"Prospective MBA students will find everything they need to prepare successful admission essays in this book. Containing 50 real essays students have written to gain admission to top business schools, this guide details the strengths of each essay, the inspiration of the student who wrote it, and what makes it a winner. The essays represent a diverse group of students and include those with traditional consulting and business backgrounds, as well as those with nontraditional backgrounds in areas such as public service, the military, and culinary arts. Crucial insights are included from business school admissions officers who reveal what they are looking for in applicants, and successful applicants describe what worked for them and the mistakes they made that future applicants should avoid. Also included are strategies for the entire admission process, such as how to research the type of students that each school is seeking, ace the interview, and get powerful recommendations!"

The Scholarship Handbook 2018 is organized to quickly lead students to real college funding opportunities, including scholarship, internship and loan programs offered by foundations, charitable organizations, and state and federal government agencies. Every entry is verified by the College Board to be legitimate, up-to-date, accurate, and portable to more than one college. This guide includes a planning calendar and worksheets to organize and keep track of scholarship applications. Indexes help students find programs by eligibility criteria—such as minority status, religious affiliation, state of residence and intended field of study—so they can quickly zero in on scholarships for which they qualify.

Provides a listing of over 1200 scholarships for minority groups and women, including application instructions, addresses, and deadlines

Kristina Ellis was awarded a full scholarship through her PhD. How she managed to get that kind of a scholarship offer is revealed in this book. Raised by a single mother, Kristina appeared to have everything stacked against her – years of living below the poverty level, imperfect grades and sub-par SAT scores. Yet Kristina discovered the secrets to effectively presenting herself as a unique and desirable scholarship candidate. And she's sharing her secrets for scholarship success with students (and their parents) so that they too can obtain money for college.

"Contextual in approach, this text draws on socio-economic and political studies as well as histories of religion, science, literature, and popular culture, and explores the diverse, conflicted history of American art and architecture. Thematically interrelating the visual arts to other material artifacts and cultural practices, the text examines how artists and architects produced artwork that visually expressed various social and political values."--Publisher's website.

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Provides students with a method for applying economic analysis to the study of legal rules and institutions. Four key areas of law are covered: property; contracts; torts; and crime and punishment. Added examples and cases help to clarify economic applications further.

With the entire world experiencing the global pandemic and its aftermath, VUCA (Volatile, Uncertain, Complex, and Ambiguous) conditions have never been more extreme and the need for adaptive leadership never more urgent. But how is adaptive leadership applied outside Western cultures? How can it be taught through leadership development programs? Which tools enhance its practice and its teaching? How does adaptive leadership relate to other key theories and practices? This volume answers these questions and more as it illustrates how adaptive leadership practices address some of the world’s most pressing challenges-political and cultural division, remote work, crisis management-across a variety of sectors. Adaptive leadership has been explained as a key leadership approach for dealing with adaptive, as distinguished from technical or predictable, problems, especially prevalent in complex environments. However, adaptive leadership scholarship has suffered from a lack of conceptual clarity and casual application of its core concepts. It remains solely Western in its prescriptions. This book will expand readers’ understanding of adaptive leadership and its potential to solve local and global adaptive challenges and will explore its relevance and application to cultures outside the United States. Aiming to increase conceptual clarity about adaptive leadership to enhance future scholarship and application and illustrate novel approaches and perspectives, this book will be of interest to researchers, academics, practitioners, and students in the fields of leadership, strategy, and organizational studies.

\$100,000 and Counting is a faith-based guide to winning college scholarships. It is an eclectic mix of academic advice, scriptural references, self-help principles, and a personal testimony. The power in utilizing both faith and works resides as the central theme. With conversational writing, the book provides a wealth of information on college planning even as it remains a Christian inspirational. Infused with counsel from college and scholarship professionals, it is also wrapped up in McLean’s personal testament of how her faith made way for God to provide over \$100,000 in scholarships for her college education. With a special focus on minority students, \$100,000 and Counting shares the resources and instruction regarding the college application and scholarships processes that many minorities feel disadvantaged in accessing. The book also includes a special guide for parents! \$100,000 and Counting is an invaluable asset for parents and students seeking guidance on how to receive scholarships in a society where college costs are increasing significantly each year.

Recent decades have seen unprecedented growth in the number of students travelling abroad for the purpose of short-term academic study. As such, attention is turning to the role that education abroad can have in enhancing student learning and producing global-ready graduates. This volume provides a succinct and accessible analysis of the existing research and scholarship around the world on a range of important areas related to contemporary education abroad, providing practitioners with important implications for programming and practice. Focusing on fourteen key topics relating to education abroad, this accessible desktop compendium not only synthesizes what is already known, but also indicates which topics need further research and how the existing literature can be applied to daily programming and practice. Extending beyond student learning outcomes to look at essential topics such as institutional outcomes, program models, and host community outcomes, this volume covers major trends in contemporary research as well as an assessment of the methodological and design challenges that are common to education abroad research. The fourteen distinct topics address the broad themes of participation, programming, student outcomes, institutional outcomes and societal outcomes, and include chapters from a broad range of widely acknowledged and respected international experts. Bridging the gap between scholarship and practice, this accessible guide is essential reading for anyone working in higher education today and involved in shaping and managing education abroad programs. It is useful for all who want to understand and leverage existing research to inform education abroad programming and practice.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

