that in any

method is to

all of the

be determined
that, for each

drawn, the
square of the
length of the
side opposite
the right
angle is about

equal to the
sum of the
lengths of the
squares of the
other two
sides. Another
method
requires the
availability
of a balance.

construct a
right-angled

square on each
side using a

Then cut out
the three
squares and

The square on
the hypotenuse
should balance
the other two.

important to God.
Humankind has
