

Sharks (Science For Toddlers)

Sharks swam in the sea long before dinosaurs roamed the earth. Today there are more than five hundred kinds of sharks in the world. They range in size from the tiny dwarf shark to the huge whale shark. Some of them have thousands of teeth. And some sharks even glow in the dark! In SHARKS!, TIME For Kids® takes you under the seas to discover the exciting world of these super fish.

Sharks Sterling Children's Books

Learn about sharks with everyone's favorite Cat in the Hat! The Cat in the Hat dives deep in this fascinating exploration of the world of sharks. Learn about the different types of sharks, how we study them, and why they aren't so scary after all. Perfect for kids who love sharks and Dr. Seuss alike, and for any kid who loves learning and science. The Cat in the Hat's Learning Library is a nonfiction, unjacketed hardcover series that introduces beginning readers ages 5-8 to important basic concepts. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library titles explore a range of topics about the world we live in and include an index, glossary, and suggestions for further reading. "Pretty much all the stuff you need to know is in Dr. Seuss." –President Barack Obama

"In Everything Sharks, exciting photos depict great whites, hammerheads, and more. Scientists tell hair-raising tales about encounters. With its awesome facts and action-packed images, this book brings kids close to the mysterious lives of sharks."--Amazon.com.

Facts about Bullsharks for children are interesting, but how do they compare to the scary creatures we sometimes see on the news? If you're looking for a fun way to educate your children about the dangers of sharks, this book is the perfect solution. This book will explain the anatomy and behavior of this dangerous animal, and let them know why they are so feared. It's also a great way to encourage your child to become interested in science.

Matter: Physical Science for Kids from the Picture Book Science series gets kids excited about science! What's the matter?

Everything is matter! Everything you can touch and hold is made up of matter—including you, your dog, and this book! Matter is stuff that you can weigh and that takes up space, which means pretty much everything in the world is made of matter. In Matter: Physical Science for Kids, kids ages 5 to 8 explore the definition of matter and the different states of matter, plus the stuff in our world that isn't matter, such as sound and light! In this nonfiction picture book, children are introduced to physical science through detailed illustrations paired with a compelling narrative that uses fun language to convey familiar examples of real-world science connections. By recognizing the basic physics concept of matter and identifying the different ways matter appears in real life, kids develop a fundamental understanding of physical science and are impressed with the idea that science is a constant part of our lives and not limited to classrooms and laboratories. Simple vocabulary, detailed illustrations, easy science experiments, and a glossary all support exciting learning for kids ages 5 to 8. Perfect for beginner readers or as a read aloud nonfiction picture book! Part of a set of four books in a series called Picture Book Science that tackles different kinds of physical science (waves, forces, energy, and matter), Matter offers beautiful pictures and simple observations and explanations. Quick STEM activities such as weighing two balloons to test if air is matter help readers cross the bridge from conceptual to experiential learning and provide a foundation of knowledge that will prove invaluable as kids progress in their science education. Perfect for children who love to ask, "Why?" about the world around them, Matter satisfies curiosity while encouraging continual student-led learning.

Forest Biome

The youngest astronomers can go forth and journey into outer space in this fun, basic introduction to the solar system. The unique format presents our sun and each planet in order with graduated flaps turn each flap to reveal fascinating facts on each celestial body, and even the Milky Way!"

"From sunlit surface water that teems with life to the deepest, darkest depths filled with some of Earth's most unusual creatures, oceans are home to a wide array of life. Peel back the corners of the ocean to find out what fascinating life exists within this ecosystem, from Earth's biggest animal, the blue whale, to tiny organisms, such as kelp. Discover where the world's oceans are and what you can do to help protect our planet's rich waters."--

Down at the bottom of the deep, dark sea, something big, mean and terribly greedy is stirring. . . It's the shark in the dark! The poor fish in the sea live in fear of the nasty shark. They don't want to be his dinner! Just as the shark is closing in, the fish meet a clever squid, who hatches a plan to teach the shark a lesson once and for all. It involves a shadowy head, a shadowy tail, and a huge amount of teamwork! Can the flustered fish pull it off? The Shark in the Dark is a tremendously funny book written by Peter Bently and illustrated by Ben Cort - with a biting twist!

One lonely shark learns about love; and something simply amazing about herself! Sharks can do so many cool things! And a girl shark living in the darkest waters of the deep, blue sea knows this. But why can't she capture the attention of the one she "loves?" In Shark in Love, kids will learn many amazing facts about sharks and at the same time they will come to understand that loving yourself should always come first. Shark in Love is the second book in the Learn and Love series, a collection of books about misunderstood animals and life skills for children. Want more? Look for the first book in the series, "Bo the Bat," a book about the importance of not prejudging others and about bats!

An in-depth guide to sharks includes information on where they live, how they eat, the challenges they face, and whether or not certain species pose a danger to humans.

A healthy ocean is home to many different kinds of animals. They can be big, like a whale, tiny, like a shrimp, and even scary, like a shark. Even though sharks can be scary, we need them to keep the oceans healthy. Unfortunately, due to overfishing, many shark species are in danger of extinction, and that can cause big problems in the oceans and even on land. What would happen if this continued and sharks disappeared completely? Artist Lily Williams explores how the disappearance would affect other animals across the whole planet in this clever book about the importance of keeping sharks, and our oceans, healthy.

Introduces youngsters to the many things that encompass the study of science, such as stars, planets, rocks, and soil, using accessible text and bright illustrations.
