

The One Hundred Per Cent Society: The Rediscovered Cases Of Sherlock Holmes Book 2

Revealing the workings and dangers of freight shipping, which is the key to our economy, environment and civilization, the author sails from Rotterdam to Suez to Singapore to present an eye-opening glimpse into an overlooked world filled with suspect practices, dubious operators and pirates.

Drawing on sociology, psychology, history, art, and frank conversations with male and female bisexuals, the author examines the incidence and nature of bisexuality, the attitudes of bisexual persons, and the rewards of bisexuality

Make no mistakes about it. I know what I look like to others. Young, government-aided, pregnant mom. They see Lucy on my hip, and they see a mistake. I mean, why else would someone have a child so young, right? They couldn't be more wrong. I'm too busy most days between parenting, work, and finishing up my last year of nursing school to let their judging gaze tear me down until he moves into the vacant house next to the apartments I live in.His cold, blunt observation of us doesn't differ from any other stranger. He doesn't know me, but he's already painting a picture of who he thinks I am in his mind. He judges my very round belly. Lucy's inability to leave him alone, the bags under my eyes, and the fact that I couldn't care less what I look like anymore.He's a rude guy. Stays that way for months too. Then something happens. I'm not even sure what. Judgmental Guy decides Lucy and me-as well as baby Eli, are worth his friendship.Turns out, Judgmental Guy isn't too mean-okay, he kind of still is. But he graduates to Elijah. I build an unlikely friendship with him which deems it necessary for him to start smiling around me and my kids. I'm wrong again. Elijah isn't rude. He's terrifying. His strange acts of kindness are unraveling me. Elijah is only my friend.Right? Oh, fudge. I think I'm wrong. Again.

*12 photolithographs (heavily retouched), 3 chromolithographs. The photographs are by T.H. O'Sullivan and William Bell. These views, typical of the toned photolithographs published in Government reports, are striking scenes of the Western landscape, translated to this medium with a great deal of graphic richness. This title is also of prime importance because it lists every photographer for every p. 100.

A heartwarming story about the joys of multicultural families and being mixed race. One Hundred Percent Me takes readers (ages 4 to 8) along as a young girl explores and accepts her unique identity. It can be confusing to be a child of mixed race. As the little girl moves through daily life in the big city, she hears some people say she looks more like her Puerto Rican dad, while others claim she the other? Not In fact, honoring every facet of her identity equally becomes the main character's favorite affirmation. This beautifully illustrated book about celebrating differences, claiming our belonging, and acknowledging our heritage encourages all readers to embrace the fact that we are all 100% ourselves.

In the 1920s, a revived Ku Klux Klan burst into prominence as a self-styled defender of American values, a magnet for white Protestant community formation, and a would-be force in state and national politics. But the hooded bubble burst at mid-decade, and the social movement that had attracted several million members and additional millions of sympathizers collapsed into insignificance. Since reinterpreted the 1920s Klan. Rather than the violent, racist extremists of popular lore and current observation, 1920s Klansmen appear in these works as more mainstream figures. Sharing a restrictive American identity with most native-born white Protestants after World War I, hooded knights pursued fraternal fellowship, community activism, local reforms, and paid close attention to public moral/sexual orthodoxy. No recent general history of the 1920s Klan movement reflects these new perspectives on the Klan. One Hundred Percent American incorporates them while also highlighting the racial and religious intolerance, violent outbursts, and political ambition that aroused widespread opposition to the Invisible Empire. Veteran cops, Ed Hammer's and Russ Sonneveld's job was to investigate crimes committed by state employees.What they uncovered was a pattern of bribes for licenses that filtered cash to the campaign war chest of their boss, George Ryan. Ryan and his cronies covered up the bribery scheme along with other crimes. Then a fatal crash occurred. Reverend Scott Willis and his wife Janet watched as their children burned to death in the family van. Hammer and Sonneveld linked that accident to the bribery fundraising scheme. It was politics as usual, Illinois style. Ryan was eventually elected Governor. Then federal authorities began looking into Hammer's and Sonneveld's allegations uncovering a dishonest governor and his crooked political organization. Finally, thirteen years after the death of the six children and 76 convictions later, Ryan began his serving a six and one half years sentence in a federal prison.This is the story through Ed Hammer's eyes of the events the led to Ryan's demise.

"Over the next few decades, we will see a profound energy transformation as society shifts from fossil fuels to renewable resources like solar, wind, biomass. But what might a one hundred percent renewable future actually look like, and what obstacles will we face in this transition? Authors explore the practical challenges and opportunities presented by the shift to renewable energy."--Page 4 of cover

A Smithsonian Magazine Best History Book of 2018 The unknown history of two ideas crucial to the struggle over what America stands for In Behold, America, Sarah Churchwell offers a surprising account of twentieth-century Americans' fierce battle for the nation's soul. It follows the stories of two phrases--the "American dream" and "America First"--that once embodied opposing visions for America. Starting as a Republican motto before becoming a hugely influential isolationist slogan during World War I, America First was always closely linked with authoritarianism and white supremacy. The American dream, meanwhile, initially represented a broad vision of democratic and economic equality. Churchwell traces these notions through the 1920s boom, the Depression, and the rise of fascism at home and abroad, laying bare the persistent appeal of demagoguery in America and showing us how it was resisted. At a time when many ask what America's future holds, Behold, America is a revelatory, unvarnished portrait of where we have been.

Also he had a bit of genuine anxiety. He had told the truth when he said to Gulley that he didn't know what a "Red" was; but since then he had been making inquiries, and now he knew. A "Red" was a fellow who sympathized with labor unions and with strikes; who wanted to murder the rich and divide their property, and believed that the quickest way to do the dividing was by means of dynamite. All "Reds" made bombs, and carried concealed weapons, and perhaps secret poisons—who could tell?

