Speaking Of Death: What The Bereaved Really Need

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be

read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern

...and death came third! The definitive guide to networking and speaking in public. Do you dread going to networking events? Do you hide at the back of the room when you have the opportunity to present your business? In 1984 a New York Times Survey on Social Anxiety placed death third in the list of people's biggest fears. The top two responses were walking into a room full of strangers and speaking in public. Facing

a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom

for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world. How to Listen to and Learn from Those Facing Death

wisdom and refreshing insight, Thich Nhat Hanh confronts a subject that has been contemplated by Buddhist monks and nuns for twenty-five-hundred years—and a question that has been pondered by almost anyone who has ever lived: What is death? In *No Death, No Fear*, the acclaimed teacher and poet examines our concepts of death, fear, and the very nature of existence. Through Zen parables, guided meditations, and personal stories, he explodes traditional myths of how we live and die. Thich Nhat Hanh shows us a way to live a life unfettered by fear. *Man is spirit. spirit? Spirit is the self. But what is the self? The self is a relation which relates itself to its own self, or it is that in the relation [which accounts for it] that the relation relates itself to its own self; the self is not the relation but [consists in the fact] that the relation relates itself to its own self. Man is a synthesis of the infinite and the finite, of the temporal and the eternal, of freedom and necessity; in short, it is a synthesis. In most Western and Westernized cultures, the reality of death is a subject that we avoid because it makes us uncomfortable. Even participants in religions that celebrate death as a release to

a paradisiacal realm will avoid talking about or facing the death experience, unless it's through the lens of their religious beliefs. The rest of us tap dance around the subject, enjoying death-related fiction involving vampires, zombies, and serial killers, while we recoil in mind-numbing horror at the thought of being in the same room with a corpse. Chelsea Tolman is a funeral director, mortician, and embalmer with over 15 years experience. In her book, "Speaking of the Dead," she attempts to provide the balm that allows us to engage in the real world of death's circumstances and give us a peek behind the

curtain at what it's like to be a professional in the death industry. This book is a collection of Chelsea's recounted stories that illustrate the unique perspective of being a professional in the death industry. She covers a wide range of emotions and circumstances from light hilarity to deep sadness and grief. She does well in not taking herself too seriously and is quick to share stories where she laughs about her own foibles and mistakes. Chelsea also takes the time to celebrate the diversity of cultures, describing in intimate detail the way some religions and nationalities

treat their dead. All get equal respect, including the careful corpse wrappings of the Bha'i, the pronated wailing women of the Far East, the colorful dancers of Africa, suicides, and drug overdoses. She expertly weaves these stories of culture in with the experience of grief and loss to reveal how we all share the basic human essence of missing our dead. Finally, "Speaking of the Dead" serves as Chelsea's heartfelt attempt to show to the world that the experience of caring for one's dead is one that should be embraced and cherished, rather than avoided and feared as it largely is at present. She details the loving

care she gives to the bodies and how she encourages the loved ones to participate and catalyze their own progress at closure. The tenderness she shows in wrapping infants in blankets, smoothing an old man's hair, or applying a young woman's make-up invites you to step over the gap from macabre avoidance to emotional acceptance and understand that death is simply another part of the human experience that we should all embrace.

Inspired by his experience with his own father and countless stories from others who regret not having these conversations, Michael Hebb cofounded Death Over Dinner—an organization that encourages people to pull up a chair, break bread, and really talk

The first book to validate the meaningful dreams and visions that bring comfort as death nears. Christopher Kerr is a hospice doctor. All of his patients die. Yet he has cared for thousands of patients who, in the face of death, speak of love and grace. Beyond the physical realities of dying are unseen processes that are remarkably life-affirming. These include dreams that are unlike any regular dream. Described as "more real than real," these end-of-life experiences resurrect past relationships, meaningful events and themes of love and forgiveness; they restore life's meaning and mark the transition

from distress to comfort and acceptance. Drawing on interviews with over 1,400 patients and more than a decade of quantified data, Dr. Kerr reveals that pre-death dreams and visions are extraordinary occurrences that humanize the dying process. He shares how his patients' stories point to death as not solely about the end of life, but as the final chapter of humanity's transcendence. Kerr's book also illuminates the benefits of these phenomena for the bereaved, who find solace in seeing their loved ones pass with a sense of calm closure. Beautifully written, with astonishing real-life characters and stories, this book is at its

