The Modern Antiquarian: A Pre Millennial Odyssey Through Megalithic Britain : Including A Gazetteer To Over 300 Prehistoric Sites

In the years between the American Revolution and the U.S. Civil War, as legal and cultural understandings of citizenship became more racially restrictive, black writers articulated an expansive, practice-based theory of citizenship. Grounded in political participation, mutual aid, critique and revolution, and the myriad daily interactions between people living in the same spaces, citizenship, they argued, is not defined by who one is but, rather, by what one does. In *The Practice of Citizenship*, Derrick R. Spires examines the parallel development of early black print culture and legal and cultural understandings of U.S. citizenship, beginning in 1787, with the framing of the federal Constitution and the founding of the Free African Society by Absalom Jones and Richard Allen, and ending in 1861, with the onset of the Civil War. Between these two points he recovers understudied figures such as William J. Wilson, whose 1859 "Afric-American Picture Gallery" appeared in seven installments in *The Anglo-African Magazine*, and the physician, abolitionist, and essayist James McCune Smith. He places texts such as the proceedings of black state conventions alongside considerations of canonical figures such as Frances Ellen Watkins Harper and Frederick Douglass. Reading black print culture as a space where citizenship was both

theorized and practiced, Spires reveals the degree to which concepts of black citizenship emerged through a highly creative and diverse community of letters, not easily reducible to representative figures or genres. From petitions to Congress to Frances Harper's parlor fiction, black writers framed citizenship both explicitly and implicitly, the book demonstrates, not simply as a response to white supremacy but as a matter of course in the shaping of their own communities and in meeting their own political, social, and cultural needs.

From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters—generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty—come to life in all their human uniqueness, free from idealization.

In the 1960s rock 'n' roll music began crossing the Atlantic Ocean—with The Beatles and The Who leading the British Invasion of the United States—and the Pacific Ocean, as American and European rock slowly began to take hold in Japan. This insightful study from visionary rock musician Julian Cope explores what really happened when

Western music met Eastern shores. The clash between traditional Japanese values and the wild renegades of 1960s and 1970s rock 'n' roll is examined, and the seminal artists in Japanese post-World War II culture are all covered. From itinerate art-house poets to violent refusenik bands with penchants for plane hijacking, this is the story of the Japanese youths and musicians who simultaneously revolutionized a musical genre and the culture of a nation.

A SYNTHESIS OF MODERN LIFE: A VISIONARY OVERVIEW OF THE EFFORT AND MISSION OF HUMANITY by Shamcher Bryn Beorse (Brynjolf Bjorset) The book Man and this Mysterious Universe was originally described as a synthesis of the many aspects of modern civilization, bringing within its scope the contribution of the East as well as of the West, showing how it has grown from the civilization of the past and how it will probably develop into the civilization of the future. Or as the author put it more simply: a survey of Western and Eastern Sciences. Ranging through various disciplines from Everyday Life, Art, Education, World Events and Mysticism, Beorse describes the evolution of humanity and the responsibilities of each of us in this process. Seen all together, they convey an image of the totality of the human endeavour: occurring both outside of time and in time,

on schedule, as a great play. "This comprehensive and refreshing picture is sorely needed at this time of narrow outlook and overspecialization," wrote the distinguished psychologist, educator and author, Dr. Philip B. Ballard. Inspired to write by the great sage, Inayat Khan, Beorse combined three former works into one for Man and This Mysterious Universe. Written during WWII, then added to with new information, the book was first published in 1949. His previous work, Distribute or Destroy, had been in the field of economics. Beorse further widened his scope in this publication, whose title refers to the popular physics book by James Jeans, This Mysterious Universe. Here Beorse inserts humanity into this assessment of a universe of vibrations and events, creating Man and This Mysterious Universe. "There is no great difference between rock, a tree, a man or a loving thought carving its way through the universe like a ray of the sun."

Introduces undergraduates to the key debates regarding space and culture and the key theoretical arguments which guide cultural geographical work. This book addresses the impact, significance, and characteristics of the 'cultural turn' in contemporary geography. It focuses on the development of the cultural geography subdiscipline and on what has made it a peculiar and unique realm of study. It demonstrates the importance of culture in the development of debates in other subdisciplines within geography and beyond. In line with these previous themes, the significance of space in the production of cultural values and expressions is also developed. Along with its timely examination of the health of the cultural geographical subdiscipline, this book is to be valued for its analysis of the impact of cultural theory on studies elsewhere in geography and of ideas of space and spatiality elsewhere in the social sciences.

