Dawn of Awakening to Sacred Conscience by Art Aeon is a fictional narrative poem in tercet stanzas. It unfolds imaginary dialogues between the character Homer-Outis, the legendary ancient Greek author of the *Odyssey*, and the character Odysseus, the protagonist of the *Odyssey*, about what followed the Helen's crucial revelations of the evil human causes of the tragic Trojan War, in a numinous dream of the great epic poet. It consists of three parts. Book 5: *Pilgrimage to Troy*; Overcoming many formidable adversities, Odysseus and Penelope fulfilled eventually the Helen's last wish to be united with Paris in Troy even as ashes, but they were captured by new Trojan king Helenus. Book 6: *Dawn of a New Era*; In magnanimous foresights, Helenus set free his worst foe Odysseus to serve Aethon, the holy sage-priest at the shrine in Mt. Ida. Odysseus pursued a new life as a humble hermit under his revered mentor Aethon with sincere repentance of his past life and heartfelt devotion. Book 7: *Inner Awakening*; Odysseus learned from wise Aethon about the wisdom and theology of ancient Egypt. He realized that personified deities were not real entities but mere wishful illusions, created by humans in their minds with their marvellous and unique mental tools: the human languages. At this point, the character-listener Homer-Outis confesses to the character-narrator Odysseus in sincere penitence that he has been misled in proud vanity to follow guileful minstrels who abused hoax 'muses' as their poetic conceits to justify their travesties of absurd divine affairs. He vows to sing of the plain truth deep from his own conscience without the poetic conceit of hoax 'muses'. Odysseus and Homer-Outis become mysteriously transfigured into one enlightened being. At this moment, the imaginative great bard Homer-Outis wakes up from his numinous dream, inspired afresh to write a new epic poem: *An Odyssey into One's Own Sacred Conscience*. 'Dawn of Awakening to Sacred Conscience' is the final sequel to 'Reflections on the Trojan War' and to the preceding poem, 'Odysseus and Penelope'. They complete an imaginary narrative poem: *An Odyssey into One's Own Sacred Conscience*.

In 1913, President Woodrow Wilson signed legislation approving the construction of the O'Shaughnessy Dam to inundate the Hetch Hetchy Valley inside Yosemite National Park. This decision concluded a decade-long, highly contentious debate over the dam-and-reservoir complex to supply water to post-earthquake San Francisco, a battle that was dramatic, unsettling, and consequential. Hetch Hetchy: A History in Documents captures the tensions animating the long-running controversy and places them in their historical context. Key to understanding the debate is the prior and violent dispossession of Indigenous Nations from the valley they had stewarded for thousands of years. Their removal by the mid-nineteenth century enabled white elite tourism to take over, setting the stage for the subsequent debate for and against the dam in the early twentieth century. That debate contained a Faustian bargain: to secure an essential water supply for San Francisco meant the destruction of the valley that John Muir and others praised so highly. This contentious situation continues to reverberate, as interest groups now battle over whether to tear down the dam and restore the valley. Hetch Hetchy remains a dramatic flashpoint in American environmental culture. The Routledge Handbook of Indigenous Environmental Knowledge

"An exciting, rewarding puzzle." —PUBLISHERS WEEKLY Archaeologist Chuck Bender arrives with his family in Yosemite Valley to study the 150-year-old murders of a pair of gold prospectors in the midst of preparations for the annual Yosemite Slam rock-climbing competition and a reunion with his old climbing buddies. The trip quickly turns threatening when one climber never shows up, climbing equipment fails, and Chuck and his spouse, Janelle Ortega, are suspected in the shocking, present-day death of one of Chuck's former rock-climbing partners. Together, Chuck and Janelle race against time to solve the dual mysteries and prove their innocence—all while facing down a ruthless killer on the loose. The history of Yosemite National Park is as compelling as the waterfalls, monoliths, and peaks that have mesmerized visitors for more than a century. But what hikers see today in the iconic Yosemite Valley, as well as on the peaks in the high country and within the Mariposa Grove of Big Trees, is a world away from the place Native Americans once called Ahwahnee, and from what gold-seekers and mountain men looked upon in the park's earliest days. Historic Yosemite

National Park is a vibrant collection of stories about different aspects of Yosemite National Park's fascinating history, from the conservation works of pivotal characters such as writer John Muir and photographer Ansel Adams to the daring exploits of rock climbers and the natural forces that have shaped Yosemite's stunning vistas. These stories reveal why Yosemite National Park has inspired humankind for centuries.

