A Vogue Best Book of the Year "What Ferrante did for female friends--exploring the tumult and complexity their relationships could hold--Spiegelman sets out to do for mothers and daughters. She's essentially written My Brilliant Mom." --Slate A memoir of mothers and daughters--and mothers as daughters--traced through four generations, from Paris to New York and back again. For a long time, Nadja Spiegelman believed her mother was a fairy. More than her famous father, Maus creator Art Spiegelman, and even more than most mothers, hers--French-born New Yorker art director Françoise Mouly--exerted a force over reality that was both dazzling and daunting. As Nadja's body changed and "began to whisper to the adults around me in a language I did not understand," their relationship grew tense. Unwittingly, they were replaying a drama from her mother's past, a drama Nadja sensed but had never been told. Then, after college, her mother suddenly opened up to her. Françoise recounted her turbulent adolescence caught between a volatile mother and a playboy father, one of the first plastic surgeons in France. The weight of the difficult stories she told her daughter shifted the balance between them. It had taken an ocean to allow Françoise the distance to become her own person. At about the same age, Nadja made the journey in reverse, moving to Paris determined to get to know the woman her mother

*had fled. Her grandmother's memories contradicted her mother's at nearly every turn, but beneath them lay a difficult history of her own. Nadja emerged with a deeper understanding of how each generation reshapes the past in order to forge ahead, their narratives both weapon and defense, eternally in conflict. Every reader will recognize herself and her family in *I'm Supposed to Protect You From All This*, a gorgeous and heartbreaking memoir that helps us to see why sometimes those who love us best hurt us most.*

A damsel to the rescue!

What if destiny leads you to your soul mate, but the laws of time conspire to keep you apart? If her parents had never divorced, Laura wouldn't have to live in the shadow of Bruce, her mom's unpredictable boyfriend. Her mom wouldn't say things like "Be groovy," and Laura wouldn't panic every weekend on the way to Dad's Manhattan apartment. But when Laura spots a boy on a facing platform, lifting a camera to his face, looking right at her, Laura feels anything but afraid, and she can't forget him. Jonas, meanwhile, thinks nonstop about the pretty hippie girl he glimpsed on the platform — trying to comprehend how she vanished, but mostly wondering whether he will see her again in a city of millions — and whether if he searches, he would have any chance of finding her. In a lyrical meditation on love, Nora Raleigh Baskin explores the soul's ability to connect, and heal, outside the bounds of time and reason.

children's classic featuring a business-savvy mouse, a kind alley cat, and a talented country cricket, featuring a new foreword and revisions by YA author Stacey Lee. Tucker is a streetwise city mouse. He thought he'd seen it all. But he's never met a cricket before, which really isn't surprising, because, along with his friend Harry Cat, Tucker lives in the very heart of New York City—the Times Square subway station. Chester Cricket never intended to leave his Connecticut meadow. He'd be there still if he hadn't followed the entrancing aroma of liverwurst right into someone's picnic basket. Now, like any tourist in the city, he wants to look around. And he could not have found two better guides—and friends—than Tucker and Harry. The trio have many adventures—from taking in the sights and sounds of Broadway to escaping a smoky fire. Chester makes a third friend, too. It is a boy, Mario, who rescues Chester from a dusty corner of the subway station and brings him to live in the safety of his parents' newsstand. He hopes at first to keep Chester as a pet, but Mario soon

understands that the cricket is more than that. Because Chester has a hidden talent and no one—not even Chester himself—realizes that the little country cricket may just be able to teach even the toughest New Yorkers a thing or two. The Cricket in Times Square is George Selden at his best, and the new illustrations and interior images by Garth Williams make this edition a special treat.

subway stations, and the NYC skyline to create a love letter to the city. A groundbreaking work of information design, the subway map, designed by Massimo Vignelli, is an iconic work used by over a billion people every year. The Museum of Modern Art acquired the original 1972 diagram, along with the 1970 graphics standards manual Vignelli created for signage and station information, in 2004. The map is intimately tied to MoMA's history, as it was a MoMA curator, Mildred Constantine, who recommended that New York City's Metropolitan Transit Authority commission the map from the Italian designer. "

