

Vargic's Miscellany Of Curious Maps: The Atlas Of Everything You Never Knew You Needed To Know

The whole world is mapped out for your viewing pleasure in this captivating compendium, ranging from past to present through diverse themes of transport and technology to discoveries and development. Covering the classical maps of the ancient world and traveling through time to reach Google Earth in the 21st century, this unprecedented history of more than 60 maps opens up our planet as never before. Great Maps showcases early Medieval maps like including mappae mundi; iconic transport maps such as the London Underground; important travel maps including Dr. Livingstone's version of Africa; maps of natural wonders such as the ocean floor; and momentous moments including the marks on the Moon left by the lunar landings. There are maps that show the way to heaven, depict lands with no sunshine, and the mysterious home of "the people with no bowels" on this mind-blowing journey. Much more than just geographical data, maps are an accurate reflection of the culture and context of different time frames in history. British historian Jerry Brotton tells the amazing secret stories behind many of the most significant maps ever unearthed, revealing key features and innovative techniques in incredible detail. The unique insight into how mapmakers have expressed their world views results in this treasured book that makes a welcome addition to any bookshelf or home library.

*Lost in a book? There's a map for that. This incredibly wide-ranging collection of maps—all inspired by literary classics—offers readers a new way of looking at their favorite fictional worlds. *From the comedian behind the popular parenting blog *The Ugly Volvo* comes a refreshing spin on the baby milestone book. Instead of a place to lovingly capture the first time baby sleeps through the night, this book shows what it's like the first time baby rolls off the bed/sofa/changing table, leaving mom or dad in a state of pure terror (it happens). These 100 rarely documented but all-too-realistic milestones—such as *First Time Baby Says a Word You Didn't Want Her to Say*—provide comfort, solidarity, and comic relief for new parents. Laugh-out-loud relatable text and distinctive paper-cut illustrations of these "bad" parenting moments make this a must-have book for anyone entering the mysterious club of parenthood."*

The Sky Atlas unveils some of the most beautiful maps and charts ever created during humankind's quest to map the skies above us. This richly illustrated treasury showcases the finest examples of celestial cartography—a glorious art often overlooked by modern map books—as well as medieval manuscripts, masterpiece paintings, ancient star catalogs, antique instruments, and other curiosities. This is the sky as it has never been presented before: the realm of stars and planets, but also of gods, devils, weather wizards, flying sailors, ancient aliens, mythological animals, and rampaging spirits. • Packed with celestial maps, illustrations, and stories of places, people, and creatures that different cultures throughout history have observed or imagined in the heavens • Readers are taken on a tour of star-obsessed cultures around the world, learning about Tibetan sky burials, star-covered Inuit dancing coats, Mongolian astral prophets and Sir William Herschel's 1781 discovery of Uranus, the first planet to be found since antiquity. • A gorgeous book that delights stargazers and map lovers alike With thrilling stories and gorgeous artwork, this remarkable atlas explores our fascination with the sky across time and cultures to form an extraordinary chronicle of cosmic imagination and discovery. The Sky Atlas is a wonderful book for map lovers, history buffs, and stargazers, but also for those who are intrigued by the many wonderful and bizarre ways in which humans have sought to understand the cosmos and our place in it. • A unique map book that expands beyond the terrestrial and into the celestial • A wonderful book for map lovers, obscure-history fans, mythology buffs, and astrology and astronomy lovers • Great for those who enjoyed What We See in the Stars: An Illustrated Tour of the Night Sky by Kelsey Oseid, Maps by Aleksandra Mizielinska and Daniel Mizielinski, and Atlas of Remote Islands: Fifty Islands I Have Never Set Foot On and Never Will by Judith Schalansky

Joseph Gordon-Levitt's creative collaborative community HITRECORD looks at love from both sides in this ingenious flippable book. So, you just got dumped, huh? Or did you just dump someone? Doesn't matter who ended it. Either way, you're sleeping alone tonight. But don't worry, you're not really alone. HITRECORD's global community of over 750,000 active artists is here to help with The Art of Breaking Up, a new book designed to get you through this trying time. That's over 750,000 people who know the soul-crushing pain of a broken heart. But instead of wallowing forever in vats of unproductive (but delicious) cookie dough, they've channeled all that misery into an insightful, funny, and smart compendium of musings, photography, drawings, collages, puzzles, recipes, games, and more—designed to explore (and distract from) the mind-numbing agony of a romantic breakup. You'll laugh, you'll smile, and you'll probably cry. Everyone knows there are two sides to every break-up, so this book features a double-sided, flippable structure. One side eases the tortured consciences of the HEARTBREAKERS. Flip the book, and the other side considers the plight of the BROKEN-HEARTED. Both sides are organized chronologically with chapters that correspond to the emotional trajectory of both the HEARTBREAKER and BROKEN-HEARTED. Chapters include: Early Warning Signs, Exit Strategy, The Break Up, Acceptance, Depression, Bargaining, Anger, and Denial. Where the two sections meet in the middle there is a compelling, heart-wrenching moment where the HEARTBREAKER and BROKEN-HEARTED connect again, but we're not giving that away. Inside this book you'll find plenty of