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question:

What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the

importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

The Death of Ivan Ilyich - first published in 1886, is a novella by Leo Tolstoy, considered one of the masterpieces of his late fiction, written shortly after his religious conversion of the late 1870s. "Usually classed among the best examples of the novella", *The Death of Ivan Ilyich* tells the story of a high-court judge in 19th-century Russia and his sufferings and death from a terminal illness. Ivan Ilyich (Ilyich is a patronymic, his surname is Golovin) is a highly

As the story progresses, he becomes more and more introspective and emotional as he ponders the reason for his agonizing illness and death.

One of the hardest, and least expected, aspects of the whole experience was the way in which support from friends and family (verbal, practical and emotional) was so often varied and inadequate. We don't have a language to help people suffering from grief and we often shy away from discussing death altogether. Frustrated with seeing family and friends paralysed by their fear of death - and their reluctance to talk about it - Annie decided to share her own experience of grief and the stories of others as a way to help shed some light on the darkest moments in life. The contributors differ in age, gender and background but all have experienced 'immediate loss' - a child, parent, sibling, partner or close friend. Each contributor interviewed by Broadbent will share what helped them

cope and what didn't. In addition, there will be expert advice from key charities working to support people through the grieving process.

The church does not cope very well with dying. Instead of using its own resources to mount a positive end-of-life ministry for the terminally ill, it outsources care to secular models, providers, and services. A terminal diagnosis typically triggers denial of impending death and placing faith in the techniques and resources of modern medicine. If a cure is not forthcoming, the patient and his or her loved ones experience a sense of failure and bitter disappointment. This book offers a critical analysis of the church's failure to communicate constructively about dying, reminding the church of its considerable liturgical, scriptural, and pastoral resources

when it ministers to the terminally ill. The authors, who have all been personally and professionally involved in end-of-life issues, suggest practical, theological bases for speaking about dying, communicating with those facing death, and preaching about dying. They explore how dying--in baptism--begins and informs the Christian's life story. They also emphasize that the narrative of faith embraces dying, and they remind readers of scriptural and christological resources that can lead toward a "good dying." In addition, they present current best practices from health professionals for communication among caregivers and those facing death. The book includes a foreword by Stanley Hauerwas. decisions in the final days of their life lack the capacity to make them. For many of us, our biggest, life-and-death decisions—literally—will therefore be made by someone else. They will decide whether we live or die; between long life and quality of life; whether we receive heroic interventions in our final hours; and whether we die in a hospital or at home. They will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others. Yet despite their critical role, we know remarkably little about how our loved ones decide for us. Speaking for the Dying tells their story, drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital. From bedsides, hallways, and conference rooms, you will hear, in

Online Library Speaking Of Death: What The Bereaved Really Need

their own words, how physicians really talk to families and how they respond. You will see how decision makers are selected, the interventions they weigh in on, the information they seek and evaluate, the values and memories they draw on, the criteria they weigh, the outcomes they choose, the conflicts they become embroiled in, and the challenges they face.

Observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do not—even on behalf of patients with similar problems and prospects. And they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result. Research has consistently found that choosing life or death for another is one of the most difficult

decisions anyone can face, sometimes haunting families for decades. This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones, health care providers, lawyers, and policymakers could undertake before it is too late.