Bruce Davidson's groundbreaking *Subway*, first published by Aperture in 1986, has garnered critical acclaim both as a documentation of a unique moment in the cultural fabric of New York City and for its phenomenal use of extremes of color and shadow set against flash-lit skin. In Davidson's own words, "the people in the subway, their flesh juxtaposed against the graffiti, the penetrating effect of the strobe light itself, and even the hollow darkness of the tunnels, inspired an aesthetic that goes unnoticed by passengers who are trapped underground, hiding behind masks and closed off from each other." In this third edition of what is now a classic of photographic literature, a sequence of 118 (including 25 previously unpublished) images transport the viewer through a landscape at times menacing, and at other times lyrical and soulful. The images present the full gamut of New Yorkers, from weary straphangers and languorous ladies in summer dresses to stalking predators and homeless persons. Davidson's accompanying text tells the story behind the images, clarifying his method and dramatizing his obsession with the subway, its rhythms and its particular madness. Bruce Davidson (born 1933) is considered one of America's most influential documentary photographers. He began taking photographs when he was ten, and studied at the Rochester

Institute of Technology and the Yale University School of Design. In 1958 he became a member of Magnum Photos, and in 1962 he received a Guggenheim Fellowship to document the civil rights movement. After a solo exhibition at The Museum of Modern Art in 1963, Davidson spent two years photographing in Harlem, resulting in the book *East 100th Street*. In 1980, after living in New York City for 23 years, Davidson began *Subway*, his startling color essay of urban life.

For decades, Philip Ashforth Coppola has meticulously documented the New York City subway in a series of extraordinary drawings, detailing the terracotta mosaics, faience, and tile patterns that millions of

riders pass by every day. Coppola's drawings are what Hyperallergic calls "the most encyclopedic history of the art and architecture of the New York City subway system." Along with Coppola's intricate ink drawings are anecdotes he assembled through painstaking research involving hundreds of hours poring through microfilms to discover the names behind the artisanship of what is rightly called New York's largest public art work—its legendary subway system. Never was there a subway car who loved her job more than Jessie. From morning to night she carried all sorts of people all sorts of places—to work and school and World's Fairs, over bridges and through tunnels—sometimes she even took a pigeon along for the ride! But as time passed, sleek new silver cars began to take over the tracks, banishing Jessie to an abandoned lot. What will she do with no passengers to carry? And where will she go now that she's no longer welcome on the tracks? Based on the true story of 1960's-era subway cars that are now being used to create artificial reefs in the Atlantic, this stunningly illustrated second book from Julia Sarcone-Roach is sure to delight scuba diving historians and kids alike.

Pearl “Polly” Adler (1900-1962) was a diminutive dynamo whose Manhattan brothels in the Roaring Twenties became places not just for men to have the company of women but were key gathering places where the culturati and celebrity elite mingled with high society and with violent figures of the underworld—and had a good time doing it. As a Jewish immigrant from eastern Europe, Polly Adler’s life is a classic American story of success and assimilation that starts like a novel by Henry Roth and then turns into a glittering real-life tale straight out of F. Scott Fitzgerald. She declared her ambition to be “the best goddam madam in all America” and succeeded wildly. Debby Applegate uses Polly’s story as the key to unpacking just what made the 1920s the appallingly corrupt yet glamorous and transformational era that it was and how the collision between high and low is the unique ingredient that fuels American culture.

New Yorkers and tourists alike have been fascinated, amused, amazed, repelled and bewildered by the world-within-a-world that lies beneath the city. Now, in Subwayland, as the subway celebrates its centennial anniversary, creator of The New York Times's award-winning "Tunnel Vision" column Randy Kennedy leads us on an extended tour of this storied subterranean land, revealing: * Its inhabitants: the Tango Man, the traveling magician, Mayor Bloomberg * Its wildlife: the subway-riding pigeons, the Fulton Street cat, the blind mules * Its customs, taboos and secret histories: door blocking, leg spreading, pole hugging, even, yes, token sucking * Its government: the sheriff of Grand Central, the Ethel Merman of the shuttle, the motorman who drove the last No. 1 train beneath the World Trade Center on September 11, 2001 * Tips for the first-time traveler: how to get a seat, how to get a date, the fine art of "pre-walking"

In the summer of 1854, the Brooklyn City Railroad opened four separate streetcar lines. The lines were introduced here several years before they were brought to larger cities, such as Baltimore, Boston, and Philadelphia, demonstrating the city's modernization and ingenuity. From its first introduction, Brooklyn had one of the nation's largest urban transit systems. With the advent of streetcars, the population in Brooklyn grew from about 139,000 to over 2.5 million by the time streetcars were retired. The street railway blended mobility with innovation, prompting one-third of New York City's population to call Brooklyn home.