art, stories, comics, and other amusements, such as a Post-Break-Up Relationship Survey, Denial Yoga, Candy Hearts for Assholes, Breakup Greeting Cards, Hex Your Ex Voodoo Doll, The Free Bird Word Search Game, and a playlist or two, including "Right Back at Ya," a collection of songs to stoke the burning rage in your heart. Everything you'll find in this book was made collaboratively by people from around the world on HITRECORD—an online creative platform for collaborative art and media projects founded and directed by Joseph Gordon-Levitt. With its universal, all-inclusive approach to the subject, *The Art of Breaking Up* is an acute observation of love and heartbreak in modern times, and maybe—just maybe—a salve for anyone with a broken heart.

An illustrated guide to 40 of the most well-known, surprising, notorious, mythical, and sublime non-human citizens of New York City, and love letter to its surprising ecological diversity. From refugee parrots and prodigal beavers to gorgeous Fifth Avenue hawks and vengeful groundhogs, *Wild City* tells the funny, quirky, and memorable stories of forty of New York City's most surprising nonhuman citizens. This unconventional wildlife guide and concise environmental history of the Big Apple includes tales of the well-known, notorious, and legendary creatures who are as much New Yorkers as their human counterparts. A celebration of some of the city's most surprising residents and a love letter to this always evolving metropolis, *Wild City* is an enchanting illustrated volume that is a must-have for every Big Apple devotee and animal lover.

A "fascinating" journey to little-known and contested lands around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (Geographical Magazine). What is a country? Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and "forgotten" peoples. "Engrossing . . . You'll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a 'real country.'"

—Seattle Times

World atlas containing 15 nautical charts, tables of declinations, etc. Probably made in Dieppe, France either by a Portuguese cartographer or based on a Portuguese prototype, judging from the Portuguese influence on the geographical names. Nicolas Vallard de Dipeppe was probably the first owner. Sir Thomas Phillipps also owned the original atlas. The charts include: Terra Java [east coast of Australia?] -- La Java [north coast of Australia?, East Indies and part of Asia] -- Terra Java [west coast of Australia?] -- [Arabian Sea, Red Sea, and Persian Gulf] -- [Southern Africa and southwest Indian Ocean] -- [Atlantic Ocean with the coast of Africa and Brazil] -- [Northwest Africa] -- [Europe and northern Africa] -- [North America and Canada, east coast] -- [West Indies, Mexico, Central America and northern South America] -- [Northeastern South America] -- [Southeastern South America and Straits of Magellan] -- [Western Europe and northwestern Africa] -- [Adriatic Sea] -- [Aegean Sea].

True to the spirit of 'Gavin Turk: The Artist' and punning on Margritte's famous visual puzzlement on the notion of representation, image and meaning 'The Treason of the Picture', 'This is not a book about Gavin Turk' is another layer, another set of images and texts which add to the communication of ideas in which the Artist is as present as he is absent and vice versa. Featuring extensive examples of Gavin's work, these powerful images will sit alongside a rich polylogue between art critics, novelists, cultural commentators, artists and psychoanalysts to produce a wonderfully anarchic, thought-provoking cacophony of voices pondering everything from the nature of celebrity to that of chewing gum, alongside the meaning of eggs, the cultural relevance of punk, the creative possibilities of theft and the insidious reductionism of "Brand You" as relevant to the art

connoisseur as the general reader.