Book 1: Radical Scholarship

This book proposes a new paradigm of public scholarship for our time, one that shifts from the notion of the public intellectual to the model of the engaged scholar. The editors' premise is that the work of public scholarship should be driven by a commitment to supporting a diverse democracy and promoting equity and social justice. The contributors to this volume present models that eschew the top-down framing of policy to advocate for practice that drives bottom-up change by arming the widest range of stakeholders -- especially members of marginalized communities -- with relevant research. They demonstrate how public scholarship in higher education can increase its impact on practice and policy and compellingly argue that public scholarship should be recognized as normative practice for all scholars and indeed integrated into the curriculum of graduate courses. The chapters describe multiple types of public scholarship and different strategies that move beyond informing policymakers, faculty, and administrators to engage publics such as students and parents, media, the general public, and particularly groups that may have had little or no access to research. Examples include partnering with a community agency to design a research project and disseminate results; writing for practitioner or policy venues and magazines outside the traditional academic journals; serving on boards for national groups that impact decisions related to your area of research; and the use of social media. Whether scholar, director of graduate education, or graduate student of higher education, this book opens up a new vision of how research can inform practice that promotes the public good.

Shifting faculty roles in a changing landscape Ernest L. Boyer's landmark book Scholarship Reconsidered: Priorities of the Professoriate challenged the publish-or-perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic role of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how Scholarship Reconsidered applies today.

Contents include: Evaluations of each school's program and "personality" Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

Edgar Award Nominee For Best First Novel Named a New York Times Best Thriller of 2021 "I devoured this riveting book through a day of travel...My desire to rush to the end clashed with my desire to savor every word. Who would be the last psychopath standing?" – New York Times Book Review "Fresh, fast-paced and fiendishly clever! If you love watching true crime and wonder about the psychopaths among us, this is the book for you!" – Lisa Gardner, #1 New York Times bestselling author You should never trust a psychopath. But what if you had no choice? It would be easy to underestimate Chloe Sevres... She's a freshman honor student, a legging-wearing hot girl next door, who also happens to be a psychopath. She spends her time on yogalates, frat parties and plotting to

kill Will Bachman, a childhood friend who grievously wronged her. Chloe is one of seven students at her DC-based college who are part of an unusual clinical study of psychopaths—students like herself who lack empathy and can't comprehend emotions like fear or guilt. The study, led by a renowned psychologist, requires them to wear smart watches that track their moods and movements. When the student is found murdered in the psychology building, a dangerous game of cat and mouse begins, and Chloe goes from hunter to prey. As she races to identify the killer and put her own plan for revenge into action, she'll be forced to decide if she can trust any of her fellow psychopaths—and everybody knows you should never trust a psychopath.

Two decades after the publication of the first landmark scholarly collections on music and difference, musicology has largely accepted difference-based scholarship. This collection of essays by distinguished contributors is a major contribution to this field, covering the key issues and offering an array of individual case studies and methodologies. It also grapples with the changed intellectual landscape since the 1990s. Criticism of difference-based knowledge has emerged from within and outside the discipline, and musicology has had to confront new configurations of difference in a changing world. This book addresses these and other such challenges in a wide-ranging theoretical introduction that situates difference within broader debates over recognition and explores alternative frameworks, such as redistribution and freedom. Voicing a range of perspectives on these issues, this collection reveals why differences and similarities among people matter for music and musical thought.

The Thirteenth Tribe the Khazar Empire and Its Heritage

Research shows that enriching learning experiences such as learning communities, service-learning, undergraduate research, internships, and senior culminating experiences - collectively known as High-Impact Practices (HIPs) - are positively associated with student engagement; deep, and integrated learning; and personal and educational gains for all students - particularly for historically underserved students, including first-generation students and racially minoritized populations. While HIPs' potential benefits for student learning, retention, and graduation are recognized and are being increasingly integrated across higher education programs, much of that potential remains unrealized; and their implementation frequently uneven. Colleges are eager to use the HIP nomenclature for recruitment, promoting equity for traditionally underserved student populations, and preparing lifelong learners and successful professionals. However, HIPs defy easy categorization or standardized implementation. They rely on fidelity, quality, and consistency - being "done well" - to achieve their learning outcomes; and, above all, require attention to access and equity if they are to fulfill their promise of benefitting all student populations equally. The goal of Delivering on the Promise of High-Impact Practicess is to provide examples from around the country of the ways educators are advancing equity, promoting fidelity, achieving scale, and strengthening assessment of their own local high-impact practices. Its chapters bring together the best current scholarship, methodologies, and evidence-based practices within the HIPs field, illustrating new approaches to faculty professional development, culture and coalition building, research and assessment, and continuous improvement that help institutions understand and extend practices with a demonstrated high impact. For proponents and practitioners this book offers perspectives, data and critiques to interrogate and improve practice. For administrators it provides an understanding of what's needed to deliver the necessary support.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author" "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Mumtmen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