A fascinating journey into the past—and under the ground—that offers “an insightful look at the what-might-have-beens of urban mass transit” (The New York Times). From the day it broke ground by City Hall in 1900, it took about four and half years to build New York’s first subway line to West 145th Street in Harlem. Things

rarely went that quickly ever again. *The Routes Not Taken* explores the often-dramatic stories behind unbuilt or unfinished subway lines. The city's efforts to expand its underground labyrinth were often met with unexpected obstacles—financial shortfalls, clashing political agendas, battles with community groups, and more. After discovering a copy of the 1929 subway expansion map, Joseph B. Raskin began his own investigation into the city's underbelly. Here he provides an extensively researched history of the Big Apple's unfinished business. *The Routes Not Taken* sheds light on: *the efforts to expand the Hudson Tubes into a full-fledged subway *the Flushing line, and why it never made it past Flushing *a platform under Brooklyn's Nevins Street station unused for more than a century *the 2nd Avenue line—long the symbol of dashed dreams—deferred countless times since the original plans were presented in 1929 Raskin reveals the personalities involved, explaining why Fiorello H. La Guardia couldn't grasp the importance of subway lines and why Robert Moses found them old and boring. By focusing on unbuilt lines, he illustrates how the existing system is actually a Herculean feat of countless compromises. Filled with illustrations, this is an enduring contribution to the history of transportation and the history of New York City.

Nicknamed the International Express, the New York City Transit Authority 7 subway line runs through a highly diverse series of ethnic and immigrant neighborhoods in Queens. People from Andean South America, Central America, China, India, Italy, Korea, Mexico, Pakistan, Poland, Romania, and Vietnam, as well as residents of a number of gentrifying blue-collar and industrial neighborhoods, fill the busy streets around the stations. The 7 train is a microcosm of a specifically urban, New York experience, in which individuals from a variety of cultures and social classes are forced to interact and get along with one another. For newcomers to the city, mastery of life in the subway space is a step toward assimilation into their new home. In *International Express*, the

French ethnographer Stéphane Tonnelat and his collaborator William Kornblum, a native New Yorker, ride the 7 subway line to better understand the intricacies of this phenomenon. They also ask a group of students with immigrant backgrounds to keep diaries of their daily rides on the 7 train. What develops over time, they find, is a set of shared subway competences leading to a practical cosmopolitanism among riders, including immigrants and their children, that changes their personal values and attitudes toward others in small, subtle ways. This growing civility helps newcomers feel at home in an alien city and builds what the authors call a "situational community in transit." Yet riding the subway can be problematic, especially for women and teenagers. Tonnelat and Kornblum pay particular attention to gender and age relations on the 7 train. Their portrait of integrated mass transit, including a discussion of the relationship between urban density and diversity, is invaluable for social scientists and urban planners eager to enhance the cooperative experience of city living for immigrants and ease the process of cultural transition.

Coney Island is an iconic symbol of turn-of-the-century New York—but many other amusement parks have thrilled the residents of the five boroughs. Strategically placed at the end of trolley lines, railways, public beaches, and waterways, these playgrounds for the rich and poor alike first appeared in 1767. From humble beginnings, they developed into huge sites like Fort George, Manhattan's massive amusement complex. Each park was influenced by the culture and eclectic tastes of its owners and patrons—from the wooden coasters at Staten Island's Midland Beach to beer gardens on Queens' North Beach and fireworks blasting from the Bronx's Starlight Park. As real estate became more valuable, these parks disappeared. With this historical tour, you can rediscover the thrills of the past from the lost amusement parks of New York City.

Revised and updated edition with foreword by Stacey Lee Madam

How New York City subway signage evolved from a “visual mess” to a uniform system with Helvetica triumphant. For years the signs in the New York City subway system were a bewildering hodge-podge of lettering styles, sizes, shapes, materials, colors, and messages. The original mosaics (dating from as early as 1904), displaying a variety of serif and sans serif letters and decorative elements, were supplemented by signs in terracotta cut stone. Over the years, enamel signs identifying stations and warning riders not to spit, smoke, or cross the tracks were added to the mix. Efforts to untangle this visual mess began in the mid-1960s, when the city transit authority hired the design firm Unimark International to create a clear and consistent sign system. We can see the results today in the white-on-black signs throughout the subway system, displaying station names, directions, and instructions in crisp Helvetica. This book tells the story of how typographic order triumphed over chaos. The process didn't go smoothly or quickly. At one point New York Times architecture writer Paul Goldberger declared that the signs were so confusing one almost wished that they weren't there at all. Legend has it that Helvetica came in and vanquished the competition.