People who are dying often see and hear things that the living do not. In a collection of poignant and hope-filled stories, author Ron Wooten-Green gives us a glimpse of the spiritual reality known only by those nearing death. Relevant Scripture passages, biographical sketches, and thought-provoking questions provide spiritual and historic perspective while encouraging self-reflection.

five stages to discover a sixth stage: meaning. In 1969, Elisabeth Kübler Ross first identified the stages of dying in her transformative book On Death and Dying. Decades later, she and David Kessler wrote the classic On Grief and Grieving, introducing the stages of grief with the same transformative pragmatism and compassion. Now, based on hard-earned personal experiences, as well as knowledge and wisdom earned through decades of work with the grieving, Kessler introduces a critical sixth stage. Many people look for “closure” after a loss. Kessler argues that it’s finding meaning beyond the stages of grief most of us are familiar with—denial, anger, bargaining, depression, and acceptance—that can transform grief into a more peaceful and hopeful experience. In this book,

Kessler gives readers a roadmap to remembering those who have died with more love than pain; he shows us how to move forward in a way that honors our loved ones. Kessler's insight is both professional and intensely personal. His journey with grief began when, as a child, he witnessed a mass shooting at the same time his mother was dying. For most of his life, Kessler taught physicians, nurses, counselors, police, and first responders about end of life, trauma, and grief, as well as leading talks and retreats for those experiencing grief. Despite his knowledge, his life was upended by the sudden death of his twenty-one-year-old son. How does the grief expert handle such a tragic loss? He knew he had to find a way through this unexpected, devastating loss, a way

that would honor his son. That, ultimately, was the sixth state of grief—meaning. In Finding Meaning, Kessler shares the insights, collective wisdom, and powerful tools that will help those experiencing loss. Finding Meaning is a necessary addition to grief literature and a vital guide to healing from tremendous loss. This is an inspiring, deeply intelligent must-read for anyone looking to journey away from suffering, through loss, and towards meaning.

Experts in end-of-life care tell us that we should talk about death and dying with relatives and friends, but how do we get such conversations off the ground in a society that historically has avoided the topic? This book provides one example of such a conversation. The coauthors take up challenging questions about pain, caregiving, grief, and what comes after death. Their unlikely collaboration is itself connected to death: the murders of two of Irene's closest friends and Steve's support in perpetuating memories of those friends' lives and not just their violent ends. The authors share the results of a no-holds-barred discussion they conducted for several years over email. Readers can consider a range of views on complicated issues to which there are

no right answers. Letting ourselves pose certain questions has the potential to profoundly change the way we think about death, how we choose to die, and, just as importantly, the way we live. Honest, probing, sensitive, and even humorous at times, the completely open discussions in this book will help readers deal with a topic that most of us try to avoid but that everyone will face eventually.

After too many years of unfulfilling work, Bronnie Ware began searching for a job with heart. Despite having no formal qualifications or previous experience in the field, she found herself working in palliative care. During the time she spent tending to those who were dying, Bronnie's life was transformed. Later, she wrote an Internet blog post, outlining the most common regrets that the people she had cared for had expressed. The post gained so much momentum that it was viewed by more than three million readers worldwide in its first year. At the

It is a courageous, life-changing book that will leave you feeling more compassionate and inspired to live the life you are truly here to live.

Even in this candidly confessional age, we've been conditioned to avoid discussions of death. Our youth-worshipping culture does everything to deny death, which is why, when the end nears, most of us are inadequately prepared to deal with it. And the cost of that is great: many are haunted by memories of how inappropriately or painfully or uncomfortably their parents and grandparents died. Many of us avoid even considering the options, in all their complexity, that we will most likely face one

day, given our new longevity and the profound advances in medicine. With its wise and very compelling argument that all of us, at any age, can and should face death before it faces us, Talking About Death addresses the cultural, personal, medical, and legal concerns that are necessary for us--as individuals and as a society--to prepare for a good death, a death where the dying are in control and not, as is too often the case, caught in a downward spiral of medical intervention and misunderstood intentions. Virginia Morris skillfully weaves together personal stories and practical matters, scientific fact and spiritual sensitivity into an important book about how we can

achieve a greater sense of peace in dying, and rediscover the art of living.

Written after his wife's tragic death as a way of surviving the "mad midnight moment," A Grief Observed is C.S. Lewis's honest reflection on the fundamental issues of life, death, and faith in the midst of loss. This work contains his concise, genuine reflections on that period: "Nothing will shake a man -- or at any rate a man like me -- out of his merely verbal thinking and his merely notional beliefs. He has to be knocked silly before he comes to his senses. Only torture will bring out the truth. Only under torture does he discover it himself." This is a beautiful and unflinchingly honest
