Musings from a "one-man flash mob" (Toronto Star) Comedian Shawn Hitchens explores his irreverent nature in this debut collection of essays. Hitchens doesn't shy away from his failures or celebrate his mild successes – he sacrifices them for an audience's amusement. He roasts his younger self, the effeminate ginger-haired kid with a competitive streak. The ups and downs of being a sperm donor to a lesbian couple. Then the fiery redhead professes his love for actress Shelley Long, declares his hatred of musical theatre, and recounts a summer spent in Provincetown working as a drag queen. Nothing is sacred. His first major break-up, how his mother plotted the murder of the family cat, his difficult relationship with his father, becoming an unintentional spokesperson for all redheads, and many more. Blunt, awkward, emotional, ribald, this anthology of humiliation culminates in a greater understanding of love, work, and family. Like the final scene in a Murder She Wrote episode, A Brief History of Oversharing promises everyone the A-ha! moment Oprah tells us to experience. Paired with bourbon, Scottish wool, and Humpty Dumpty Party Mix, this journey is best read through a lens of schadenfreude.

The fourth edition of this well-known text continues the mission of its predecessors â€” to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I (chs 1-5) includes information on models and theories of creativity, characteristics of creative people, and talent development. Part II (chapters 6-10) includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support studentsâ€(m) creativity. Changes in this Edition: Improved Organization -- This edition has been reorganized from 8 to 10 chapters allowing the presentation of theoretical material in clearer, more manageable chunks. New Material â€” In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. Pedagogy & Design â€” Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations. Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Targeted specifically to educators (but useful to others), this book is suitable for any course that deals wholly or partly with creativity in teaching, teaching the gifted and talented, or teaching thinking and problem solving. Such courses are variously found in departments of special education, early childhood education, curriculum and instruction, or educational psychology.
