fire Island* tells the story of the extraordinary gay and lesbian resort community near New York City. This new paperback edition includes a new preface by the author.

Rabbis: The First Generation documents a monumental change in Jewish life as eighteen lesbian rabbis reflect their experiences as trailblazers in Judaism's journey in an increasingly multicultural world. In frank and revealing essays, the contributors discuss their decision to become rabbis and describe their experiences both at the seminaries and in their rabbinical positions. They also reflect on the dilemma whether to conceal or reveal their sexual identities to their congregants and superiors, or to serve specifically gay and lesbian congregations. The contributors consider the tensions between lesbian identity and Jewish identity, and inquire whether there

The unseen issues of grief and discrimination—lesbians becoming widows The death of a life partner poses unique challenges for lesbians. Lesbian Widows: Invisible Grief reveals the touching and very personal stories of twenty-five women, including the author, who were widowed at a young age and forced to create a new life without their life partners. The book follows the widows from the time the couple met, to the time when one of the partners died and beyond, to show how the surviving partner coped with her loss. Many lesbians feel that the intimacy felt between

two women in love goes deeper than what can be experienced by heterosexual partners. Lesbian Widows Invisible Grief reveals themes common to all these women's experiences while offering practical advice about coping techniques and resources for support. The widows discuss their efforts to create funerals and memorial services, give their accounts of the overwhelming grief throughout the first two years, and explain the legal and financial discrimination they encountered. The author provides a chapter specifically for caring family and friends, another chapter for professionals working with this sensitive population, and

The thinly disguised story of Hall's own life, it was banned outright upon publication and almost ruined her literary career as the subject was that of an obscenity trial and forbidden at the time in England. The novel tells the story of Stephen, an ideal child of aristocratic parents—a fencer, a horse rider and a keen scholar. Stephen grows to be a war hero, a

As her ambitions drive her, and society incarcerates her, Stephen is forced into desperate actions. Although Gordon's attitude toward her own sexuality is anguished, the novel presents lesbianism as natural and makes a plea for greater tolerance. It became an international bestseller, and for decades was the single most famous lesbian novel. Cherry Grove, Fire Island

What is lesbian beauty? Lesbians, Levis, and Lipstick: The Meaning of Beauty in Our Lives explores the many definitions

of beauty among lesbians by discussing the norms they create and follow. In addition, it questions how these standards are influenced by heterosexual concepts of beauty. Here you'll find essays, poems, and research papers from women who describe some of the freeing and restrictive aspects of lesbian beauty. Lesbians, Levis, and Lipstick: The Meaning of Beauty in Our Lives examines the way lesbians define and explore the notion of beauty. Through moving, personal stories and well-represented research, this book leads the reader on a path of exploration about beauty norms and the way they liberate and confine lesbians. This sometimes humorous book is an in-depth and insightful examination of beauty practices and how lesbians use them as an expression of style and image and as a means of

Feminism, the Family, and the Politics of the Closet is about

placing sexual orientation politics within feminist theorizing. It is also about defining the central political issues confronting lesbians and gay men. The book brings the study of lesbians from the margins of feminist theory to the center by critiquing the analytic frameworks employed within feminist theory that renders invisible lesbians' difference from heterosexual women. This book also outlines the basic features of lesbian and gay subordination by exploring the differences between heterosexual dominance and gender and race relations. Throughout, Calhoun aims to re-center lesbian and gay politics away from concerns with sexual regulations and toward concern with the displacement of gays and lesbians from the public sphere of visible citizenship and from the private sphere of romance, marriage, and family.

Women's health, as a field of study, is a developing discipline. Health theories in general have been based on studies of men. However, in recent years, more attention

has shifted to women's health, realizing the disparities between men and women in relation to their health. During the last two decades, a similar shift has occurred for a group of women--lesbian women--to further identify and specify their health needs. Over the past decade, lesbians have organized to call for attention to the health issues of this community, resulting in several federally funded research initiatives. This book offers a comprehensive view of what is known about lesbian health needs and what questions need further investigation, including: How do we define who is lesbian? Are there unique health issues for lesbians? Are lesbians at higher or lower risk for such

