

## Start With No: The Negotiating Tools That The Pros Don't Want You To Know

When discussing being stuck in a "win-win vs. win-lose" debate, most negotiation books focus on face-to-face tactics. Yet, table tactics are only the "first dimension" of David A. Lax and James K. Sebenius' pathbreaking 3-D Negotiation (TM) approach, developed from their decades of doing deals and analyzing great dealmakers. Moves in their "second dimension"—deal design—systematically unlock economic and noneconomic value by creatively structuring agreements. But what sets the 3-D approach apart is its "third dimension": setup. Before showing up at a bargaining session, 3-D Negotiators ensure that the right parties have been approached, in the right sequence, to address the right interests, under the right expectations, and facing the right consequences of walking away if there is no deal. This new arsenal of moves away from the table often has the greatest impact on the negotiated outcome. Packed with practical steps and cases, 3-D Negotiation demonstrates how superior setup moves plus insightful deal designs can enable you to reach remarkable agreements at the table, unattainable by standard tactics. Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses objective criteria to help two parties reach an agreement

At last, here is a book that shows women how to recognize the Shadow Negotiation -- in which the unspoken attitudes, hidden assumptions, and conflicting agendas that drive the bargaining process play out -- and how to use that knowledge to their advantage. Each time people bargain over issues -- a promotion, a contract with a new client, a bigger role in decision-making -- a parallel negotiation unfolds beneath the surface of the "formal" discussion. Bargainers constantly maneuver to determine whose interests and needs will hold sway, whose opinions will matter, and how cooperative each person will be in reaching an agreement. How the issues are resolved hangs on the actions people take in the shadow negotiation, yet it is in this shadow negotiation that women most often run into trouble. The most productive negotiations take place when strong advocates can connect with each other. Good results depend equally on a bargainer's positioning her ideas for a fair hearing and on being open to the other side's point of view. But traditionally women have not fared well on either front. Often, they let negotiable moments slip by and take the first "no" as a final answer, or their efforts to be responsive to the other side's position are interpreted as accommodation. As a result, women can come away from negotiations with fewer dollars, perks, plum assignments, or less say in decision-making than men. To negotiate effectively, women must pay attention to acts of self-sabotage as well as to the moves others make in the shadow negotiation. By bargaining more strategically, women can establish the terms of their advocacy, their voice, and at the same time encourage the open communication essential to a collaborative discussion in which not only acceptable, but creative, agreements can be worked out. Written by Deborah M. Kolb and Judith Williams, two authorities in the field, The Shadow Negotiation shows women a whole new way to think about the negotiation process. Kolb and Williams identify the common stumbling blocks that women encounter and present a game plan for turning their particular strengths to their advantage. Based on extensive interviews with hundreds of business-women, The Shadow Negotiation provides women with a clear, insightful guide to the hidden machinations that are at work in every bargaining situation.

For an extraordinary fifty-seven-year period, one of the nation's largest and fastest-growing companies was run by two men who were flesh and blood. The chief executives of the International Business Machines Corporation from 1914 until 1971 were Thomas J. Watson and Thomas J. Watson, father and son. That great corporation bears the imprint of both men -- their ambitions and their strengths -- but it also bears the consequences of a family that was in near-constant conflict. Sometimes wrong but never in doubt, both Watsons had clear -- and farsighted -- visions of what their company could become. They also had volcanic tempers. Their fights with each other combined with their commitment to leadership and excellence made IBM one of the most rewarding, yet gut-clutching firms to work for in the history of American business. We are accustomed to describing professional behavior as if men and women leave their emotions and vulnerabilities at home each day. In the case of the Watsons, filial and sibling strife could not be excluded from the office. In closely studying the desires and frustrations of the Watson family, eminent historian Richard S. Tedlow has produced something more than a family portrait or a company history. He has raised the nearly forbidden issue of the role of emotion in corporate life. This book explores the interplay between the personalities of these two extraordinary men and the firm they created. Both Watsons had deeply held beliefs about what a corporation is

and should be. These ideas helped make "Big Blue" the bluest of blue-chip stocks during the Watsons' tenure. These very beliefs, however, also sowed the seeds for IBM's disasters in the late 1980s and early 1990s, when the company had lost sight of the original meaning behind many of the practices each man put into place. Tracing the family's idiosyncratic ability to cope with each other's weaknesses but not their strengths, *The Watson Dynasty* is a book for every person who ever went to work but didn't want to check his personality at the door.