Knowledge Is Beautiful

A FINANCIAL TIMES BOOK OF THE YEAR 2020 One of the least-known places on the planet, the only continent on earth with no indigenous population, Antarctica is a world apart. From a leading cartographer with the British Antarctic Survey, this new collection of maps and data reveals Antarctica as we have never seen it before. This is not just a book of traditional maps. It measures everything from the thickness of ice beneath our feet to the direction of ice flows. It maps volcanic lakes, mountain ranges the size of the Alps and gorges longer than the Grand Canyon, all hidden beneath the ice. It shows us how air bubbles trapped in ice tell us what the earth's atmosphere was like 750,000 years ago, proving the effects of greenhouse gases. Colonies of emperor penguins abound around the coastline, and the journeys of individual seals around the continent and down to the sea bed in search of food have been intricately tracked and mapped. Twenty-nine nations have research stations in Antarctica and their unique architecture is laid out here, along with the challenges of surviving in Antarctica's sunforgiving environment. Antarctica is also the frontier of our fight against climate change. If its ice melts, it will swamp almost every coastal city in the world. Antarctic Atlas illustrates the harsh beauty and magic of this mysterious continent, and shows how, far from being abstract, it has direct relevance to us all.

Puzzle aficionados needn't worry though, as there will also be an 'Even Harder' section to test everyone to their limits. Not only that, but in celebration of GCHQ's centenary, the puzzles in this new book will sit alongside stories, facts and photos from the organisation's first 100 years at the heart of the nation's security. From the Government Code & Cipher School, to Bletchley Park, through to protecting against cyberattacks, the security of our country is in the hands of GCHQ. With this book, you'll get exclusive snapshots into the organisation that keeps us all safe. Discover the mysteries within ancient maps – Where exploration and mythology meet This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. Mysteries within ancient maps: The Phantom Atlas is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. Where exploration and mythology meet: Author Edward Brooke-Hitching is a map collector, author, writer for the popular BBC Television program QI and a Fellow of

the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. Cartography's greatest phantoms: The Phantom Atlas uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as Prisoners of Geography, Atlas of Ancient Rome, Atlas Obscura, What If, Book of General Ignorance, or Thing Explainer, you will love The Phantom Atlas

Marvellous' John Lloyd, creator of QI 'Perfect for the armchair adventurer historian, this is a rich visual exploration of some of the most beautiful charts ever created' National Geographic 'Introduces us to a whole different way of looking at maps. Great illustrations, most engaging - the author is just a mine of information' Simon Mayo's Books of the Year The Golden Atlas is a spectacular visual history of exploration and cartography, a treasure chest of adventures from the chronicles of global discovery, illustrated with a selection of the most beautiful maps ever created. The book reveals how the world came to be known, featuring a magnificent gallery of exceptionally rare hand-coloured antique maps, paintings and engravings, many of which can only be found in the author's collection. Arranged chronologically, the reader is taken on a breathtaking expedition through Ancient Babylonian geography and Marco Polo's journey to the Mongol Khan on to buccaneers ransacking the Caribbean and the voyages of seafarers such as Captain Cook and fearless African pathfinders. Their stories are told in an engaging and compelling style, bringing vividly to life a motley collection of heroic explorers, treasure-hunters and death-dealing villains - all of them accompanied by eye-grabbing illustrations from rare maps, charts and manuscripts. The Golden Atlas takes you back to a world of darkness and peril, placing you on storm-lashed ships, frozen wastelands and the shores of hostile territories to see how the lines were drawn to form the shape of the modern world. The author's previous book, The Phantom Atlas, was a critically acclaimed international bestseller, described by Jonathan Ross as 'a spectacular, enjoyable and eye-opening read' and this new book is sure to follow suit.

Maps don't just show us where to go, but also where we've been. A stunning overview of all human history, side by side with 140 custom maps. Learn how something like the printing press can define a time, or how the Allies in Europe could defeat the Nazis. There is so much to read about in this remarkable history book, and just as much to look at. Maps are more than the topography of the

A remarkable, fascinating and beautiful visual guide to the world as you have never seen it. Vargic's Miscellany of Curious Maps is a wonderfully weird collection of meticulous and striking cartographic creations, such as the infamous Map of Stereotypes. Based on a Westerner's stereotypical view of the world, Slovakian artist and cartophile Martin Vargic assigns more than two thousand labels and prejudices to cities, states, countries, continents, oceans and seas on a large-scale, visually stunning world map, which alone took more than four months to create. The conceptual Map of the Internet and the Map of Sports are exquisite and surprising, and infographic maps showing the number of heavy-metal bands per capita, the probability of getting struck by lightning, average penis length, and the number of tractors per 1,000 inhabitants make it hard not to share with the person next to you. Including more than 70 maps, four foldout maps and two oversized removable posters, this book is a treasure trove of unexpected facts of our quirky, glorious and diverse big beautiful world.