with the introduction of Western biological and medical sciences to the region. The nexus of gender and health is a compelling theme, for this is an area in which private lives and personal characteristics encounter the interventions of public policies. The nine empirically based studies by scholars of history of medicine, sociology, anthropology, and STS (science, technology, and society), spanning Japan, Korea, China, Taiwan, and Hong Kong from the 1870s to the present, demonstrate just how tightly concerns with gender and health have been woven into the enterprise of modernization and nation-

building throughout the long twentieth century. The concepts of “gender” and “health” have become so commonly used that one might overlook that they are actually complicated notions with vexed histories even in their native contexts. Transposing such terminologies into another historical or geographical dimension is fraught with problems, and what makes the East Asian cases in this volume particularly illuminating is that they present concepts of gender and health in motion. The studies show how individuals and societies made sense of modern scientific discourses on diseases, body, sex, and

The authors argue that there is little support for assuming that homosexuality has a biological basis. Recognizing the many pathways that lead to same-gender sexual orientation, the authors conclude that the cause is much less important than understanding the meaning of being homosexual.

Why do some religious institutions decline in the face of racial integration whilst others grow? How do congregations deal with economic distress? This study of congregations in the face of community transformation includes stories of over 20 congregations in nine communities across America.

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a

distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors,

health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers. This pioneering collection of essays explores some of the many and varied ways that women might use a particular idea of being lesbian to invent themselves, to understand how they are connected in the world, and to imagine

Marc Stein's *City of Sisterly and Brotherly Loves* is refreshing for at least two reasons: it centers on a city that is not generally associated with a vibrant gay and lesbian culture, and it shows that a community was forming long before the Stonewall

rebellion. In this lively and well received book, Marc Stein brings to life the neighborhood bars and clubs where people gathered and the political issues that rallied the community. He reminds us that Philadelphians were leaders in the national gay and lesbian movement and, in doing so, suggests that New York and San Francisco have for too long obscured the contributions of other cities to gay culture.

Created around the world and available only on the Web, internet “television” series are independently produced, mostly low budget shows that often

feature talented but unknown performers. Typically financed through crowd-funding, they are filmed with borrowed equipment and volunteer casts and crews, and viewers find them through word of mouth or by chance. The third of five volumes on Internet TV series, this book covers 335 alphabetically arranged gay and lesbian programs, 1996–2014, giving casts, credits, story lines, episode descriptions, websites, dates and commentary. A complete index lists program titles and headings for gay, lesbian, bisexual, transgender and drag queen shows.

Lesbian Women and Sexual Health: The Social Construction of Risk and Susceptibility examines how lesbian women perceive their level of risk for HIV and other sexually transmitted infections (STIs). It describes how their perceptions of risk and susceptibility are shaped by factors such as sexual identity, cultural themes, and community knowledge

- and how those perceptions impact on the very real HIV/STI risks that lesbian women face. The genesis of *Lesbian Women and Sexual Health: The Social Construction of Risk and Susceptibility* lies in Kathleen Dolan's exploratory study of this under-researched area, in which 162 structured interviews and 70 in-depth interviews were conducted with women who self-identify as lesbians. What these women have to say will inform, educate, and probably surprise you. Tables and figures make complex data easy to access and understand. Lesbian women construct and label their identities

and actions in complex ways that may lead to risky behavior. In the words of the women surveyed—and in Dr. Dolan’s insightful commentary—this book explores the ways in which lesbian women construct their perceptions of risk and susceptibility to seek answers to questions that include: Do many lesbian women see themselves, to an extent, as immune to HIV contraction? How does their self-constructed sense of risk and susceptibility lead to making dangerous choices? Why, in spite of their professed willingness to engage in protective actions, do many lesbians not actually do so? Why do many lesbian

women, and some of the health care professionals who serve them, feel that pap smears are not necessary for women who have sex only with other women—and what are the consequences of this opinion? What is the relationship between drug/alcohol use and risky sexual behaviors in lesbian women? *Lesbian Women and Sexual Health: The Social Construction of Risk and Susceptibility* is an important resource for women's/lesbian health advocates, health care professionals, and courses in gay/women's/medical studies. It addresses gaps in the existing research to enhance our understanding

of the physical and mental health status of lesbian women, of risk factors and protective actions regarding HIV and STIs, and of the conditions for which protective actions actually reduce risk.
