

The Bird Who Loved To MOO!

Pip is a little bird who wants nothing more than to eat the fresh fruit high up in the trees. There's just one problem - The birds on her island don't fly. All the other birds think the idea sounds ridiculous. Afterall, Whoever Heard of a Flying Bird?But that won't stop Pip from trying. Surrounded by others that think she'll never succeed, Pip is determined to overcome adversity and self-doubt and reach the fruit. And if she tries hard enough, she might just succeed?

This well-loved story by an American author draws from universal truths as it tells a lyrical tale of a small bird that changes the life of a cold and bare mountain. Read, performed and presented through puppets all over the world, it has also been dramatised innovatively in different countries, the most recent being Japan. This new edition has rich and evocative illustrations by Stephen Aitken, who lives in Himachal Pradesh.

On her daily bike ride with her dad, a bird-loving little girl passes a woman who frightens her—until she discovers what they have in common. I am a bird. Ca-Caw! Ca-Caw! Every day, a little girl rides to school on the back of her father's bike. As they twist and turn through the streets, the little girl spreads her arms like wings and sings her birdsong for all to hear. But when they pass a strange woman in blue who carries a mysterious bag, the girl goes quiet until the woman is out of sight. One day, when they're running late, the little girl discovers what the woman does with her bag each morning—a surprise that transforms her wariness into a feeling of kinship to be celebrated. Hope Lim's simple text and Hyewon Yum's delicate, expressive illustrations create a touching story that encourages readers to embrace our similarities rather than focus on our differences.

A beautiful novel that captures the aching of a teenager ready to heal. It's dawn, on an empty road in the countryside. Empty, except for the girl in the long, red evening gown, standing next to a bicycle, and looking back at the home she's about to leave. Mannie's ready to start a new life and forget the terrible things that have happened here, but there are questions that need to be answered before she can let go. Questions about her elegant but unstable mother, her brother who's always overshadowed her, and his friend Harry Jacob, who just might be Mannie's boyfriend. . . .

Margret Snow is the quintessential New York woman. She dresses the windows of Saks Fifth Avenue by day and mingles in the downtown art world by night, always searching for her niche in a city intent on capturing The Next Big Thing as it flies into town. Married to Charles, a professor at Columbia, and living on the Upper West Side, the backdrop to Margret's life is made up of the poetic rhythms and colors of the Manhattan day: slow-running buses, the gray morning light striking the Hudson, the winter landscape of Riverside Park, the endless round of gallery openings, cocktail parties and grand dinners in the palatial apartments on Manhattan's upper east side. Against this metropolitan whirl, Margret and Charles pursue a lifelong hobby of bird watching, a passion for which was kindled by her grandfather during long-past summers near the shore in Gloucester, Massachusetts. As they shuttle between their Manhattan apartment, birding in the city's parks, and weekends out of town in their house near Cape May, a violent upheaval pushes Margret beyond the boundaries of her hobby. Overnight, she becomes an art world sensation and just as suddenly has fame ripped from her. As Laura Jacobs proved in her first novel, "Women About Town", she understands the natural habitat of the New York Woman in all its complexity. In The Bird Catcher, her second, she moves deeper into that territory with the story of a remarkable woman who is as rare and special as the birds that fill the skies above her.

Hear the songs and learn about 12 of North America's woodland birds. Being able to identify a bird's song is a skill that brings joy and fosters an appreciation of nature. Some bird songs are distinctive and easily recognized, like the common loon and wild turkey. Hawks as a group are distinctive but the individual species vary, as do the owls. Picking up the songs of a Black-capped Chickadee and a White-breasted Nuthatch, however, is not easy. That is where this enchanting book comes into its own. The Little Book of Woodland Bird Songs features recordings of twelve bird songs from some of the best-known woodland species seen and heard in North America. It is an interactive board book that is ideal for curious young readers. The sturdy pages are easy to turn and the twelve song buttons, each with a portrait of the bird, are easy to activate. The high-quality sound module is encased in durable plastic and the one-inch (3-cm) speaker makes it easy to hear and differentiate the elements of the bird's song, such as pitch, tempo and trills. Beautiful lifelike illustrations aid in identifying the birds and a descriptive paragraph and facts panel provide information such as the time of day playmate likely to sing; what it eats; behavior traits and how it constructs its nest. All twelve birds have winter or summer ranges in the United States or Canada. This means that readers are sure to see most if not all the birds in at least one season over the year. Red Crossbill Sharp-shinned Hawk Humt Thrush Blue-gray Gnatcatcher Black-capped Chickadee Purple Finch Common Loon Barred Owl Red-eyed Vireo Wild Turkey White-breasted Nuthatch Downy Woodpecker. Birds can be hard to spot at the best of times and never more so than in the woods. Once you learn to recognize these bird sounds, a walk through the forest will never be the same. This partner to The Little Book of Backyard Bird Songs is sure to become another family favorite.

