Matrimonio In Dimora D'epoca: Flop O Favola

When Benito Mussolini proclaimed that "Cinema is the strongest weapon," he was telling only half the story. In reality, very few feature films during the Fascist period can be labeled as propaganda. Re-viewing Fascism considers the many films that failed as "weapons" in creating cultural consensus and instead came to reflect the complexities and contradictions of Fascist culture. The volume also examines the connection

between cinema of the Fascist period and neorealism—ties that many scholars previously had denied in an attempt to view Fascism as an unfortunate deviation in Italian history. The postwar directors Luchino Visconti, Roberto Rossellini, and Vittorio de Sica all had important roots in the Fascist era, as did the Venice Film Festival. While government censorship loomed over Italian filmmaking, it did not prevent frank depictions of sexuality and representations of men and women that challenged official gender policies. Re-viewing Fascism brings together scholars from different cultural and

disciplinary backgrounds as it offers an engaging and innovative look into Italian cinema, Fascist culture, and society.

Collected from LaBossiere's regular column in The Philosopher's Magazine, this fascinating set of philosophical provocations assumes no background in philosophy and focuses on matters that are of popular interest to the general public, yet are also philosophically significant.

The Spy Museum, the Vacuum Cleaner Museum, the National Mustard Museum—not to mention the Art Institute, the Museum of Modern Art, and the Getty Center: museums

have never been more robust, curating just about everything there is and assuming a new prominence in public life. The Return of Curiosity explores museums in the modern age, offering a fresh perspective on some of our most important cultural institutions and the vital function they serve as stewards of human and natural history. Reflecting on art galleries, science and history institutions, and collections all around the world, Nicholas Thomas argues that, in times marked by incredible insecurity and turbulence, museums help us sustain and enrich society. Moreover, they stimulate us

to think in new ways about our world, compelling our curiosity and showing us the importance of understanding one another. Thomas looks at museums not simply as storehouses of old things but as the products of meaningful relationships between curators, the public, history, and culture. These relationships, he shows, don't always go smoothly, but they do always offer new insights into the many ways we value—and try to preserve—the world we live in. The result is a refreshing and hopeful look at museums as a cultural force, one that, by gathering together paintings, tropical birds,

In From Grain to Pixel, Giovanna Fossati analyzes the transition from analog to digital film and its profound effects on filmmaking and film archiving. Reflecting on the theoretical conceptualization of the medium itself, Fossati poses significant questions about the status of physical film and the practice of its archival preservation, restoration, and presentation. From Grain to Pixel attempts to bridge the fields of film archiving and academic research by addressing the discourse

on film's ontology and analyzing how different interpretations of what film is affect the role and practices of film archives. By proposing a novel theorization of film archival practice, Fossati aims to stimulate a renewed dialogue between film scholars and film archivists. Almost a decade after its first publication, this revised edition covers the latest developments in the field. Besides a new general introduction, a new conclusion, and extensive updates to each chapter, a novel theoretical framework and an additional case study have been included. An introduction to linear time playing. The first section contains basic exercises for linear playing skills: voice coordination, dynamic

The first English translation of the book that established Paolo Virno as one of the most influential Italian thinkers of his generation. With the 1986 publication of this book in Italy, Paolo

Virno established himself as one of the most influential Italian thinkers of his generation. Astonishingly, this crucial work has never before been published in an English translation. This MIT Press edition, translated by Italian philosopher and Insubordinations series editor Lorenzo Chiesa, is its first English-language version. Virno here engages, in an innovative and iconoclastic way, with some classical issues of philosophy involving experience, singularity, and

the relation between ethics and language, while also offering a profoundly transformative political perspective that revolves around the Marxian notion of the "general intellect." Virno reconsiders Walter Benjamin's idea of a "loss of the aura" (brought on, Benjamin argued, by technical reproducibility), and postulates instead the existence of a new experience of uniqueness that, although deprived of every metaphysical aura, resides in the very process of late-capitalist serial

reproduction. Writing after the defeat of contemporary leftist revolutionary movements in the West, Virno argues for the possibility of a "good life" originating immanently from existential and political crises. Taking speculative detours through the thought of philosophers ranging from Aquinas and Berkeley to Heidegger and Wittgenstein, with a specific focus on Kant and Hegel, Virno shows how a renewed reflection on basic theoretical problems helps us to better grasp what is

happening now. This edition features a preface written by Virno in 2011.

Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the

life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20.000 books, the

Paterno Library, to the Casa Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

of people, including the Israelites' escape from slavery, the wanderings of Moses and his followers and the Ten Commandments given to Moses on Mount Sinai. The text is introduced by author David Grossman. The Elect Nation is the first comprehensive study of the religious, political and cultural movement inspired by Savonarola. Based on a thorough examination of the archival material and manuscript sources, the book argues that the followers of Savonarola exercised a profound

influence on every facet of Florentine life during the important period of the city's transition from republic to principate. It is the author's contention that their ideology and activities provide the key to understanding not only the Florentine Republic, but also the nature of contemporary political debate and the characteristics of the emerging Medicean Principate. A major preoccupation of the book is to show how the Savonarolans as a group managed to survive the

execution of their leaders and to regain their strength and influence. The author traces their networks of support and analyses the way in which they infiltrated and restructured existing Florentine institutions to their advantage. He also reveals how they exploited spiritual counselling and lay and religious patronage to expand their influence and, in particular, how they ensured the survival of their movement by forming an anti-Medicean alliance of republican forces in Florence.

Published in 1950, his first novel was acclaimed by Gore Vidal as "splendidly written, precise, short, complete, and fine." It is the story of a wealthy, fiftyish American widow recently a famous stage beauty, but now "drifting." The novel opens soon after her husband's death and her retirement from the theatre, as Mrs. Stone tries to adjust to her aimless new life in Rome. She is adjusting, too, to aging. ("The knowledge that her beauty was lost had come upon her recently and it was still occasionally forgotten.") With poignant wit and his own particular brand of relish, Williams charts her drift into an affair with a cruel

The extraordinary life and death-defying work of one of the most important and pioneering performance artists in contemporary art. When Marina Abramović Dies examines the extraordinary life and death-defying work of one of the most pioneering artists of her generation—and one who is still at the forefront of contemporary art today. In one of many long-duration performances in the renewed solo career that followed, Abramović famously lived in a New York gallery for twelve days without eating or speaking, nourished only by prolonged eye contact with audience members. It was here, in 2002, that author James Westcott first encountered her, beginning an exceptionally close relation between biographer and subject. When Marina Abramović Dies draws on Westcott's personal observations of Abramović, his