A quick-and-easy guide to core business and career concepts—no MBA required! The ability to negotiate a deal. Confidence to oversee staff. Complete, accurate monitoring of expenses. In today's business world, these are must-have skills. But all too often, comprehensive business books turn the important details of best practices into tedious reading that would put even a CEO to sleep. From hiring and firing to strategizing and calculating revenues, *Negotiating 101* is an easy-to-understand roadmap of today's complex business world, packed with hundreds of entertaining tidbits and concepts that can't be found anywhere else. So whether you're a new business owner, a middle manager, or an entry-level employee, this 101 series has the answers you need to conduct business in a smarter way.

"Filled with great strategies you can immediately put to use in your business and personal lives . . . extremely entertaining, thought-provoking." —Tyra Banks, CEO, TYRA Beauty, and creator of America's Next Top Model Some negotiations are easy. Others are more difficult. And then there are situations that seem completely hopeless. Conflict is escalating, people are getting aggressive, and no one is willing to back down. And to top it off, you have little power or other resources to work with. Harvard professor and negotiation adviser Deepak Malhotra shows how to defuse even the most potentially explosive situations and to find success when things seem impossible. Malhotra identifies three broad approaches for breaking deadlocks and resolving conflicts, and draws out scores of actionable lessons using behind-the-scenes stories of fascinating real-life negotiations, including drafting of the US Constitution, resolving the Cuban Missile Crisis, ending bitter disputes in the NFL and NHL, and beating the odds in complex business situations. But he also shows how these same principles and tactics can be applied in everyday life, whether you are making corporate deals, negotiating job offers, resolving business disputes, tackling obstacles in personal relationships, or even negotiating with children. As Malhotra reminds us, regardless of the context or which issues are on the table, negotiation is always, fundamentally, about human interaction. No matter how high the stakes or how protracted the dispute, the object of negotiation is to engage with other human beings in a way that leads to better understandings and agreements. The principles and strategies in this book will help you do this more effectively in every situation. "This book is magic for any deal maker." —Daniel H. Pink, New York Times-bestselling author

How to Overcome Obstacles and Achieve Brilliant Results at the Bargaining Table and Beyond

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as

assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

For years, academic thinking on negotiations and auctions has matured in different silos. Negotiation theory focused on deals between two parties, investigating psychological motivations and invoking ideas like 'best alternative to a negotiated agreement.' Auction theory, on the other hand, focused exclusively on situations where multiple bidders were involved and the highest bidder won. Harvard Business School professor Guhan Subramanian specializes in understanding how deals. As he studied deals in the news, observed deals as a participant and invited legendary dealmakers into his classroom, one commonality kept cropping up. Assets most often change hand not in a pure negotiation or a pure auction, but by a mechanism that freely combines elements from both schools of thought. Negotiators are 'fighting on two fronts' across the table, but also on the same side of the table with known, unknown, or possible competitors. In *Negotiauctions*, Subramanian provides a lively tour of both negotiation and auction theory, following those summaries with an in-depth look at his hybrid theory that includes strategies that readers can use in real life situations. Along the way Subramanian employs multiple case studies, from studio negotiations over a new season of the TV show *Frasier* to his own experience purchasing a car. Classroom tested in one of the world's best business schools, *Negotiauctions* is an indispensable how-to guide for anyone involved in the sale of high-value assets.