A Gentle Madness continues to astound and delight readers about the passion and expense a collector is willing to make in pursuit of the book. The book captures that last moment in time when collectors pursued their passions in dusty bookshops and street stalls, high stakes auctions, and the subterfuge worthy of a true bibliomaniac. An adventure among the afflicted, A Gentle Madness is vividly anecdotal and thoroughly researched. Nicholas Basbanes brings an investigative reporter's heart to illuminate collectors past and present in their pursuit of bibliomania. A New York Times Notable Book of the Year.

these past sixteen years. What a place to die. But that's precisely why I was back." When drugged-up Time Traveller and '80s musical burnout Rock Section and his fellow English hooligans get kidnapped during Italia '90, there are ruinous implications. But now Rock has returned to Sardinia one final time to settle some scores and uncover the truth. He believes only Dutch cult leader Judge Barry Hertzog, still incarcerated on the island for the crime, can provide the answers. But through prescription drugs, the persistence of his driver Anna and a quest for the hidden ancient doorways strewn around Sardinia's only highway, the 131, Rock will discover that a greater truth awaits him. Judgement, consequences, hoodwinking on a grand scale, Gnosticism versus agnosticism...131 is a Gnostic whodunit that pursues readers' memories of all previous fiction into a peat bog and impales them with seven-foot-long pikes.

Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork. In this book, the author seeks access to Karma's origins by following several clues suggested by the doctrine's earliest formulation in the Upanistexts (circa 600-500 B.C.) These clues lead back to the mythical and ritual structure firmly established in the Brahmana texts, texts concerned with the rituals that chronologically and conceptually precede the UpanisThe rise of the karma doctrine is tied to the increasing dominance in late Vedic thought of the cosmic man (Purusa/Prajapati) mythology and its ritual analogue the "building of the fire altar" (agnicayana).

Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises, although both existed long before the early modern period and both were (and continue to be) practiced in places other than Europe. Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions, but the clear-cut distinction between "indigenous" and "colonial" archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours. This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas. Both regions host robust pre-modern antiquarian traditions that have continued to develop during periods of colonialism. In both regions, moreover, colonial encounters have been mediated by the antiquarian practices and preferences of European elites. The two regions also exhibit salient differences. For

example, Europeans claimed the “antiquities” of the eastern Mediterranean as part of their own, “classical,” heritage, whereas they perceived those of the Americas as essentially alien, even as they attempted to understand them by analogy to the classical world. These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross-bred antiquarianisms. Rather than assuming that interest in antiquity is a human universal, this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation.

What does it mean for a child to be a "reader" and how did American culture come to place such a high value on this identity?

Reading Children offers a history of the relationship between children and books in Anglo-American modernity, exploring long-lived but now forgotten early children's literature, discredited yet highly influential pedagogical practices, the property lessons

inherent in children's book ownership, and the emergence of childhood itself as a literary property. The nursery and schoolroom version of the social contract, Crain argues, underwrote children's entry not only into reading and writing but also into a world of commodity and property relations. Increasingly positioned as an indispensable form of cultural capital by the end of the eighteenth century, literacy became both the means and the symbol of children's newly recognized self-possession and autonomy. At the same time, as children's legal and economic status was changing, "childhood" emerged as an object of nostalgia for adults. Literature for children enacted the terms of children's self-possession, often with explicit references to property, contracts, or inheritances, and yet also framed adult longing for an imagined past called "childhood." Dozens of colorful illustrations chart the ways in which early literature for children was transformed into spectacle through new image technologies and a burgeoning marketplace that capitalized on nostalgic fantasies of childhood conflated with bowdlerized fantasies of history. Reading Children offers new terms for thinking about the imbricated and mutually constitutive histories of literacy, property, and childhood in the eighteenth and

Arise Again, Ô India!

In this gripping historical thriller, the search for a mysterious and powerful object hidden in the heart of Barcelona leads to ambition, desire, love—and murder An intriguing letter from his adoptive father, Artur, turns novelist Enrique Alonso's world upside down. Artur, a well-known antiquarian in Barcelona, reveals that he has discovered an ancient manuscript, but he feels uneasy, as though he's in over his head. But before Artur can piece together the final part of the puzzle, he is attacked and murdered. Enrique rushes to Barcelona to investigate his father's death and retrieve the book. His ex-wife, Bety, a philologist, comes to his aid and the two set about translating and deciphering the encrypted text. Written in Latin and Old Catalan, the manuscript holds the key to the location of a priceless object