Birds come in all sorts of interesting shapes, sizes and colours, and many of them can do remarkable things. There are birds that dance, race and hitch a ride . . . and some that cannot even fly. They're all her in Bring On the Birds! A delightful companion to Fabulous Fishes.

From the New York Times bestselling author of The Genius of Birds, a radical investigation into the bird way of being, and the recent scientific research that is dramatically shifting our understanding of birds -- how they live and how they think. "There is the mammal way and there is the bird way." But the bird way is much more than a unique pattern of brain wiring, and lately, scientists have taken a new look at bird behaviors they have, for years, dismissed as anomalies or mysteries -- What they are finding is upending the traditional view of how birds conduct their lives, how they communicate, forage, court, breed, survive. They are also revealing the remarkable intelligence underlying these activities, abilities we once considered uniquely our own: deception, manipulation, cheating, kidnapping, infanticide, but also ingenious communication between species, cooperation, collaboration, altruism, culture, and play. Some of these extraordinary behaviors are biological conundrums that seem to push the edges of, well, birdness: a mother bird that kills her own infant sons, and another that selflessly attends to the young of other birds as if they were her own; a bird that collaborates in an extraordinary way with one species--ours--but parasitizes another in gruesome fashion; birds that give gifts and birds that steal; birds that dance or drum, that paint their creations or paint themselves; birds that build walls of sound to keep out intruders and birds that summon Alaska's Kachemak Bay, Jennifer Ackerman shows there is clearly no single bird way of being. In every respect, in plumage, form, song, flight, lifestyle, niche, and behavior, birds vary. It is what we love about them. As E.O Wilson once said, when you have seen one bird, you have not seen them all.

Discover Your Love Type--One of 8 Birds--and the Secrets to Living with the One You Love

What is it like to be a swift, flying at over one hundred kilometres an hour? Or a kiwi, plodding flightlessly among the humid undergrowth in the pitch dark of a New Zealand night? And what is going on inside the head of a nightingale as it sings, and how does its brain improvise? Bird Sense addresses questions like these and many more, by describing the senses of birds that enable them to interpret their environment and to interact with each other. Our affinity for birds is often said to be the result of shared senses--vision and hearing--but how exactly do their senses compare with our own? And what about a bird's sense of taste, or smell, or touch, or the ability to detect the earth's magnetic field? Or the extraordinary ability of desert birds to detect rain hundreds of kilometres away--how do they do it? Bird Sense is based on a conviction that we have consistently underestimated what goes on in a bird's head. Our understanding of bird behaviour is simultaneously informed and constrained by the way we watch and study them, by drawing attention to the way these frameworks both facilitate and inhibit discovery. Birkhead identifies ways we can escape from them to explore new horizons in bird behaviour. There has never been a popular book about the senses of birds. No one has previously looked at how birds interpret the world or the way the behaviour of birds is shaped by all their senses. A lifetime spent studying birds has provided Tim Birkhead with a wealth of observation and a unique understanding of birds and their behaviour that is firmly grounded in science.