"[A] fascinating and indispensable book."—Christopher Knight, Los Angeles Times Best Books of 2018—The Guardian Gold Medal for Contribution to Publishing, 2019 California Book Awards Carleton Watkins (1829–1916) is widely considered the greatest American photographer of the nineteenth century and arguably the most influential artist of his era. He is best known for his pictures of Yosemite Valley and the nearby Mariposa Grove of giant sequoias. Watkins made his first trip to Yosemite Valley and Mariposa Grove in 1861 just as the Civil War was beginning. His photographs of Yosemite were exhibited in New York for the first time in 1862, as news of the Union's disastrous defeat at Fredericksburg was landing in newspapers and while the Matthew Brady Studio's horrific photographs of Antietam were on view. Watkins's work tied the West to Northern cultural traditions and played a key role in pledging the once-wavering West to Union. Motivated by Watkins's pictures, Congress would pass legislation, signed by Abraham Lincoln, that preserved Yosemite as the prototypical "national park," the first such act of landscape preservation in the world. *Carleton Watkins: Making the West American* includes the first history of the birth of the national park concept since pioneering environmental historian Hans Huth's landmark 1948 "Yosemite: The Story of an Idea." Watkins's photographs helped shape America's idea of the West, and helped make the West a full participant in the nation. His pictures of California, Oregon, and Nevada, as well as modern-day Washington, Utah, and Arizona, not only introduced entire landscapes to America but were important to the development of American business, finance, agriculture, government policy, and science. Watkins's clients, customers, and friends were a veritable "who's who" of America's Gilded Age, and his connections with notable figures such as Collis P. Huntington, John and Jessie Benton Frémont, Eadweard Muybridge, Frederick Billings, John Muir, Albert Bierstadt, and Asa Gray reveal how the Gilded Age helped make today's America. Drawing on recent scholarship and fresh archival discoveries, Tyler Green reveals how an artist didn't just reflect his time, but acted as an agent of influence. This telling of Watkins's story will fascinate anyone interested in American history; the West; and how art and artists impacted the development of American ideas, industry, landscape, conservation, and politics. *Reflections on the Trojan War: Confessions of Sacred Human Conscience* is a fictional narrative poem in tercet stanzas. It unfolds the imaginary dialogues between the character Homer-Outis, the legendary ancient Greek author of the *Odyssey*, and the character Odysseus, the protagonist of the *Odyssey*, about the actual human causes of the enigmatic and tragic Trojan War (rather than its mythical attributions to the ungodly emotions of the Olympian goddesses and gods) in a numinous dream of the great epic poet. It consists of two parts: *Book 3: Regrets of Nestor and Odysseus* *Book 4: Final Revelations of Helen* "Reflections on the Trojan War: Confessions of Sacred Human Conscience" is a sequel to "Odysseus and Penelope: Following the Odyssey of Homer." They are the beginning and the middle parts of an imaginary narrative poem: *An Odyssey into One's Own Sacred Conscience*. [A] *Book 3: "Regrets of Nestor and Odysseus"* is a sequel to *Book 2: "Exile of Odysseus with Penelope"* in the preceding narrative poem; "Odysseus and Penelope: Following the Odyssey of Homer." It unfolds imaginary dialogues among the characters, Nestor, Odysseus, and Penelope about (1) the plausible human causes of the Trojan War; (2) what happened during its first nine years; and

(3) how Troy was actually sacked in the final tenth year of the War. [B] Book 4: "Final Revelations of Helen" is concerned with the following questions: (4) Why did Paris take a long voyage in a single ship from Troy to Achaea? (5) How did he meet with Helen, residing at Helos, a remote seaport in Sparta? (6) Why did Menelaus allow the alleged abduction of his wife Helen by a friendly foreign visitor Paris (who did not invade Helos with Trojan armada to abduct her)? (7) If Helen did elope with Paris to Troy, what were the actual reasons which impelled her to take such a dangerous, bold, and disgraceful action? The present fictional work attempts to look into the plausible human causes of the Trojan War behind the mythological veils of supernatural, inane, and absurd fables on the ungodly emotions of the Olympian goddesses and gods, conjured up by witless minstrels.

How referendums can diffuse populist tensions by putting power back into the hands of the people Propelled by the belief that government has slipped out of the hands of ordinary citizens, a surging wave of populism is destabilizing democracies around the world. As John Matsusaka reveals in Let the People Rule, this belief is based in fact. Over the past century, while democratic governments have become more efficient, they have also become more disconnected from the people they purport to represent. The solution Matsusaka advances is familiar but surprisingly underused: direct democracy, in the form of referendums. While this might seem like a dangerous idea post-Brexit, there is a great deal of evidence that, with careful design and thoughtful implementation, referendums can help bridge the growing gulf between the government and the people. Drawing on examples from around the world, Matsusaka shows how direct democracy can bring policies back in line with the will of the people (and provide other benefits, like curbing corruption). Taking lessons from failed processes like Brexit, he also describes what issues are best suited to referendums and how they should be designed, and he tackles questions that have long vexed direct democracy: can voters be trusted to choose reasonable policies, and can minority rights survive majority decisions? The result is one of the most

comprehensive examinations of direct democracy to date—coupled with concrete, nonpartisan proposals for how countries can make the most of the powerful tools that referendums offer. With a crisis of representation hobbling democracies across the globe, *Let the People Rule* offers important new ideas about the crucial role the referendum can play in the future of government.