A 20% discount on an item already on sale. A four-year-old willingly brushes his/her teeth and goes to bed. A vacationing couple gets on a flight that has left the gate. \$5 million more for a small business; a billion dollars at a big one. Based on thirty years of research among forty thousand people in sixty countries, Wharton Business School Professor and Pulitzer Prize winner Stuart Diamond shows in this unique and revolutionary book how emotional intelligence, perceptions, cultural diversity and collaboration produce four times as much value as old-school, conflictive, power, leverage and logic. As negotiations underlie every human encounter, this immediately-usable advice works in virtually any situation: kids, jobs, travel, shopping, business, politics, relationships, cultures, partners, competitors. The tools are invisible until you first see them. Then they're always there to solve your problems and meet your goals.

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your

negotiation style; (2) examples of "decision trees," which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator.

Think a win-win solution is the best way to make the deal? Think again. For years now, win-win has been the paradigm for business negotiation. *you how to understand and control these emotions. It teaches you how to ignore the siren call of the final result, which you can't really control, and how to focus instead on the activities and behavior that you can and must control in order to successfully negotiate with the pros. The best negotiators: \* aren't interested in "yes"—they prefer "no" \* never, ever rush to close, but always let the other side feel comfortable and secure \* are never needy; they take advantage of the other party's neediness \* create a "blank slate" to ensure they ask questions and listen to the answers, to make sure they have no assumptions and expectations \* always have a mission and purpose that guides their decisions \* don't send so much as an e-mail without an agenda for what they want to accomplish \* know the four "budgets" for themselves and for the other side: time, energy, money, and emotion \* never waste time with people who don't really make the decision Start with No is full of dozens of business as well as personal stories illustrating each point of the system. It will change your life as a negotiator. If you put to good use the principles and practices revealed here, you will become an immeasurably better negotiator.*

Rose Gottemoeller, the US chief negotiator of the New START treaty-and the first woman to lead a major nuclear arms negotiation-delivers in this book an invaluable insider's account of the negotiations between the US and Russian delegations in Geneva in 2009 and 2010. It also examines the crucially important discussions about the treaty between President Barack Obama and President Dmitry Medvedev, and it describes the tough negotiations Gottemoeller and her team went through to gain the support of the Senate for the treaty. And importantly, at a time when the US Congress stands deeply divided, it tells the story of how, in a previous time of partisan division, Republicans and Democrats came together to ratify a treaty to safeguard the future of all Americans. Rose Gottemoeller is uniquely qualified to write this book, bringing to the task not only many years of high-level experience in creating and enacting US policy on arms control and compliance but also a profound understanding of the broader politico-military context from her time as NATO Deputy Secretary General. Thanks to her years working with Russians, including as Director of the Carnegie Moscow Center, she provides rare insights into the actions of the Russian delegation-and the dynamics between Medvedev and then-Prime Minister Vladimir Putin. Her encyclopedic recall of the events and astute ability to analyze objectively, while laying out her own thoughts and feelings at the time, make this both an invaluable document of record-and a fascinating story. In conveying the sense of excitement and satisfaction in delivering an innovative arms control instrument for the American people and by laying out the lessons Gottemoeller and her colleagues learned, this book will serve as an inspiration for the next generation of negotiators, as a road map for them as they learn and practice their trade, and as a blueprint to inform the shaping and ratification of future treaties. This book is in the Rapid Communications in Conflict and Security (RCCS) Series (General Editor: Dr. Geoffrey R.H. Burn) and has received much praise, including: "As advances in technology usher in a new age of weaponry, future negotiators would benefit from reading Rose Gottemoeller's memoir of the process leading to the most significant arms control agreement of recent decades." —Henry Kissinger, former U.S. Secretary of State "Rose Gottemoeller's book on the New START negotiations is the definitive book on this treaty or indeed, any of the nuclear treaties with the Soviet Union or Russia. These treaties played a key role in keeping the hostility between the United States and the Soviet Union from breaking out into a civilization-ending war. But her story of the New START negotiation is no dry academic treatise. She tells with wit and charm the human story of the negotiators, as well as the critical issues involved. Rose's book is an important and well-told story about the last nuclear treaty negotiated between the US and Russia." —William J. Perry, former U.S. Secretary of Defense "This book is important, but not just because it tells you about a very significant past, but also because it helps you understand the future." —