A stunningly illustrated look at the mating and parenting lives of the world's birds Bird Love looks at the extraordinary range of mating systems in the avian world, exploring all the stages from courtship and nest-building to protecting eggs and raising chicks. It delves into the reasons why some species, such as the wattled jacana, rely on males to do all the childcare, while others, such as cuckoos and honeyguides, dump their eggs in the nests of others to raise. For some birds, reciprocal promiscuity pays off: both male and female dunnooks will rear the most chicks by mating with as many partners as possible. For others, long-term monogamy is the only way to ensure their offspring survive. The book explores the wide variety of ways birds make sure they find a mate in the first place, including how many male birds employ elaborate tactics to show how sexy they are. Gathering in leks to display to females, they dance, pose, or parade to sell their suitability as a mate. Other birds attract a partner with their building skills: female bowerbirds rate brains above beauty, so males construct elaborate bowers with twig avenues and cleared courtyards to impress them. Looking at the differing levels of parenting skills across species around the world, we see why a tenth of bird species, including the fairy-wrens of Australia, have helpers at the nest who forgo their own reproduction to assist the breeding pair: how brood parasites and their hosts have engaged in evolutionary arms races; and how monogamous pairs share--or relinquish--their responsibilities.

Illustrated throughout with beautiful photographs, Bird Love is a celebration of the global diversity of avian reproductive strategies.

On a school trip to Honolulu's Bishop Museum, Manu and his classmates are excited to see an ancient skirt made with a million yellow feathers from the '??', a bird native to Hawai'i that had gone extinct long ago. Manu knew his full name, Manu'?'mauloua, meant "May the '??' bird live on" but never understood: Why was he named after a native forest bird that no longer existed? Manu told his parents he wanted to know more about '??' birds and together they searched the internet. The next day, his teacher shared more facts with the class. There was so much to learn! As his mind fills with new discoveries, Manu has vivid dreams of his namesake bird. After a surprise visit to Hawai'i Island where the family sees native forest birds in their natural setting, Manu finally understands the meaning of his name, and that he can help the birds and promote a healthy forest. Manu, the Boy Who Loved Birds is a story about extinction, conservation, and a child's triumph through a child's experience and curiosity. Readers learn along with Manu about the extinct honeyeater for which he was named, his Hawai'i heritage, and the relationship between animals and habitat. An afterword includes in-depth information on Hawai'i's forest birds and featherwork in old Hawai'i, a glossary, and a list of things to do to help. Illustrated with eye-catching, full-color block prints, the book accurately depicts and incorporates natural science and culture in a whimsical way, showing how we can all make a difference for wildlife.

"A modern coming-of-age full of love, desperation, heartache, and magic" (Andrew Sean Greer, Pulitzer Prize-winning author) about "the ways in which family, grief, love, queerness, and vulnerability all intersect." (Kristen Arnett, New York Times bestselling author). Perfect for fans of the Perks of Being a Wallflower and The Thirty Names of Night. Though Owen Tanner has never met anyone else who has a chatty bird in their chest, medical forums would call him a Terror. From the moment Gail emerged between Owen's ribs, his mother knew that she had to hide him away from the world. After a decade spent in hiding, Owen takes a brazen trip outdoors in the middle of a forest fire, and his life is upended forever. Suddenly, Owen is forced to flee the home that had once felt so confining and hide in plain sight with his uncle and cousin in Washington. There, he feels the joy of finding a family among friends; of sharing the bird in his chest and being embraced fully; of falling in love and feeling the devastating heartbreak of rejection before finding a spark of happiness in the most unexpected place: of living his truth regardless of how hard the thieves of joy may try to tear him down. But the threat of the Army of Acronyms is a constant, looming presence, making Owen wonder if he'll ever find a way out of the cycle of fear. A heartbreaking yet hopeful novel about the things that make us unique and lovable, The Boy with a Bird in His Chest grapples with the fear, depression, and feelings of isolation that come with believing that we will never be loved, let alone accepted, for who we truly are, and learning to live fully and openly regardless.

Growing up on the Upper West Side of Manhattan, with her older sister Alyssa, their parents were both overbearing and emotionally distant, and despite idyllic summers in the Catskills, and gatherings with glamorous family friends, there is a sadness that emanates from the Chatterjee residence, a deep well of sorrow stemming from the racism of American society. After a violent sexual assault, Taylia is disowned by her parents and suddenly forced to move out. As Taylia looks to the city, the ghost of her Indian grandmother dadi-ma always one step ahead, while another more troubling ghost chases after her. Determined to have the courage to confront the pain that her family can't face, Taylia finds work at a neighborhood café owned by single mother and spiritualist, Kat. Taylia quickly builds a constellation of friends and lovers on her own, daring herself to be open to new experiences, even as they call into question what she thought she knew about the past. Taylia's story is about survival, coming to terms with her past and looking forward to a future she never felt she was allowed to claim. Writing this for eighteen years, poet and activist Fariba Róisín's debut novel is an intense, provocative, and emotionally profound portrait of an inner life in turmoil and the redemptive power of community and love.

