RetributionAge Of Expansion - A Kurtherian Gambit Series

Twelve scholars of piracy show why pirates thrived in the New World seas of seventeenth- and eighteenth-century empires, how pirates operated their plundering ventures, how governments battled piracy, and when and why piracy declined.

This essay examines the primacy of worldbuilding in the age of CGI, transmedia practices and "high concept" fiction by studying the principles that govern the creation of a multiverse in a wide range of film and TV productions. Emphasis is placed on Hollywood sci-fi movies and their on-screen representation of imaginary machines that mirror the film medium, following in the tradition of Philip K. Dick's writings and the cyberpunk culture. A typology of worlds is established, as well as a number of analytical tools for assessing the impact of the coexistence of two or more worlds on the narrative structure, the style (uses of color, editing practices), the generic affiliation (or hybridity), the seriality and the discourse produced by a given film (particularly in fictions linked to post-9/11 fantasies). Among the various titles examined, the reader is offered a detailed analysis of the Resident Evil film series, Total Recall and its remake, Dark City, the Matrix trilogy, Avatar, Source Code and other time-loop films, TRON and its sequel, Christopher Nolan's Tenet, and several TV shows – most notably HBO's Westworld, but also Sliders, Lost, Fringe

How did it feel to hear Macbeth's witches chant of "double, double toil and trouble" at a time when magic and witchcraft were as real as anything science had to offer? How were justice and forgiveness understood by the audience who first watched King Lear; how were love and romance viewed by those who first saw Romeo and Juliet? In England in the Age of Shakespeare, Jeremy Black takes readers on a tour of life in the streets, homes, farms, churches, and palaces of the Bard's era. Panning from play to audience and back again, Black shows how Shakespeare's plays would have been experienced and interpreted by those who paid to see them. From the dangers of travel to the indignities of everyday life in teeming London, Black explores the jokes, political and economic references, and small asides that Shakespeare's audiences would have recognized. These moments of recognition often reflected the audience's own experiences of what it was to, as Hamlet says, "grunt and sweat under a weary life." Black's clear and sweeping approach seeks to reclaim Shakespeare from the ivory tower and make the plays' histories more accessible to the public for whom the plays were always intended.

Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander ’ s unforgettable argument that “ we have not ended racial caste in America; we have merely redesigned it. ” As the Birmingham News proclaimed, it is “ undoubtedly the most important book published in this century about the U.S. ” Now, ten years after it was first published, The New Press is proud to

In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem.

Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean. The contributions in this volume offer a comprehensive analysis of transitional justice from 1945 to the present. They focus on retribution against the leaders and agents of the autocratic regime preceding the democratic transition, and on reparation to its victims. Part I contains general theoretical discussions of retribution and reparation. The essays in Part II survey transitional justice in the wake of World War II, covering Austria, Belgium, Denmark, France, Germany, Hungary, the Netherlands, and Norway. In Part III, the contributors discuss more recent transitions in Argentina, Chile, Eastern Europe, the former German Democratic Republic, and South Africa, including a chapter on the reparation of injustice in some of these transitions. The editor provides a general introduction, brief introductions to each part, and a conclusion that looks beyond regime transitions to broader issues of rectifying historical injustice.

resourceful, and tragic man of history. Christopher Columbus and the Age of Exploration for Kids takes a comprehensive, nuanced, and inclusive approach to Columbus, placing him in the context of the explorations that came before, during, and after his lifetime and portraying the “ Admiral of the Ocean Seas ” neither as hero nor heel but as a flawed and complex man whose significance is undeniably monumental. Providing kids, parents, and teachers with a fuller picture of the seafaring life and the dangers and thrills of exploration, the book details all four of Columbus ’ s voyages to the New World, not just his first, and describes the year that Columbus spent stranded on the island of Jamaica without hope of rescue. A full chapter is devoted to painting a more complex portrait of the indigenous peoples of the New World and another to the consequences of Columbus ’ s voyages—the exchange of diseases, ideas, crops, and populations between the New World and the Old. Engaging crosscurricular activities such as taking nautical measurements, simulating a hurricane, making an ancient globe, and conducting silent trade elucidate both nautical concepts introduced and the times in which Columbus lived. *When is it fair to hold young people criminally responsible? If young people lack the capacity to make a meaningful choice and to control their impulses, should they be held criminally culpable for their behaviour? In what ways is the immaturity of young offenders relevant to their blameworthiness? Should youth offending behaviour be proscribed by criminal law? These are just some of the questions asked in this thoughtful and provocative book. In The Moral Foundations of the Youth Justice System, Raymond Arthur explores international and historical evidence on how societies regulate criminal behaviour by young people, and undertakes a careful examination of the developmental capacities and processes that are relevant to young people's criminal choices. He argues that the youth justice response needs to be reconceptualised in a context where one of the central objectives of institutions regulating children and young people's behaviour is to support the interests and welfare of those children. This timely book advocates a revolutionary transformation of the structure and process of contemporary youth justice law: a synthesised and integrated approach that is clearly distinct from that used for dealing with adults. This book is a key resource for students, academics and practitioners across fields including criminal law, youth justice, probation and social work.*

