Horror films divide opinion. It wasn't until 1973 that a horror film (The Exorcist) was nominated for an Oscar for Best Picture and many respected critics still regard them with amused condescension. The public's view is also sharply divided. Some cinema goers revel in the thought of being made very, very afraid, while some just don't like horror films because they don't want to be frightened. This guide, which is for both the fan and the more faint-hearted,

steers an illuminating path through a genre that has, since the early days of cinema, split off into many sub-divisions - folk horror, slasher movies, Hammer, sci-fi horror, psychological thrillers, zombie movies, among others. Times change but movie-makers can always find a way to tap into what we fear and dread, whether it's blood-sucking vampires or radioactive mutations, evil children or the living dead. This book also gives concise biographies of the many actors and directors who saw their careers - for better or worse - defined by their association with horror movies, and who created a genre that is instantly recognisable in all its forms and continues to find new

Graham Humphreys' career as a poster artist looms large over horror cinema. From designing the iconic Evil Dead poster to Nightmare on Elm Street and House of a Thousand Corpses, his work is familiar to everyone. It's easy to see why his work grabs the attention of horror fans and

filmmakers alike as he continually and systematically sets the bar ever higher in his quest for sheer terror and pure entertainment. With more than 40 years experience he is one of the few contemporary illustrators using the traditional medium of gouache to paint his images. Includes previously unseen work: paintings, drawings, and color studies.

Filmmaker Wes Craven has consistently and imaginatively scared movie audiences since the early 1970s. His films encompass a variety of styles, elements and themes, from the nihilistic existentialism of *The Last House on the Left* to the successful *A Nightmare on Elm Street* (which sent horror in a bold new

direction), to the hallucinatory dreamscapes of The Serpent and the Rainbow. And in the nineties, Craven returned with the Scream films, which were simultaneously funny, clever and scary films that overturned the horror cliches of the eighties. The present work provides a history of Craven's film career since 1972, examining all the themes and techniques the filmmaker explored. For each film, a synopsis, cast and credits, historical context, and critical commentary are provided. Also covered in detail are Craven's forays into television, including movies such as Stranger in the House and work on such series as The New Twilight Zone.

Sitting on pins and needles, anxiously waiting to see what will happen next, horror audiences crave the fear and exhilaration generated by a terrifying story; their anticipation is palpable. But they also breathe a sigh of relief when the action is over, when they are able to close their books or leave the movie theater. Whether serious, kitschy, frightening, or ridiculous, horror not only arouses the senses but also raises profound questions about fear, safety, justice, and suffering. From literature and urban legends to film and television, horror's ability to thrill has made it an integral part of modern entertainment. Thomas Fahy and

twelve other scholars reveal the underlying themes of the genre in *The Philosophy of Horror*. Examining the evolving role of horror, the contributing authors investigate works such as Mary Shelley's *Frankenstein* (1818), horror films of the 1930s, Stephen King's novels, Stanley Kubrick's adaptation of *The Shining* (1980), and Alfred Hitchcock's *Psycho* (1960). Also examined are works that have largely been ignored in philosophical circles, including Truman Capote's *In Cold Blood* (1965), Patrick Süskind's *Perfume* (1985), and James Purdy's *Narrow Rooms* (2005). The analysis also extends to contemporary forms of popular horror and "torture-horror" films of the last decade, including *Saw* (2004), *Hostel* (2005), *The Devil's Rejects* (2005), and *The Hills Have Eyes* (2006), as well as the ongoing

1940s, 50s, 60s, and 70s. Once relegated to the underground and midnight movie circuit, these films and their bombastic advertisements are experiencing a surge of mainstream popularity driven by fans appreciative of the artistic skill, distinctive aesthetic, and unabashed sensationalism they relied on to make a profit, with the quality of the poster often far surpassing that of the film itself. The fear of sleepless nights and the widespread beliefs that horror movies can have negative psychological effects and display immorality make some of us very, very nervous about them. But should we be concerned? In this book, horror-expert Mathias Clasen delves into the psychological science of horror cinema to bust some of the worst myths and correct the biggest misunderstandings surrounding the genre. Shouldn't we be concerned about what the current popularity of horror movies says about society and its values? While media psychologists have demonstrated that horror films indeed have the potential to harm us, Clasen reveals that the scientific evidence also contains a second story that is often overlooked: horror movies can also help us confront and manage fear and often foster prosocial values.

