The Color of Time spans more than one hundred years of world history—from the reign of Queen Victoria and the American Civil War to the Cuban Missile Crisis and the beginning of the Space Age. It charts the rise and fall of empires, the achievements of science, industrial developments, the arts, the tragedies of war, the politics of peace, and the lives of men and women who made history.This illustrated narrative is a collaboration between a gifted Brazilian artist and a New York Times bestselling British historian. Marina Amaral has created two hundred stunning images, using rare photographs as the basis for her full-color digital renditions. Dan Jones has written a narrative that anchors each image in its context and weaves them into a vivid account of the world that we live in today.A fusion of amazing pictures and well-chosen words, The Color of Time offers a unique—and often beautiful—perspective on the past.

Is that a hole in the side of rocks? Waves, leaves, clouds? A stained glass window? Or just an inviting group of lines and shapes? And what do you want to do with it? It's all up to you, and it doesn't matter what you decide. This coloring book is a no-pressure invitation - to play, explore, focus, dream, or rest. These abstract, mosaic-style doodles can stimulate your imagination, free you from constraints, and pull you into a whimsical world of color. " Perfection in short story form, I am in love with every single word Bolu Babalola has written. So rarely is love expressed this richly, this vividly, or this artfully. " —Candice Carty-Williams, international bestselling author of Queenie A vibrant collection of love stories from a debut author, retelling myths, folktales, and histories from around the world. A high-born Nigerian goddess, who has been beaten down and unappreciated by her gregarious lover, longs to be truly seen. A young businesswoman attempts a great leap in her company, and an even greater one in her love life. A powerful Ghanaian spokeswoman is forced to decide whether she should uphold her family' s politics or be true to her heart. In her debut collection, internationally acclaimed writer Bolu Babalola retells the most beautiful love stories from history and mythology with incredible new detail and vivacity. Focusing on the magical folktales of West Africa, Babalola also reimagines Greek myths, ancient legends from the Middle East, and stories from long-erased places. With an eye towards decolonizing tropes inherent in our favorite tales of love, Babalola has created captivating stories that traverse across perspectives, continents, and genres. Love in Color is a celebration of romance in all its many splendid forms. " Babalola ' s writing shines " —New York Times Book Review

A richly-told, personal quest across the ancient trade routes of West Africa, and the unforgettable story of a rare, luminous colour.

Follows Barney and his friends as they explore the world of colors. On board pages.

Gloriously pieced together, much like the fine garments it portrays, this colourful volume takes the reader on an international tour of indigo-coloured textiles, presenting a huge swathe of remarkable clothing, people and fabric. Catherine Legrand, who has spent over twenty years travelling and researching the subject, has a deep knowledge of the ancient techniques, patterns and clothing traditions that characterize ethnic textile design, knowledge that she deploys to great effect in seven chapters exploring the production of Indigo textiles throughout America, China, India, Africa, Central Asia, Japan and Laos/Vietnam, and the men and women behind them. This profusely illustrated photographic survey features more than 500 photographs, faithfully laid out to reproduce Catherine's actual travel notebooks, and is completed by specially commissioned drawings that provide close-ups on patterns and clothes.

"A stunning biography...[A] truly singular account of the American Revolution." —Amanda Foreman, author of A World on Fire Through an intimate narrative of the life of painter John Singleton Copley, award-winning historian Jane Kamensky reveals the world of the American Revolution, rife with divided loyalties and tangled sympathies. Famed today for his portraits of patriot leaders like Samuel Adams and Paul Revere, Copley is celebrated as one of America's founding artists. But, married to the daughter of a tea merchant and seeking artistic approval from abroad, he could not sever his own ties with Great Britain. Rather, ambition took him to London just as the war began. His view from abroad as rich and fascinating as his harrowing experiences of patriotism in Boston, Copley's refusal to choose sides cost him dearly. Yet to this day, his towering artistic legacy remains shared by America and Britain alike.

The Geography of Color

A kaleidoscopic exploration that traverses history, literature, art, and science to reveal humans' unique and vibrant relationship with color. We have an extraordinary connection to color—we give it meanings, associations, and properties that last millennia and span cultures, continents, and languages. In The World According to Color, James Fox takes seven elemental colors—black, red, yellow, blue, white, purple, and green—and uncovers behind each a root idea, based on visual resemblances and common symbolism throughout history. Through a series of stories and vignettes, the book then traces these meanings to show how they morphed and multiplied and, ultimately, how they reveal a great deal about the societies that produced them: reflecting and shaping their hopes, fears, prejudices, and preoccupations. Fox also examines the science of how our eyes and brains interpret light and color, and shows how this is inherently linked with the meanings we give to hue. And using his background as an art historian, he explores many of the milestones in the history of art—from Bronze Age gold-work to Turner, Titian to Yves Klein—in a fresh way. Fox also weaves in literature, philosophy, cinema, archaeology, and art—moving from Monet to Marco Polo, early Japanese ink artists to Shakespeare and Goethe to James Bond. By creating a new history of color, Fox reveals a new story about humans and our place in the universe: second only to language, color is the greatest carrier of cultural meaning in our world.

When a witch's curse takes away a beautiful princess's ability to see color, the princess must learn to find the true colors in her world in order to break the spell. 1856. Eighteen-year-old chemistry student William Perkin's experiment has gone horribly wrong. But the deep brown sludge his botched project has produced has an unexpected power: the power to dye everything it touches a brilliant purple. Perkin has discovered mauve, the world's first synthetic dye, bridging a gap between pure chemistry and industry which will change the world forever. From the fetching ribbons soon tying back the hair on every fashionable head in London, to the laboratories in which scientists first scrutinized the human chromosome under the microscope, leading all the way to the development of modern vaccines against cancer and malaria, Simon Garfield's landmark work swirls together science and social history to tell the story of how one colour became a sensation.