With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the

American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

During a period dominated by the biological determinism of Cesare Lombroso, Italy constructed a new prison system that sought to reconcile criminology with nation building and new definitions of citizenship. Italian Prisons in the Age of Positivism, 1861-1914

examines this "second wave" of global prison reform between Italian Unification and World War I, providing fascinating insights into the relationship between changing modes of punishment and the development of the modern Italian state. Mary Gibson focuses on the correlation between the birth of the prison and the establishment of a liberal government, showing how rehabilitation through work in humanitarian conditions played a key role in the development of a new secular national identity. She also highlights the importance of age and gender for constructing a nuanced chronology of the birth of the prison, demonstrating that whilst imprisonment emerged first as a punishment for women and children, they were often denied "negative" rights, such as equality in penal law and the right to a secular form of punishment. Employing a wealth of hitherto neglected primary sources, such as yearly prison statistics, this cutting-edge study also provides glimpses into the everyday life of inmates in both the new capital of Rome and the nation as a whole. Italian Prisons in the Age of Positivism, 1861-1914 is a vital study for understanding the birth of the prison in modern Italy and beyond.

As space ventures have become more numerous, leading scientists and theorists have offered ways of building a living habitat in a hostile environment, taking an 'ecosystems' view of space colonization. The contributors to this volume take a radical multi-disciplinary view of the challenge of human space colonization through the ongoing project Persephone. This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life-promoting. Readers will learn the details of the plans for Persephone — a real project that is part of the company Icarus

Interstellar 's plans for the design and engineering of a living interior on a worldship to be constructed in Earth 's orbit within 100 years. Although the timeframe itself is only an estimate, since it is contingent on many significant developments, including funding and technological advances, the industry consensus is that within 100 years we will see manned space exploration beyond our solar system. This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA-funded 100-year starship project. This book specifically develops the principles for the construction of a living habitat within a worldship — a multi-generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light. Far from being a sterile industrial setup, such as the ISS, or even being a bucolic suburbia as proposed by Gerard O ' Neill in the 1970s, this worldship will provide the pre-conditions for sustaining life beyond Earth 's environment, which may also lead to the evolution of non-terrestrial ecologies. Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction, this book proposes first designing the soils of such a space. It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle - perhaps in spreading life throughout the universe. Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds. Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles.

Geoffrey P. Miller argues that the narratives from Genesis to Second Kings present a sophisticated argument for political obligation and for limited monarchy as the best form of government. The Hebrew Bible, in this sense, can be considered as one of the earliest political philosophies of the western world. The Garden of Eden story identifies revelation, consent, utopia, natural law, ownership, power, patriarchy, and justice as bases for political obligation. The stories of life after the

## Bookmark File PDF Retribution: Age Of Expansion A Kurtherian Gambit Series (The Ascension Myth Book 6)

expulsion from Eden argue that government and law are essential for a decent life. The Genesis narratives recognize patriarchal authority but also identifies limits based on kinship, higher authority and power. The book of Exodus introduces the topic of political authority, arguing that nationhood strictly dominates over other forms of political organization. The Sinai narratives explore two important sources of authority: revelation and consent of the governed. The book of Joshua presents a theory of sovereignty conceived of as the exclusive and absolute control over territory. The book of Judges examines two types of national government: military rule and confederacy. It argues that military rule is inappropriate for peacetime conditions and that the confederate form is not strong enough to deliver the benefits of nationhood. The books of Samuel and Kings consider theocracy and monarchy. The bible endorses monarchy as the best available form of government provided that the king is constrained by appropriate checks and balances. Contrary to the view of some scholars, no text from Genesis to Second Kings disapproves of monarchy as a form of government.

