Ask any mother and she will tell you there are just not enough hours in the day. By the time she has fed, clothed, and bathed the children, read Curious George for the 100th time, cut the crusts off the PB&J sandwiches, and removed the ground-in dirt from the play clothes, she does not have time to create a detailed scrapbook of each of her children's lives. It's no wonder that so many elaborate baby books remain incomplete, their pristine pages adding to the guilt and inadequacy that many moms already feel.That is why The Mommy Journal is so perfect for today's moms. It offers a quick and guilt-free way to record the special moments of childhood. Space for each entry is only about three inches long and undated, so there is no pressure to write lengthy narratives or to journal every day. In less than five minutes, mothers can quickly jot down the moments they want to remember forever. Plus, unlike traditional baby books, The Mommy Journal lets mothers record memories of all their children in one place.Charming illustrations of toys, hearts, and animals grace each page. Every few pages contain a bit of parenting wisdom such as, "The best thing you can give children next to good habits are good memories." Instructions for fun activities moms can do with their children, such as make edible finger paint from instant pudding, are included as well.The Mommy Journal will become a treasured keepsake, both for the mom who creates it and for the child who receives this precious record of childhood.

The best gift for a mother is to share her story & prepare her children to thrive in life - and that is what you'll get with this journal! This is a journal with prompts that will guide a mother to write about her memories and life stories. And loving, remarkable, funny memories and stories of overcoming challenges can be real treasures, serve as inspiration and even become lessons to our loved ones when they need it! Remember the first time you carried your children? And the first time you baked a cake together? And when he / she fell and you helped them to feel better? And remember when you were a child and your mother taught you so many things that you would also like to teach your child? Our life is full of moments that deserve to be shared and this journal was designed to help with just that. It contains the following sections: Important Facts and Events of your Life - share about family origins, and memories from childhood to becoming a mom Your Special Recommendations for your Child - recommend your favorite book, movie, place to visit, recipe, financial advice, key causes for your child to engage in and more... Selected Memories & Stories Pages - share your top 25 memories and stories - eg. you may talk about your wedding, pregnancy, time living abroad, the experience in different places where you worked, and more! How to use this journal Fill any page that you would like, in any of the sections, at any time, until you complete the journal or until you feel that you, momma, shared your most important memories. Then give it (back) as a treasured gift to your child! Sharing memories and stories with your children can be wonderful for you and for them, do you know why? Your child will realize that your story and the story of your ancestors relates to their own; Writing helps organize the "shelves" of our mind and puts events in perspective, on a timeline; Writing also makes you re-live happy moments, feel the joy once again; and it sometimes helps "heal" from past events, too; Your child's understanding of the past helps them to accept themselves as they are, learn that their roots impact the way they are, Capturing your memories on paper will bring you joyful & funny memories that will now make your child laugh! With this journal, you will give your child an opportunity to learn about his/her family's history, an inspiration to live happy moments the way you did, and examples of strength that will help them overcome life's obstacles and challenges. Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Now updated! The new edition of this best-selling guide uses science to tackle some of the most important decisions facing new parents—from sleep training and vaccinations to breastfeeding and baby food. Is cosleeping safe? How important is breastfeeding? Are food allergies preventable? Should we be worried about the aluminum in vaccines? Searching for answers to these tough parenting questions can yield a deluge of conflicting advice. In this revised and expanded edition of The Science of Mom, Alice Callahan, a science writer whose work appears in the New York Times and the Washington Post, recognizes that families must make their own decisions and gives parents the tools to evaluate the evidence for themselves. Sharing the latest scientific research on raising healthy babies, she covers topics like the microbiome, attachment, vaccine safety, pacifiers, allergies, increasing breast milk production, and choosing an infant formula.

Stories for My Child (Guided Journal)

After hand-lettering a book of quotes as a baby shower gift for her friend Joanna Goddard (of the popular lifestyle blog, Cup of Jo), Samantha Hahn was inspired to create an illustrated gift book and companion keepsake journal for other mothers to personalise. Stories for My Child features prompts for capturing the spectacular and quotidian moments of raising a child, along with thoughtfully selected quotes from contemporary and literary sources. Designed with Hahn's ethereal watercolors and chic hand lettering, the journal represents a sophisticated take on the parenting keepsake, and a treasure to pass along when the child grows up. Stories for My Child will have the same trim and a complementary design to Samantha Hahn's quote book (both available Spring '16)--making them a wonderful gift set for Mother's Day or baby showers.

Looking at and listening to picture and story books is a ubiquitous activity, frequently enjoyed by many young children and their parents. Well before children can read for themselves they are able to learn from books. Looking at and listening to books increases children's general knowledge, understanding about the world and promotes language acquisition. This collection of papers demonstrates the breadth of information pre-reading children learn from books and increases our understanding of the social and cognitive mechanisms that support this learning. Our hope is that this Research Topic/eBook will be useful for researchers as well as educational practitioners and parents who are interested in optimizing children's learning.

"In this ode to hardworking mommies everywhere, they may not always be fun or neat, but their toddlers love them no matter what"--
