

### Solar System For Kids : The Sun And Moon: Universe For Kids (Children's Astronomy Space Books)

The **Solar System** is an incredible neighborhood centered around one very important star called the **Sun**. Discover the many amazing objects that call the Solar System home! In this simple Solar System book for kindergarten and first grade, kids are introduced to basic space concepts that are made easy to follow and remember. Starting at the Sun and working outward through the planets and belts, children will discover space objects and follow the flow of the solar wind, taking a fun and informative tour of the Solar System. Both boys and girls ages 5-8 will love the bright, colorful images of the planets and objects brought to life as characters, making learning more enjoyable and engaging. Kids will enjoy learning facts with the imaginatively illustrated Sun and planets that help build a love of learning while simultaneously presenting educational and scientific facts. Large print and easy to follow information tell all about the solar system for kids at preschool level learning. Travel the Solar System in an imaginary spaceship that tours the planets, and both belts, all the way to where the Solar System ends, and interstellar space begins. How many planets are in the Solar System? What type of planets are they? What happens to the solar wind? Have any spacecraft made it out of the Solar System? Where does the Solar System end? Find the answer to these questions and many more. I Am the Solar System is an excellent book for preschoolers, kindergarteners, and first graders just beginning to understand the basic concepts of the Solar System they are part of.I Am the Solar System, along with the numerous other books in the I Am series are a great addition to the Montessori method of teaching. The I Am series is geared toward scientific learning and independent thought. An excellent companion for Montessori classroom activities and as a stand alone read aloud.

**Good Night Solar System** explores the Milky Way Galaxy, the Sun, the Moon, all of the planets, including Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto, too. Young readers will see our solar system and its many wonders like never before, all within the colorful pages of this enchanting board book. Children are introduced to each planet’s surface and likeness and will begin to understand just how unique our planet and solar system truly are. From Earth’s vast oceans to Saturn’s mesmerizing rings, Good Night Solar System is sure to awaken the inner astronomer or astronaut in little ones who read along. This book is part of the bestselling Good Night Our World series, which includes hundreds of titles exploring iconic locations and exciting themes. Zip up your spacesuit and fasten your seatbelt—it’s time to journey into outer space!

**Blast off** on an exploration of our solar system?a fun space book for kids 3 to 5 Get even the smallest astronomer excited for the big universe of space, from the bright and burning sun to our own blue Earth to ice-capped Pluto and every planet in between. With this book, kids will explore the entire solar system through incredible photos and fascinating facts on what makes each planet so special?like their size, distance from the sun, what the surface is like, how many moons they have, and more! This planets for kids book includes: Big, beautiful images?Vibrant photos will take kids deep into space and onto each planet?no telescope required. Astronomy for kids?Learn all about the eight planets in our solar system. these Structure and Surface , Time on these planets Neighbors and much more . Fun space facts?Did you know the bubbles in soda are the same gas that’s on Venus? Out of this world facts will keep kids glued to the page and excited to explore the sky. Show kids the amazing universe that surrounds them with this fun and engaging astronomy book.

**Our Solar System** gives kids an overview of the planets that make up our solar system in a fun and engaging way. Kids engage with the pictures and learn fun facts. Colorful pictures help bring the planets to life. Kids are transported to outer space where they visit each planet and learn more about that planet. This easy to read book is just right for intermediate readers and younger kids will not have a problem following along with a parent. This book is educational as well as entertaining.

Ready to blast off? We’re taking a tour of the Milky Way Galaxy! Get your little astronaut ready for an amazing trip through the stars. Watch as your toddler visits the Milky Way planets, discovers comets and constellations, and explores black holes and red giants! No asteroid is left unturned! This book is the perfect gift for little astronaut going away parties. With the Good Night Our World series, toddlers and preschool-age kids can build listening and memory skills by identifying famous landmarks and the distinct character of real places. Perfect for bedtime or naptime, reading simple, soothing phrases to your infant, toddler or preschooler will help them fall gently to sleep. The story to read along with you, and on top of that, these classic board books were built to last! Made from thick paperboard construction, it was designed with your kids in mind. Introduce stories of exploration to your little one using colorful illustrations and distinct vocabulary with Good Night Books, and be sure to look through our entire Solar System, Good Night Astronauts, Good Night Museum, and many more! Surprise your little astronaut today with Good Night Galaxy!

Explores the world beyond the solar system and examines stars, galaxies, and the universe itself.

All the planets in the solar system decide to throw Sun a birthday party. Includes facts about the planets.

The youngest astronomers can go forth and journey into outer space in this fun, basic introduction to the solar system. The unique format presents our sun and each planet in order with graduated flaps turn each flap to reveal fascinating facts on each celestial body, and even the Milky Way!"

A Solar System Kids Book

A Book about Space for Kids, from the Sun, Through the Planets, to the Heliosphere and Into Interstellar Space, Helping Preschool, Kindergarten, and First Grade Children Learn All about the Solar System

My First Book of Planets: All about the Solar System for Kids

Solar System for Kids

All about the Solar System for Kids. Easy Guide to Learning about Planets

A Fun Space Facts & Picture Book for Kids! Learn about Astronomy, the Sun, Moon & Planets. An Educational Space Book for Children.