The term “horror film” was coined in 1931 between the premiere of Dracula and the release of Frankenstein, but monsters, ghosts, demons, and supernatural and horrific themes have been popular with American audiences since the emergence of novelty kinematographic attractions in the late 1890s. to the introduction of the term "horror film." Using a rhetorical approach that examines not only early films but also the promotional materials for them and critical responses to them, Kendall R. Phillips argues that the portrayal of horrific elements was enmeshed in broader social tensions around the emergence of American identity and, in turn, American cinema. He shows how early cinema linked monsters, ghosts, witches, and magicians with Old World superstitions and beliefs,

in contrast to an American way of thinking that was pragmatic, reasonable, scientific, and progressive. Throughout the teens and twenties, Phillips finds, supernatural elements were almost always explained away as some hysterical mistake, humorous prank, or nefarious plot. The Great Depression of the 1930s, however, constituted a substantial upheaval in the system of American certainty and opened a space for the reemergence of Old World gothic within American

An enormously entertaining account of the gifted and eccentric directors

who gave us the golden age of modern horror in the 1970s, bringing a new brand of politics and gritty realism to the genre. Much has been written about the storied New Hollywood of the 1970s, but at the same time as Martin Scorsese, Steven Spielberg, and Francis Ford Coppola were making their first classic movies, a parallel universe of directors gave birth to the modern horror film-aggressive, raw, and utterly original. Based on unprecedented access to the genre's major players, The New York Times's critic Jason Zinoman's Shock Value delivers the first definitive account of horror's golden age. By the late 1960s, horror was

Read Free The Art Of Horror Movies: An Illustrated History

stuck in the past, confined mostly to drive-in theaters and exploitation houses, and shunned by critics.

Shock Value tells the unlikely story of how the much-disparaged horror film became an ambitious art form while also conquering the multiplex.

Directors such as Wes Craven, Roman Polanski, John Carpenter, and Brian De Palma- counterculture types operating largely outside the confines of Hollywood-

revolutionized the genre, exploding taboos and bringing a gritty aesthetic, confrontational style, and political edge to horror. Zinoman recounts how these directors produced such classics as

Rosemary's Baby, Carrie, The Texas

Chainsaw Massacre, and Halloween, creating a template for horror that has been imitated relentlessly but whose originality has rarely been matched. This new kind of film dispensed with the old vampires and werewolves and instead assaulted audiences with portraits of serial killers, the dark side of suburbia, and a brand of nihilistic violence that had never been seen before. Shock Value tells the improbable stories behind the making of these movies, which were often directed by obsessive and insecure young men working on shoestring budgets, were funded by sketchy investors, and starred porn stars. But once The Exorcist became

the highest grossing film in America, Hollywood took notice. The classic horror films of the 1970s have now spawned a billion-dollar industry, but they have also penetrated deep into the American consciousness.

Quite literally, Zinoman reveals, these movies have taught us what to be afraid of. Drawing on interviews with hundreds of the most important artists in horror, Shock Value is an enthralling and personality-driven account of an overlooked but hugely influential golden age in American film.

Battle after battle has left Jak scarred and broken, a mind in a starship's body, bent on destroying the Ship for its crimes. Working together, can they end this interstellar nightmare? Even before Jean-Luc Godard and other members of the French New Wave championed Hollywood B movies, aesthetes and cineasts relished the raw emotions of genre films. This contradiction has been

particularly true of horror cinema, in which the same images and themes found in exploitation and splatter movies are also found in avant-garde and experimental films, blurring boundaries of taste and calling into question traditional distinctions between high and low culture. In Cutting Edge, Joan Hawkins offers an original and provocative discussion of taste, trash aesthetics, and avant-garde culture of the 1960s and 1970s to reveal horror's subversiveness as a genre. In her treatment of what she terms "art-horror" films, Hawkins examines home viewing, video collection catalogs, and fanzines for insights into what draws audiences

to transgressive films. Cutting Edged provides the first extended political critique of Yoko Ono's rarely seen Rape and shows how a film such as Franju's Eyes without a Face can work simultaneously as an art, political, and splatter film. The rediscovery of Tod Browning's Freaks as an art film, the "eurotrash" cinema of Jess Franco, camp cults like the one around Maria Montez, and the "cross-over" reception of Andy Warhol's Frankenstein are all studied for what they reveal about cultural hierarchies. Looking at the low aspects of high culture and the high aspects of low culture, Hawkins scrutinizes the privilege habitually

accorded "high" art -- a tendency, she argues, that lets highbrow culture off the hook and removes it from the kinds of ethical and critical social discussions that have plagued horror and porn. Full of unexpected insights, Cutting Edge calls for a rethinking of high/low distinctions -- and a reassigning of labels at the video store.