WINNER OF: Frantz Fanon Outstanding Book From the Caribbean Philosophical Association Canadian Political Science Association's C.B. MacPherson Prize Studies in Political Economy Book Prize Over the past forty years, recognition has become the dominant mode of negotiation and decolonization between the nation-state and Indigenous nations in North America. The term "recognition" shapes debates over Indigenous cultural distinctiveness, Indigenous rights to land and self-government, and Indigenous peoples' right to benefit from the development of their lands and resources. In a work of critically engaged political theory, Glen Sean Coulthard challenges recognition as a method of organizing difference and identity in Liberal politics, questioning the assumption that contemporary difference and past histories of destructive colonialism between the state and Indigenous peoples can be reconciled through a process of acknowledgment. Beyond this, Coulthard examines an alternative politics—one that seeks to revalue, reconstruct, and redeploy Indigenous cultural practices based on self-recognition rather than on seeking appreciation from the very agents of colonialism. Coulthard demonstrates how a "place-based" modification of Karl Marx's theory of "primitive accumulation" throws light on Indigenous-state relations in settler-colonial contexts and how Frantz Fanon's critique of colonial recognition shows that this relationship reproduces itself over time. This framework strengthens his exploration of the ways that the politics of recognition has come to serve the interests of settler-colonial power. In addressing the core tenets of Indigenous resistance movements, like Red Power and Idle No More, Coulthard offers fresh insights into the politics of active decolonization.

Such a Fun Age." --NPR A striking and surprising debut novel from an exhilarating new voice. Such a Fun Age is a page-turning and big-hearted story about race and privilege, set around a young black babysitter, her well-intentioned employer, and a surprising connection that threatens to undo them both. Alix Chamberlain is a woman who gets what she wants and has made a living, with her confidence-driven brand, showing other women how to do the same. So she is shocked when her babysitter, Emira Tucker, is confronted while watching the Chamberlains' toddler one night, walking the aisles of her local high-end supermarket. The store's security guard, seeing a young black woman out late with a white child, accuses Emira of kidnapping two-year-old Briar. A small crowd gathers, a bystander films everything, and Emira is furious and humiliated. Alix resolves to make things right. But Emira herself is aimless, broke, and wary of Alix's desire to help. At twenty-five, she is about to lose her health insurance and has no idea what to do with her life. When the video of Emira unearths someone from Alix's past, both women find themselves on a crash course that will upend everything they think they know about themselves, and each other. With empathy and piercing social commentary, Such a Fun Age explores the stickiness of transactional relationships, what it means to make someone "family," and the complicated reality of being a grown up. It is a searing debut for our times.

This author-pay model spreads across academic publishing, what are the possible consequences? Will the current rage for open-source scholarship actually accomplish anything other than shifting the furniture around on the Titanic? Will not Open Source in combination with Digital Humanities further destroy the very idea of "slow" and "thoughtful" work in humanistic studies?..It would seem that the author-pay model (formerly attributed to predatory publishers) is just another way of extracting tribute for the "pr stakes by enforcing research metrics and citations, in the public universities a practice that is primarily enforced by external "industrial" connections. Almost all public and private universities are heading toward measuring output with metrics-many academics now tailoring their CVs to show they are "important," mirroring the social-media campaigns of celebrities and politicians, and many universities now citing their own "corporate" rankings when promoting their product (the University, the Institute, the Department) who does not play the game. Individual, solitary scholars will have few options. Gavin Kenney, "Symptom A: The End," Knowledge, Spirit, Law Journal, Spring, Law - as project - is a de facto phenomenology of scholarship in the age of Cognitive Capitalism. The six essays (plus Appendices) presented here cover topics and circle themes related to the problems and crises specific to neo-liberal academia, while proposing creative paths around the various obstructions. The obstructions include metrics-obsessed academia

text- and data-mining, and violation by global corporate fiat of Intellectual Property Rights and the Moral Rights of Authors. These issues, while addressed obliquely in the main text, definitively inform the various implied proscriptive aspects of the essays and, via the Introduction and Appendices, underscore the necessity of developing new-old means to no obvious end in the production of knowledge - that is to say, a return to forms of non-instrumentalized intellectual inquiry. The Thirteenth Tribe is a ground breaking work of great importance, if only because it has shaped the way that people think about The Jews. It is based on the theory that European Jews, Ashkenazi Jews from Europe, are not descendants of Abraham but rather are the remnants of a tribe, the Khazars, that converted to Judaism in the Eighth Century. We know little about the Khazars, but we do know for certain that they existed and that they were Jewish. The Jews, Russians, Georgians and Armenians all wrote about the Khazars during the Dark Ages, a period from which few books survive today. Koestler's thesis is that while the Khazars as a unified tribe may have disappeared, their descendants survived, only that they were no longer known as the Khazars. Instead, these people are now Eastern European Jews and they continue to live in the same places where the Khazars lived such as in Kiev and Odessa. The view of Arthur Koestler who himself was Jewish is that none of the mass movements of the Jewish people happened because the Eastern European Jews are the Khazars. They are the same people. Just their name has been changed. Which is more logical: The Traditional Jewish view or Arthur Koestler's theory?