*Where is it partly cloudy and 860°F? Venus. Read about the eight planets in our solar system and Earth's special place in it. This book also includes instructions for making your own solar system mobile, and on the new "Find Out More" page learn how to track the moon and visit the best plant web sites.*

*Explore the Solar System! 25 Great Projects, Activities, Experiments* introduces kids ages 6-9 to the planets, moons, and other celestial bodies that surround our star, the sun, as well as the universe beyond. Combining a hands-on element with history and science, kids investigate solar eclipses, phases of the moon, Jupiter's rings, and what astronauts wear. Who named the stars?

*What is the Milky Way? Why is there night? By combining a hands-on element with riddles, jokes, fun facts, and comic cartoons, kids Explore the Solar System!, and have a blast along the way.*

*The best-selling Hello, World! board book series expands into picture books, for Hello, World! kids who are ready for the next step. Kids who enjoy looking up at space and dreaming of exploring the solar system will love this lively, fact-filled, illustrated tour of our galaxy, with engaging information on every page:*

- Fascinating details about each of the planets, including up-to-date information such as NASA's Perseverance rover and Ingenuity helicopter—accompanied by bright illustrations.*
- Statistics about each planet, with information about the planet's size, distance from the sun, length of days and years, and more.*
- A helpful chart that shows each planet's place in the solar system.*
- A question that asks the reader to think about the planets in relation to themselves, such as "Would you like to live on a planet with a long winter or a short winter?" and "What would you bring on your Mars rover?"*

Hello, World! readers who have moved up to picture books and any kids who love science and space will find many captivating hours of learning and inspiration in the launch of this exciting new series.

*Amazing Solar System Projects You Can Build Yourself* introduces readers ages 9 and up to the basic elements of the solar system with over 25 hands-on building projects and activities. Readers learn about the sun, the planets and their moons, meteors and comets, and the amazing tools that astronomers and astronauts have used to study the solar system over the years. *Amazing Solar System Projects You Can Build Yourself* provides detailed step-by-step instructions and diagrams for creating the projects, which include making a greenhouse to see what happens on Venus and constructing a model of the phases of the moon to demonstrate why the moon has phases. Fascinating facts, anecdotes, biographies, and trivia are interspersed with the fun projects to teach readers all about the solar system.

The Cat in the Hat takes readers on an out of this world reading adventure through outer space! The Cat in the Hat’s Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. Learn about the solar system, planets, the constellations, and astronauts, and explore the wonders of space with the help of everyone’ favorite Cat in the Hat! Perfect for aspiring astraunauts, or any kid who loves learning and science. The universe is a mysterious place. We are only just learning what happens in space. Featuring beloved characters from Dr. Seuss’s The Cat in the Hat, the Learning Library are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading.

Learn about the eight planets and the Solar System through fun facts and adorable illustrations. Each planet is depicted as a fun character which reveals interesting space facts about itself. An educational picture book ideal for young children who want to learn about the planets and space. The ideal learning book for toddlers, children in preschool, kindergarten or a higher grade, for ages 2 through to 7.

The solar system is a complicated but very interesting subject to study. The problem is, school textbooks are so heavy with texts, they become very boring to children. The good news is, workbooks such as this exist. Using a hands-on and picture-dominated approach to learning, a child would have absolute fun learning about the star and the planets. **Solar System for Kids: The Planets and Their Moons**

In this stellar activity book, kids delve into the rich history of space exploration, where telescopes, satellites, probes, landers, and human missions lead to amazing discoveries. Updated to include the recent discovery of Eris which, along with Pluto, has been newly classified as a &“dwarf planet&” by the International Astronomical Union, this cosmic adventure challenges kids to explore the planets and other celestial bodies for themselves through activities such as building a model of a comet using soil, molasses, dry ice, and window cleaner; or creating their own reentry vehicle to safely return an egg to Earth's surface. With biographies of more than 20 space pioneers, specific mission details, a 20-page field guide to the solar system, and plenty of suggestions for further research, this is the ultimate guidebook to exploring the solar system.

From ancient times, people have wanted to learn about the sky. The stars, planets, and other heavenly bodies have been observed for centuries, and theories have changed as the equipment used has improved. Though we now know that the Sun is the center of our solar system, and planets and other objects move around it, we still have a lot to learn. What is a comet made of? Why is Pluto now called a dwarf planet? What causes a solar eclipse? A lunar eclipse? This book will help you answer these questions and more. Whether you try the experiments and activities in this book for fun or for a school project, you'll discover why so many people are fascinated by our solar system.

Presents the planets in the solar system and describes what makes them special.

Is your child fascinated by space? You want to make them go "WOW", right? Well, do we have the answer for you! Solar System For Kids is a totally awesome activity book with LOADS of amazing facts about the solar system, including a detailed look at each planet and cool handwriting activities to get stuck into. Your cosmos-crazy child will not only learn about the solar system but also enjoy the colouring-in and mazes included within this activity book. Watch them soar with enthusiasm through the stratosphere and return on a cloud of stardust to impress you with their newly-learned facts and figures all about the solar system. For example, did you know there was a MOUNTAIN on Mars? That's just one of the cool facts contained in this brilliant space book. They will learn all about: the planets in our solar system, what an astronaut does, what the International Space Station is, famous people who have travelled into space, what comets and asteroids are, and they even get to design their own planet! So, let's not waste another second on Earth. Get hold of your copy of Solar System For Kids TODAY and give your child their ticket on the rocket ship to the stars.