A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the "win-win" method exemplified in *Getting to Yes* by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen's *You Can Negotiate Anything*. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don't match real world realities. *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty. They don't trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science.*

whether to talk to their enemy, and when may their position on wartime diplomacy change? How do we get from only fighting to also talking? In *The Costs of Conversation*, Oriana Skylar Mastro argues that states are primarily concerned with the strategic costs of conversation, and these costs need to be low before combatants are willing to engage in direct talks with their enemy. Specifically, Mastro writes, leaders look to two factors when determining the probable strategic costs of demonstrating a willingness to talk: the likelihood the enemy will interpret openness to diplomacy as a sign of weakness, and how the enemy may change its strategy in response to such an interpretation. Only if a state thinks it has demonstrated adequate strength and resiliency to avoid the inference of weakness, and believes that its enemy has limited capacity to escalate or intensify the war, will it be open to talking with the enemy. Through four primary case studies—North Vietnamese diplomatic decisions during the Vietnam War, those of China in the Korean War and Sino-Indian War, and Indian diplomatic decision making in the latter conflict—*The Costs of Conversation* demonstrates that the costly conversations thesis best explains the timing and nature of countries' approach to wartime talks, and therefore when peace talks begin. As a result, Mastro's findings have significant theoretical and practical implications for war duration and termination, as well as for military strategy, diplomacy, and mediation.

Every day we find ourselves in situations where we need to say No-to people at work, at home, and in our communities-because No is the word we must use to protect ourselves and to stand up for everything and everyone that matters to us. But as we all know, the wrong No can also destroy what we most value by alienating and angering people. That's why saying No the right way is crucial. The secret to saying No without destroying relationships lies in the art of the Positive No, a proven technique that anyone can learn. There 's a reason Alison Green has been called “ the Dear Abby of the work world. ” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don 't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You 'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “ reply all ” • you 're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate 's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “ A must-read for anyone who works . . . Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience. ” —Library Journal (starred review) “ I am a huge fan of Alison Green 's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor. ” —Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “ Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way. ” —Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

“ Written in the same remarkable vein as Getting to Yes, this book is a masterpiece. ” —Dr. Steven R. Covey, author of The 7 Habits of Highly Effective People • Winner of the Outstanding Book Award for Excellence in Conflict Resolution from the International Institute for Conflict Prevention and Resolution • In Getting to Yes, renowned educator and negotiator Roger Fisher presented a universally applicable method for effectively negotiating personal and professional disputes. Building on his work as director of the Harvard Negotiation Project, Fisher now teams with Harvard psychologist Daniel Shapiro, an expert on the emotional dimension of negotiation and author of Negotiating the Nonnegotiable: How to Resolve Your Most Emotionally Charged Conflicts. In Beyond Reason, Fisher and Shapiro show readers how to use emotions to turn a disagreement-big or small, professional or personal-into an opportunity for mutual gain.

“ One of the most important books of our modern era ” — Amb. Jaime de Bourbon For anyone struggling with conflict, this book can transform you. Negotiating the Nonnegotiable takes you on a journey into the heart and soul of conflict, providing unique insight into the emotional undercurrents that too often sweep us out to sea. With vivid stories of his closed-door sessions with warring political groups, disputing businesspeople, and families in crisis, Daniel Shapiro presents a universally applicable method to successfully navigate conflict. A deep, provocative book to reflect on and wrestle with, this book can change your life. Be warned: This book is not a quick fix. Real change takes work.

You will learn how to master five emotional dynamics that can sabotage conflict outside your awareness: 1. Vertigo: How can you avoid getting emotionally consumed in conflict? 2. Repetition compulsion: How can you stop repeating the same conflicts again and again? 3. Taboos: How can you discuss sensitive issues at the heart of the conflict? 4. Assault on the sacred: What should you do if your values feel threatened? 5. Identity politics: What can you do if others use politics against you? In our era of discontent, this is just the book we need to resolve conflict in our own lives and in the world around us.