Renowned naturalist John Muir is widely credited as being one of the important early figures in the conservation movement. In this series of essays, Muir introduces readers to the wonders of the majestic Yosemite region, a place he visited as soon as he arrived in America in 1868. The beauty of the area's mountains, lakes, and vistas inspired Muir to devote himself to nature and its preservation.

Let the People Rule

Homage to Socrates by Art Aeon is a fictional narrative song in tercet stanzas. It sings of an imaginary dialogue between the character Xanthippe, the widow of Socrates, and the character Plato, who visits Xanthippe soon after the execution of his revered mentor in Athens. The state of affairs in this story is the same as that in the *Phaedo* of the historic philosopher Plato (423–347 BCE): On his last day in the Athenian prison, what things Socrates discussed with his devoted friends, and how he met his death. But the content of the present fiction is substantially different from the *Plato's Phaedo*: The main topic of the *Plato's Phaedo* is about the Socrates' arguments for immortality of soul. In this fiction, the character Socrates is portrayed to discuss various topics: On the nature of death; On the meanings of mystic words such as, 'soul', 'immortality', 'god', 'muses', etc.; On the nature of justice; On the ethical problems of the Olympian gods as depicted by Homer, Hesiod, and other great Greek poets in their epics and

tragedies. Socrates introduces the profound and revolutionary philosophic ideas of Xenophanes (c. 570- c. 475 BCE) who criticized Homer and Hesiod for their portrayal of the Olympian gods as humanlike and immoral. After discussions on the impossibility for any human to know the true nature of deity, they examine the tragedy Prometheus Bound of Aeschylus (c. 525- c. 455 BCE) to discuss the topic of divine justice. In time, the jailor comes in, and sends away everyone except Xanthippe. Socrates takes a nap before his execution. When he wakes up, he relates to Xanthippe his mysterious last dream: How he happened to meet Prometheus, the compassionate savior of the mankind from the Zeus' plan of their extermination; how he repented to Prometheus for the people's vile bigotry of Zeus in disrespect of their savior; how he learned the deep mystery of the vast cosmic drama of the universe. At sunset, Socrates thanks Xanthippe for her devotion, prays to Athena for protection of his beloved family, and dedicates his spirit to Prometheus. Then he drinks the poison in composure, and meets his death in peace. Thus finishes Xanthippe her recollection of the final day of Socrates. Deeply moved, Plato vows to Xanthippe that he will devote his life to study what Socrates taught, and to immortalize his ideals by writing them into books for all mankind to study. Here ends this fictional narrative song: *Homage to Socrates.*

A Black boy's transformative day out in nature, recommended by Social Justice Books and We Are Kid Lit Collective Rodney is that kid who just can't sit still. He's inside, but he wants to be outside. Outside is where Rodney always wants to be. Between school and home, there is a park. He knows all about that park. It's that triangle-shaped place with the yellow grass and two benches where grown-ups sit around all day. Besides, his momma said to stay away from that park. When Rodney finally gets a chance to go to a real park, with plenty of room to run and climb and shout, and to just be himself, he will never be the same.

Authors Michael P. Ghiglieri and Charles R. Butch Farabee draw on their extensive experience in professional wilderness guiding (34 years) and in wilderness Search & Rescue in the National Park Service (34 other years), respectively, to research and create detailed and compelling stories for every known fatal mishap in Yosemite's complicated recreational wonderland. These sagas span the era from Yosemite's discovery in 1849 today when big wall climbing, BASE jumping, and tumbles off Yosemite's huge waterfalls take such tolls. All 869 mishaps are included; more than 100 are highlighted in dramatic detail and historical context. This book could save your life.

So Small! Yosemite

Rockclimbing Yosemite Valley

It's the little things that matter in this whimsical romp in Yosemite
National Park. A bear and a chickaree help the youngest visitors
notice tiny natural treasures, like a wee Sierra Nevada yellow-legged
frog, a dainty alpine shooting star, a surprisingly teensy giant
sequoia cone, and more. Small children will appreciate that everyone,
even a bear, feels small in the big park. And at the end of a busy day
it's best to leave only little footprints in beautiful Yosemite.

