Tactile Strategies for Children who Have Visual Impairments and Multiple Disabilities

Young children who are visually impaired and have additional disabilities need to learn to use their sense of touch effectively to promote their growth, development, and ability to communicate. This manual provides teachers, early interventionists, and parents with critical information

about alternative communication methods not based on the use of vision as well as countless practical strategies. Topics include assessing a child's skills, planning interventions, and selecting appropriate tactile strategies to meet the child's needs.

Piggie can't wait to go and play in the sunshine. But will a rainy day ruin all the fun? Told entirely in speech bubbles with a repetitive use of familiar phrases, this original book encourages children who are just learning to read.

In an era characterized by the rapid evolution of the concept of literacy, the Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts focuses on multiple ways in which learners gain access to knowledge and skills. The handbook explores the possibilities of broadening current conceptualizations of literacy to include the full array of the communicative arts (reading, writing, speaking, listening, viewing) and to focus on the visual arts of drama, dance, film, art, video, and computer technology. The communicative and visual arts encompass

everything from novels and theatrical performances to movies and video games. In today's world, new methods for transmitting information have been developed that include music, graphics, sound effects, smells, and animations. While these methods have been used by television shows and multimedia products, they often represent an unexplored resource in the field of education. By broadening our uses of these media, formats, and genres, a greater number of students will be motivated to see themselves as learners. In 64 chapters, organized in seven sections, teachers and other leading authorities in the field of literacy provide direction for the future: I. Theoretical Bases for Communicative and Visual Arts Teaching Paul Messaris, Section Editor II. Methods of Inquiry in Communicative and Visual Arts Teaching Donna Alvermann, Section Editor III. Research on Language Learners in Families, Communities, and Classrooms Vicki Chou, Section Editor IV. Research on Language Teachers: Conditions and Contexts Dorothy Strickland, Section Editor V. Expanding Instructional

Environments: Teaching, Learning, and Assessing the Communicative and Visual Arts Nancy Roser, Section Editor VI. Research Perspectives on the Curricular, Extracurricular, and Policy Perspectives James Squire, Section Editor VII. Voices from the Field Bernice Cullinan and Lee Galda, Section Editors The International Reading Association has compiled in the Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts an indispensable set of papers for educators that will enable them to conceptualize literacy in much broader contexts than ever before. The information contained in this volume will be extremely useful in planning literacy programs for our students for today and tomorrow. Help children draw and think more creatively by inspiring them with interesting and challenging art prompts and questions. Invitation to Draw offers 99 open-ended drawing prompts, each one proposing a question to investigate that encourages children to free associate and problem solve. The perforated pages make it easy to tear out prompts for on-the-

go activities or allowing multiple kids to draw at the same time. A blank cake provides the chance to decorate a dream confection, an empty house inspires stories about who lives there, and a grid of triangles supplies the chance to explore abstract art. What might be hiding in that tree? What sort of robot can you design? The possibilities are endless! Drawing prompts inspire and encourage kids to think and draw differently, and sometimes more creatively, than they might when faced with a blank page. By offering constraints such as a pair of eyes or an empty car and asking a question, children begin thinking about the possibilities and answering the question in their heads even before they put pen (or marker or crayon!) to paper. And through the act of drawing and observing the drawing unfold, the brain continues to think and problem solve, opening up all kinds of creative possibilities around that specific idea.

The name "Suzanne Perron" is synonymous with exquisite detail. Her expertly tailored gowns -- worn at the elaborate balls of Mardi Gras and down the aisle at New Orleans weddings -- draw from the legacy of couture design. After years working alongside Vera Wang, Carolina Herrera, Anna Sui, and Ralph Rucci in New York, Louisiana native Perron returned home in 2005 to open her own custom design business, specializing in once-in-a-lifetime gowns for brides, debutantes, and Mardi Gras royalty. Designing in Ivory and White captures the rise of this talented designer, from her first Singer sewing machine to her success on Seventh Avenue to her post-Katrina move to a city in need of "something beautiful," as well as her design technique and meticulous craft. In addition to her personal story, Perron shares her process from the inside out, including: methods for creating crinolines and foundations; using draping and pattern making to transform a sketch into a three-dimensional form; manipulating fabric into pleats, pintucks, and folds; and hand sewing intricate beading, lace, embroidery, and flawless hems. Her techniques and breathtaking artistry are realized through a showcase of sixteen Suzanne Perron

designs. Full-length and detail shots illustrate Perron's gorgeous silhouettes and masterful handwork. Each gown also has a story that illuminates the client experience from the first sketch to the final fitting. Designing in Ivory and White serves as a testament to the ambition and skill required to design unique dresses, and will provide inspiration for independent designers, sewing hobbyists, and all who admire couture fashion.