This four-part work describes and analyses democracy and despotism in tribes, city-states, and nation states. The theoretical framework used in this work combines Weberian, Aristotelian, evolutionary anthropological, and feminist theories in a comparative-historical context. The dual nature of humans, as both an animal and a consciously aware being, underpins the analysis presented. Part One covers tribes. It uses anthropological literature to describe the “campfire

democracy” of the African Bushmen, the Pygmies, and other band societies. Its main focus is on the tribal democracy of the Cheyenne, Iroquois, Huron, and other tribes, and it pays special attention to the role of women in tribal democracies. Part Two describes the city-states of Mesopotamia, Syria, and Canaan-Phoenicia, and includes a section on the theocracy of the Jews. This part focuses on the transition from tribal democracy to city-state democracy in the ancient Middle East – from the Sumerian city-states to the Phoenician. Part Three focuses on the origins of democracy and covers Greece—Mycenaean, Dorian, and the Golden Age. It presents a detailed description of the tribal democracy of Archaic Greece – emphasizing the causal effect of the hoplite-phalanx military formation in egalitarianizing Greek tribal society. Next, it analyses the transition from tribal to city-state democracy—with the new commercial classes engendering the oligarchic and democratic conflicts described by Plato and Aristotle. Part Four describes the Norse tribes as they contacted Rome, the rise of kingships, the renaissance of the city-states, and the parliamentary monarchies of the emerging nation-states. It provides details of the rise of commercial city states in Renaissance Italy, Hanseatic Germany and the Netherlands.

Bringing the study of early modern Christianity into dialogue with Atlantic history, this collection provides a *longue durée* investigation of women and religion within a transatlantic context. Taking as its starting point the work of Natalie Zemon Davis on the effects of confessional difference among women in the age of religious reformations, the volume expands the focus to broader temporal and geographic boundaries. The result is a series of essays examining the effects of religious

reform and revival among women in the wider Atlantic world of Europe, the Americas, and West Africa from 1550 to 1850. Taken collectively, the essays in this volume chart the extended impact of confessional divergence on women over time and space, and uncover a web of transatlantic religious interaction that significantly enriches our understanding of the unfolding of the Atlantic World. Divided into three sections, the volume begins with an exploration of 'Old World Reforms' looking afresh at the impact of confessional change in the sixteenth and seventeenth centuries upon the lives of European women. Part two takes this forward, tracing the adaptation of European religious forms within Africa and the Americas. The third and final section explores the multifarious faces of the revival that inspired the nineteenth century missionary movement on both sides of the Atlantic. Collectively the essays underline the extent to which the development of the Atlantic World created a space within which an unprecedented series of juxtapositions, collisions, and collusions among religious traditions and practitioners took place. These demonstrate how the religious history of Europe, the Americas, and Africa became intertwined earlier and more deeply than much scholarship suggests, and highlight the dynamic nature of transatlantic cross-fertilization and influence.

After decades of stability from the 1920s to the early 1970s, the rate of imprisonment in the United States has increased fivefold during the last four decades. The U.S. penal population of 2.2 million adults is by far the largest in the world. Just under one-quarter of the world's prisoners are held in American prisons. The U.S. rate of incarceration, with nearly 1 out of every 100 adults in prison or jail, is 5 to 10

## Bookmark File PDF Retribution: Age Of Expansion A Kurtherian Gambit Series (The Ascension Myth Book 6)

times higher than the rates in Western Europe and other democracies. The U.S. prison population is largely drawn from the most disadvantaged part of the nation's population: mostly men under age 40, disproportionately minority, and poorly educated. Prisoners often carry additional deficits of drug and alcohol addictions, mental and physical illnesses, and lack of work preparation or experience. The growth of incarceration in the United States during four decades has prompted numerous critiques and a growing body of scientific knowledge about what prompted the rise and what its consequences have been for the people imprisoned, their families and communities, and for U.S. society. The Growth of Incarceration in the United States examines research and analysis of the dramatic rise of incarceration rates and its affects. This study makes the case that the United States has gone far past the point where the numbers of people in prison can be justified by social benefits and has reached a level where these high rates of incarceration themselves constitute a source of injustice and social harm. The Growth of Incarceration in the United States examines policy changes that created an increasingly punitive political climate and offers specific policy advice in sentencing policy, prison policy, and social policy. The report also identifies important research questions that must be answered to provide a firmer basis for policy. This report is a call for change in the way society views criminals, punishment, and prison. This landmark study assesses the evidence and its implications for public policy to inform an extensive and thoughtful public debate about and reconsideration of policies.

**transformed from one simply opposing war to one proclaiming the importance of social, political, and economic equality. The editors' premise is that the peace movement historically has been a collective attempt by numerous well-intentioned people to improve American society. The book illuminates the ways in which peace activists were often connected to larger reform movements in American history, including those that fought for the rights of working people, for women's equality, and for the abolition of slavery, to name just a few. With a focus on those who spoke out for peace, this docutext is designed to call to students' attention one of the least discussed classroom subjects in American education today. Students in secondary school Social Studies and American history classes as well as those taking college level courses in U.S. history, American Studies, or Peace Studies will find this work an excellent supplementary reader.**
