

The Reformation To Industrial Revolution: 1530 1780; Volume 2 (Economic Hist Of Britain) (v 2)

The masterful account of Britain's reshaping as a modern nation In 1530 England was a backward economy. Yet by 1780 she possessed a global empire and was on the verge of becoming the world's first industrialized power. This book deals with the intervening 250 years, and explains how England acquired this unique position in history. Esteemed historian Christopher Hill recounts a story that begins with the break with Europe before hitting a tumultuous period of war and revolution, combined with a cultural and scientific flowering that made up the early modern period. It was in this era that Britain became home to imperial ambitions and economic innovation, prefiguring what was to come. Hill excavates the conditions and ideas that underpin this age of extraordinary change, and shows how, and why, Britain became the most powerful nation in the world.

In 1530 England was a backward economy, yet by 1780 she possessed a world empire and was just about to become the first industrialized power in the world. This book deals with the intervening 250 years, and tries to explain how England won her unique position in the world. This is a story that opens with the break with Europe and charts the tumultuous period of war, revolutions, and the a cultural and scientific flowering that made up the early modern period. Yet, during this period Britain also become the home to imperial ambitions and economic innovation. Hill excavates the conditions and ideas that underpin this age of extraordinary change, and shows how, and why, Britain became the most powerful nation in the world.

Reformation to industrial revolution, 1530-1780

Domestic Architecture from the Reformation to the Industrial Revolution

Revisited

1530-1780 Reformation to Industrial Revolution. Volume 2

This is a revised edition of Christopher Hill's classic and ground-breaking examination of the motivations behind the English Revolution and Civil War, first published in 1965. In addition to the text of the original, Dr Hill provides thirteen new chapters which take account of other publications since the first edition, bringing his work up-to-date in a stimulating and enjoyable way. This book poses the problem of how, after centuries of rule by King, lords, and bishops, when the thinking of all was dominated by the established church, English men and women found the courage to revolt against Charles I, abolish bishops, and execute the king in the name of his people. The far-reaching effects and the novelty of what was achieved should not be underestimated - the first legalized regicide, rather than an assassination; the formal establishment of some degree of religious toleration; Parliament taking effective control of finance and foreign policy on behalf of gentry and merchants, thus guaranteeing the finance necessary to make England the world's leading naval power; abolition of the Church's prerogative courts (confirming gentry control at a local level); and the abolition of feudal tenures, which made possible first the agricultural and then the industrial revolution. Christopher Hill examines the intellectual forces which helped to prepare minds for a revolution that was much more than the religious wars and revolts which had gone before, and which became the precedent for the great revolutionary upheavals of the future.

Britain 1485-1750

Fifteenth and sixteenth century Britain, Reformation to Industrial Revolution

Economic History of Britain

A Study of the Quaker Community in Four Industrial Counties, Lancashire, York, Warwick, and Gloucester, 1750-1830

Commemorating 500 years of Popes, Protestants, Reformers, Radicals and Other Assorted Irritants

500 years ago, Martin Luther nailed his ideas to a church door - and the Reformation began. Or maybe it was a little more complicated than that. Nick Page brings his skills as an unlicensed historian to bear on this key period in European (and world) history in order to uncover everything you need to know about the Reformation - with a fair few bits you never wanted to know thrown in for good measure. Historians tell us that the Protestant Reformation laid the foundations for the Industrial Revolution, religious freedom, and all sorts of other Good Things. But what actually happened? Who were the winners and the losers, the ogres and the beauty queens of this key moment in church history? (spoiler: there weren't any beauty queens) In-depth research, historical analysis and cutting-edge guesswork combine to scintillating effect in this fast-moving examination of the strange and wonderful whirlwind that was church life in late medieval Europe. 'You were predestined to read this.' John Calvin

This graphic depiction of a turbulent era in British history examines the lives of commoners and the nobility. The author combines vivid description with provocative argument to describe these exciting and dramatic events.

Intellectual Origins of the English Revolution

English Quakers and the First Industrial Revolution

The Making of Modern English Society

Scotland before the Industrial Revolution

Reformation to industrial revolution, by christopher hill

This splendid portrait of medieval and early modern Scotland through to the Union and its aftermath has no current rival in chronological range, thematic scope and richness of detail. Ian Whyte pays due attention to the wide regional variations within Scotland itself and to the distinctive elements of her economy and society; but he also highlights the many parallels between the Scottish experience and that of her neighbours, especially England. The result sets the development of Scotland within its British context and beyond, in a book that will interest and delight far more than Scottish specialists alone.

This illuminating collection of essays assesses the seventeenth century, interpreting what used to be called 'The Puritan Revolution', the ideas which helped to produce it and resulted from it, and the relation between these ideas and the political and economic events of the day. Each essay approaches the subject from a different angle, looking at aspects of the revolution - whether religious, constitutional, economic or biographical - in conjunction with a lively sympathy for the men who lived in that revolutionary time. Analysing the writings of Marvell, Hobbes, Harrington and Samuel Richardson, as well as less 'respectable' writers, Professor Hill examines the legacy of the Reformation and the inspiration provided by ideals like the Brotherhood of Man and the desire to re-create a pre-Norman Golden Age. A book that no serious student of our history should miss; it is a treasury of interesting detail and strong ideas. CV Wedgwood.

Domestic architecture from the Reformation to the Industrial Revolution. Farmhouses and cottages

Milton and the English Revolution

Renaissance, Revolution and Reformation

The Farmhouses and Cottages of Glamorgan from the Reformation to the Industrial Revolution

Few periods of English history have been so subject to 'revisionism' as the Tudors and Stuarts. This volume offers a full introduction to the complex historiographical debates currently raging about politics and religion in early modern England. It * draws together thirteen articles culled from familiar and also less accessible sources * embraces revisionist and counter-revisionist viewpoints * combines controversial works on both politics and religion * covers Tudor as well as early Stuart England * includes helpful glossary, explanatory headnotes and suggestions for further reading. These carefully edited and introduced essays draw on the new evidence of newsletters and ballads and ritual, as well as the more traditional sources, to offer a new and broader understanding of this transformative era of English history.
