The "treasures of the Church," out of which the pope grants indulgences, are not sufficiently named or known among the people of Christ. 57. That they are not temporal treasures is certainly evident, for many of the vendors do not pour out such treasures so easily, but only gather them. 58. Nor are they the merits

Although much of Protestant Reformation history focuses on movements in Germany, Switzerland, and France, during the 16th Century the Netherlands was the site of some of the earliest instances of pre-reformation religious dissent. During the 1520s, no "figurehead" led the movement in

the Netherlands; instead six theological tracts by six individual scholars voiced religious dissent. These dissenting theological ideas were based on either Northern Renaissance or Biblical Humanist scholarship—most notably Erasmus—or the writing and monastic students of Martin Luther. These tracts emphasized the need for renewed biblical study; spiritual rather than literal interpretations of the Medieval Church's rituals; re-evaluation of the status quo; and a revised interpretation of the authority of the

Pilgrims and Popes introduces the foundational fifteen hundred years of the history of Christianity, from Jesus to the eve of the Reformation. The crucial decisions of the first centuries have indelibly shaped the subsequent journey of the Christian faith movement. The book tells how the Christian faith story unfolded in dialectic movements: hegemony and emancipation; institutionalization and protest; petrification and renewal; missionary involvement in the world and separation from the world. The book bridges the gap between the present and the seemingly remote world of the first fifteen hundred years of Christianity in the West by engaging with present-day readers' cultures and contexts. The rich material is presented in an easily readable way, combined with charts and with questions for discussion and deepening reflection. This study book will be a welcome learning tool in

It is a commonly held belief that medieval Catholics were focussed on the 'bells and whistles' of religious practices, the smoke, images, sights and sounds that dazzled pre-modern churchgoers. Protestantism, in

contrast, has been cast as Catholicism's austere, intellectual and less sensual rival sibling. With its white-washed walls, lack of incense (and often music) Protestantism worship emphasised preaching and scripture, making the new religion a drab and disengaged sensual experience. In order to challenge such entrenched assumptions, this book examines Tudor views on the senses to create a new lens through which to explore the English Reformation. Divided into two sections, the book begins with an examination of pre-Reformation beliefs and practices, establishing intellectual views on the senses

in fifteenth-century England, and situating them within their contemporary philosophical and cultural tensions. Having established the parameters for the role of sense before the Reformation, the second half of the book mirrors these concerns in the post-1520 world, looking at how, and to what degree, the relationship between religious practices and sensation changed as a result of the Reformation. By taking this long-term, binary approach, the study is able to tackle fundamental questions regarding the role of the senses in late-medieval and early modern English Christianity. By looking at what

English men and women thought about sight, hearing, smell, taste and touch, the stereotype that Protestantism was not sensual, and that Catholicism was overly sensualised is wholly undermined. Through this examination of how worship was transformed in its textual and liturgical forms, the book illustrates how English religion sought to reflect changing ideas surrounding the senses and their place in religious life. Worship had to be 'sensible', and following how reformers and their opponents built liturgy around experience of the sacred through the physical allows us to

reformation in England and Wales, spanning over a century of literature and history, from the establishment of the national church under Henry VIII (1534), to its disestablishment under Oliver Cromwell (1653). It focuses on representations of ruined churches, monasteries, and cathedrals in the works of a range of English Protestant writers, including Spenser, Shakespeare, Jonson, Herbert, Denham, and Marvell, reading literature alongside episodes in English reformation history: from the dissolution of the monasteries and the destruction of church icons and images, to the puritan reforms of the 1640s. The study departs from previous responses to literature's 'bare ruined choirs', which tend to read writerly ambivalence towards the dissolution of the monasteries as evidence of traditionalist,

catholic, or Laudian nostalgia for the pre-reformation church. Instead, *Ruin and Reformation* shows how English protestants of all varieties—from Laudians to Presbyterians—could, and did, feel ambivalence towards, and anxiety about, the violence that accompanied the dissolution of the monasteries and other acts of protestant reform. The study therefore demonstrates that writerly misgivings about ruin and reformation need not necessarily signal an author's opposition to England's reformation project. In so doing, *Ruin and Reformation* makes an important contribution to cross-disciplinary debates about the character of English Protestantism in its formative century, revealing that doubts about religious destruction were as much a part of the experience of English protestantism as expressions

of popular support for iconoclasm in the sixteenth and seventeenth centuries.

Offers a concise synthesis of the valuable research accomplished in recent years which has transformed our view of religious belief and practice in pre-Reformation England.

The author argues that the church was neither in a state of crisis, nor were its members clamouring for change, let alone 'reformation' during the early years of Henry VIII's reign.