Sherlock Holmes and Doctor Watson take on the case of Mr Avery Quill, whose daughter has mysteriously disappeared. The investigation has hardly begun when her body is discovered, and Mr Quill is himself murdered in the same manner. The killer leaves visiting cards, emblazoned with the head of the Gorgon, at the scenes of his crimes, and Holmes connects these to a strange club known as 'The One Hundred per Cent Society'. He learns little there, except that the members are all outcasts from noble families. The following morning a visitor arrives at Baker Street, to tell Holmes and Watson that the Society has a sinister purpose and that its leader has identified them as an obstacle to his plans which must be removed. Thus begins a battle with a new and merciless adversary, whose madness and thirst for revenge threaten to bring about the deaths of an apparently unconnected group of people. The Great Detective pits his skills against an enemy whose very appearance is uncertain.

I had just turned twenty-one and was in my senior year of college when I was diagnosed with grade four brain cancer. The doctors gave me less than a year to live. I fought, and fought, and I fought hard for eleven years. I am still alive and living independently eighteen years later. I'm currently in my sixteenth year of teaching elementary school and plan on doing so for a long time. I attend Chicago's Cancer Survivor's Walk and Celebration every spring so I always remember how many of us have survived this difficult battle. I hate hearing about others who have been diagnosed with cancer. I wish I could just reach into the television and tell them all that I have been through and learned. That it is possible to beat this fight even when the doctors tell us otherwise. So this is my way of reaching out to you and your loved ones. This book is filled with everything I did-the traditional therapies as well as all of the alternative therapies I used. This is an inspirational story about my fight against cancer. A story filled with hope, perseverance, and miracles.

The greatest challenge of our time is to build a world based on the sustainable use of renewable power. Our massive dependence on fossil fuels has upset the very climatic system that made human evolution possible. The global economy and its financial system are in jeopardy, running hot on overtly cheap yet increasingly costly and fast depleting oil. A 100% renewable world is seen by many as an impossible dream in anything but the very long term. But not only do a growing number of initiatives and plans dare to make the change but many have already achieved it.This rich collection presents a series of pioneering efforts and their champions, and the paths to their successes. Ranging from initiatives by individuals to visions for companies, communities and entire countries, it defeats tired economic and technical counter-arguments, showing how the schemes featured not only can and do work but do so economically and with available technology. The book is introduced by incisive writing by Peter Droege, explaining the challenges and framing a roadmap towards a 100% renewable reality.

The last year of elementary school is big for every kid. In this novel, equal parts funny and crushing, utterly honest and perfect for boys and girls alike, Christine Gouda faces change at every turn, starting with her own nickname-Tink-which just doesn't fit anymore. Readers will relate to this strong female protagonist whose voice rings with profound authenticity and absolute novelty, and her year's cringingly painful trials in normalcy-uncomfortable Halloween costumes, premature sleepover parties, crushed crushes, and changing friendships. Throughout all this, Tink learns, what you call yourself, and how you do it, has a lot to do with who you are. This book marks beloved author Karen Romano Young's masterful return to children's literature: a heartbreakingly honest account of what it means to be between girl and woman, elementary and middle school, inside and out-and just what you name that in-between self.

From the USA Today bestselling author of The Hating Game, soon to be a movie starring Lucy Hale and Austin Stowell, an unforgettable romantic comedy about a woman who finally has a shot at her long time crush—if she dares. Crush (n.): a strong and often short-lived infatuation, particularly for someone beyond your reach... Darcy Barrett has undertaken a global survey of men. She's travelled the world, and can categorically say that no one measures up to Tom Valeska, whose only flaw is that Darcy's twin brother Jamie saw him first and claimed him forever as his best friend. That's the problem with finding her dream man at age eight and peaking in her photography career at age twenty—ever since, she's had to learn to settle for good enough. When Darcy and Jamie inherit a tumble-down cottage from their grandmother, they're left with strict instructions to bring it back to its former glory and sell the property. Darcy plans to be in an aisle seat halfway across the ocean as soon as the renovations start, but before she can cut and run, she finds a familiar face on her porch: house-flipper extraordinaire Tom's arrived, he's bearing power tools, and he's single for the first time in almost a decade. Suddenly Darcy's considering sticking around to make sure her twin doesn't ruin the cottage's inherent magic with his penchant for grey and chrome. She's definitely not staying because of her new business partner's tight t-shirts, or that perfect face that's inspiring her to pick up her camera again. Soon sparks are flying—and it's not the faulty wiring. It turns out one percent of Tom's heart might not be enough for Darcy anymore. This time around, she's switching things up. She's going to make Tom Valeska 99 percent hers. This next hilarious romance includes a special PS section with two Happily Ever Afters—one for this novel featuring Darcy and Tom and the other, an epilogue featuring fan favorites Lucy Hutton and Josh Templeman from The Hating Game!

For decades, Hermann Scheer was one of the world's leading proponents of renewable energy. In this, his last book before his death in 2010, he lays out his vision for a planet 100% powered by renewables and examines the fundamental ethical and economic imperatives for such a shift. And most importantly, he demonstrates why the time for this transition is now. In Scheer's view, talk of bridging technologies such as carbon capture and storage or nuclear energy even (and perhaps especially) by environmentalists is actively damaging the more the pressing agenda of the move to 100% renewable energy. Instead, he offers up examples of the technologies which are working (economically) today and details the policy and market conditions which would allow them to flourish.