Winner of Best Young Adult Title for Singapore Book Awards 2016 Winner of the Hedwig Anwar Children's Book Award 2015 Winner, Royal Commonwealth Society Essay Competition 2009, First Prize, Class A There once was a rock which stood old and alone amidst a stretch of sand. For a long time it knew nothing except the lapping waves of the sea. Then one day with its endless chatter. Despite their hostile beginnings, the two began a friendship that evolved and changed over many years. Then one day when the bird did not return to the rock, the rock knew that his friend had died. And his world would return to what it once was, though now it was also filled with memories of his dearest friend.

An entertaining and eye-opening relationship book in the tradition of the million-copy bestseller The Five Love Languages How can two people who love each other not get along? Most relationships founder not from a lack of love, but from a lack of understanding. In Lovebirds, couples therapist and birdwatcher Trevor Silvester shows how birds of a different feather can flock together. The quizzes in Lovebirds reveal which of eight birds you are, and which your partner is. Are you a ground bird or a sky bird? A sight bird or a song bird? If you're an owl, and you spend a lot of time talking to yourself, then how do you get along with a nightingale, one of the great song birds, which directs most of its talking outward? If you're a swan, and you prefer to stay on the ground, knowing things up close and in detail, then what kind of future do you have with a swift, which trusts its instincts over logic and can live happily in the clouds? Whimsical and wise, and with charming illustrations, Lovebirds puts a whole new spin on the relationship book.

Fine art photographer Leila Jeffreys captures the beauty and diversity of some of our most colorful and elegant feathered friends. From the exotic birds of her native Australia to those of North America, Jeffreys seems to delve into the very souls of these creatures with her stunning and evocative portraits. Jeffreys works with animal rescue and conservation groups to find subjects to photograph. Her love and compassion for her subjects is evident throughout, as she captures their personalities in her delightful portraits; Commander Skyring the Gang-Gang Cockatoo, Dexter the White-Bellied Sea Eagle, Mrs. Plume the Budgerigar, and many others are as whimsical as they are beautiful.

33 gorgeous men with beards, 42 birds, one little girl, one cat, one lady being attacked by a chicken, and one long, snarky, anti-love poem, all are included in this coloring book for adults.*Special thanks to cover model Victoria Piva.

The Mountain That Loved A Bird

Ivy spends her day with the birds--sipping nectar and splashing in the pond in this joyfully written celebration of birds and imaginative play from an award-winning author--and-illustrator team. Ivy Bird is a celebration of the natural world and the joy found in imaginative play. Perfect for reading aloud, this book will delight children with its search-and-find elements, bright illustrations, and exuberant story. A nonfiction element, two pages bursting with colorful bird illustrations, encourages readers to seek out birds in their own neighborhoods.

A revolution in birding and field guides This stunningly illustrated book from acclaimed birder and photographer Richard Crossley revolutionizes field guide design by providing the first real-life approach to identification. Whether you are a beginner, expert, or anywhere in between, The Crossley ID Guide will vastly improve your ability to identify birds. Unlike other guides, which provide isolated individual photographs or illustrations, this is the first book to feature large, lifelike scenes for each species. These scenes--640 in all--are composed from more than 10,000 of the author's images showing birds in a wide range of views--near and far, from different angles, in various plumages and behaviors, including flight, and in the habitat in which they live. These beautiful compositions show how a bird's appearance changes with distance, and give equal emphasis to characteristics experts use to identify birds: size, structure and shape, behavior, probability, and color. This is the first book to convey all of these features visually--in a single image--and to reinforce them with accurate, concise text. Each scene provides a wealth of detailed visual information that invites and rewards careful study, but the most important identification features can be grasped instantly by anyone. By making identification easier, more accurate, and more fun than ever before, The Crossley ID Guide will completely redefine how its users look at birds.