A stunning full-color collection of inventive, poignant, humorous, and controversial maps of the world from the internationally recognized digital artist behind the stunning "Map of Stereotypes." Slovakian artist Martin Vargic rose to international fame in 2014 when his "Map of the Internet 1.0" went viral. Using old National Geographic maps as inspiration, he drew a striking and meticulous map of the most visited websites in the world, portraying Google, Yahoo, Microsoft, Amazon, and Apple as sovereign countries; the eastern continent as the "old world" with originators like Microsoft and IBM; and at the most southern tip, a forgotten wasteland of outdated and obsolete places of the past like You've Got Mail and Friendster. The extraordinary "Map of Stereotypes" is a cartogram based on a westerner's stereotypical view of the world that assigns more than two thousand labels and pop culture references to cities, states, countries, continents, oceans, and seas on a large-scale world map. Visually stunning and remarkably clever, both artworks generated notice worldwide. Beautiful, unique, and packed with intricate and brilliant details, Vargic's Miscellany of Curious Maps showcases this visual artist's rare talent as never before in a gorgeous edition sure to be treasured by fans. Along with eight exquisite and unexpected conceptual atlases, he has imagined The Music Map, The Map of YouTube, The Corporate World Map, and many more. An additional fifty mini-maps of the world display a diverse list of data, such as the number of heavy metal bands per capita, the probability of getting struck by lightning, average penis length, NSA surveillance rate, and number of tractors per 1,000 inhabitants. Extensively mapping various subjects from all corners of our modern civilization, Vargic's Miscellany of Curious Maps is a fresh and thoughtful look at Western culture that will spark conversation and continually surprise and fascinate readers.

Construction for Landscape Architecture

Construction for Landscape Architecture covers all aspects of landscape construction, giving a good understanding of building materials and assembly. It is heavily illustrated with specially commissioned, detailed construction drawings and has a strong emphasis on sustainability and good practice. At the end of the book there is an extensive glossary and an appendix of technical information.

Imagined as a sequel to the Old and New Testaments of the Bible, The Last Testament features visual accounts and stories of seven men around the world who claim to be the Second Coming of Jesus Christ. Building on biblical form and structure, chapters dedicated to each Jesus include excerpts of their scriptural testaments, laying out their theology and demands on mankind in their own words. Jonas Bendixsen takes at face value that each one is the true Messiah returned to Earth, to forge an account that is a work of apocalyptic journalism and compelling artistic imagination.

From dragons and serpents to many-armed beasts that preyed on ships and sailors alike, sea monsters have terrified mariners across all ages and cultures and have become the subject of many tall tales from the sea. Accounts of these creatures have also inspired cartographers and mapmakers, many of whom began decorating their maps with them to indicate unexplored areas or areas about which little was known. Whether swimming vigorously, gamboling amid the waves, attacking ships, or simply displaying themselves for our appreciation, the sea monsters that appear on medieval and Renaissance maps are fascinating and visually engaging. Yet despite their appeal, these monsters have never received

the scholarly attention that they deserve. In Sea Monsters on Medieval and Renaissance Maps, Chet Van Duzer analyzes the most important examples of sea monsters on medieval and Renaissance maps produced in Europe. Van Duzer begins with the earliest mappaemundi on which these monsters appear in the tenth century and continues to the end of the sixteenth century and, along the way, sheds important light on the sources, influences, and methods of the cartographers who drew or painted them. A beautifully designed visual reference work, Sea Monsters on Medieval and Renaissance Maps will be important not only in the history of cartography, art, and zoological illustration, but also in the history of the geography of the "marvelous" and of Western conceptions of the ocean.

For generations, the map has been central to how societies function all over the world. Cybercartography is a new paradigm for maps and mapping in the information era. Defined as "the organization, presentation, analysis and communication of spatially referenced information on a wide variety of topics of interest to society, cybercartography is presented in an interactive, dynamic, multisensory format with the use of multimedia and multimodal interfaces. Cybercartography: Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science. It argues for the centrality of the map as part of an integrated information, communication, and analytical package. This volume is a result of a multidisciplinary team effort and has benefited from the input of partners from government, industry and other organizations. The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives, including the humanities, social sciences including human factors psychology, cybernetics, English literature, cultural mediation, cartography, and geography. This new synthesis has intrinsic

value for industries, the general public, and the relationships between mapping and the development of user-centered multimedia interfaces. * Discusses the centrality of the map and its importance in the information era * Provides an interdisciplinary approach with contributions from psychology, music, and language and literature * Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice * Contains an interactive CD-Rom containing color images, links to websites, plus other important information to capture the dynamic and interactive elements of cybercartography