This volume provides an overview of key themes in Indigenous
Environmental Knowledge (IEK) and anchors them with brief but well-
grounded empirical case studies of relevance for each of these themes,
drawn from bioculturally diverse areas around the world. It provides
an incisive, cutting-edge overview of the conceptual and philosophical
issues, while providing constructive examples of how IEK studies have

been implemented to beneficial effect in ecological restoration, stewardship, and governance schemes. Collectively, the chapters in the Routledge Handbook of Indigenous Environmental Knowledge cover Indigenous Knowledge not only in a wide range of cultures and livelihood contexts, but also in a wide range of environments, including drylands, savannah grassland, tropical forests, mountain landscapes, temperate and boreal forests, Pacific and Indian Ocean islands, and coastal environments. The chapters discuss the complexities and nuances of Indigenous cosmologies and ethno-metaphysics and the treatment and incorporation of IEK in local, national, and international environmental policies. Taken together, the chapters in this volume make a strong case for the potential of Indigenous Knowledge in addressing today's local and global environmental challenges, especially when approached from a perspective of appreciative inquiry, using cross-cultural methods and ethical, collaborative approaches which limit bias and inappropriate extraction of IEK. The book is a guide for graduate and advanced undergraduate teaching, and a key reference for academics in development studies, environmental studies, geography, anthropology, and beyond, as well as anyone with an interest in Indigenous Environmental Knowledge.

For decades, administrations of both political parties have used cost-benefit analysis to evaluate and improve federal policy in a variety of areas, including health and the environment. Today, this model is under grave threat. In *Reviving Rationality*, Michael Livermore and Richard Revesz explain how Donald Trump has destabilized the decades-long bipartisan consensus that federal agencies must base their decisions on evidence, expertise, and analysis. Administrative agencies are charged by law with protecting values like stable financial markets and clean air. Their decisions often have profound consequences, affecting everything from the safety of workplaces to access to the dream of home ownership. Under the Trump administration, agencies have been hampered in their ability to advance these missions by the conflicting ideological whims of a changing cast of political appointees and overwhelming pressure from well-connected interest groups. Inconvenient evidence has been ignored, experts have been sidelined, and analysis has been used to obscure facts, rather than inform the public. The results are grim: incoherent policy, social division, defeats in court, a demoralized federal workforce, and a loss of faith in government's ability to respond to pressing problems. This experiment in abandoning the norms of good governance has been a disaster. *Reviving Rationality* explains how and why our government has abandoned rationality in recent years, and why it is so important for future administrations to restore rigorous cost-benefit analysis if we are to return to a policymaking approach that effectively tackles the most pressing problems of our era.

They didn't start out as environmental warriors. Clair Patterson was a geochemist focused on determining the age of the Earth. Herbert Needleman was a pediatrician treating inner-city children. But in the chemistry lab and the hospital ward, they met a common enemy: lead. It was literally everywhere—in gasoline and paint, of course, but also in water pipes and food cans, toothpaste tubes and toys, ceramics and cosmetics, jewelry and batteries. Though few people worried about it at the time, lead was also toxic. In *Toxic Truth*, journalist Lydia Denworth tells the little-known stories of these two men who were among the first to question the wisdom of filling the world with such a harmful metal. Denworth follows them from the ice and snow of Antarctica to the schoolyards of Philadelphia and Boston as they uncovered the enormity of the problem and demonstrated the irreparable harm lead was doing to children. In heated conferences and courtrooms, the halls of Congress and at the Environmental Protection Agency, the scientist and doctor were forced to defend their careers and reputations in the face of incredible industry opposition. It took courage, passion, and determination to prevail against entrenched corporate interests and politicized government bureaucracies. But Patterson, Needleman, and their allies did finally get the lead out - since it was

removed from gasoline, paint, and food cans in the 1970s, the level of lead in Americans' bodies has dropped 90 percent. Their success offers a lesson in the dangers of putting economic priorities over public health, and a reminder of the way science-and individuals-can change the world. The fundamental questions raised by this battle-what constitutes disease, how to measure scientific independence, and how to quantify acceptable risk-echo in every environmental issue of today: from the plastic used to make water bottles to greenhouse gas emissions. And the most basic question-how much do we need to know about what we put in our environment-is perhaps more relevant today than it has ever been. For decades, American cities have experimented with ways to remake themselves in response to climate change. These efforts, often driven by grassroots activism, offer valuable lessons for transforming the places we live. In *From the Ground Up: Local Efforts to Create Resilient Cities*, design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities. She shows how, from the ground up, we are raising the bar to make cities places in which we don't just survive, but where all people have the opportunity to thrive. The efforts discussed in the book demonstrate how urban experimentation and community-based development are informing long-term solutions. Sant shows how US cities are reclaiming their streets from cars, restoring watersheds, growing forests, and adapting shorelines to improve people's lives while addressing our changing climate. The best examples of this work bring together the energy of community activists, the organization of advocacy groups, the power of city government, and the reach of federal environmental policy. Sant presents 12 case studies, drawn from research and over 90 interviews with people who are working in these communities to make a difference. For example, advocacy groups in Washington, DC are expanding the urban tree canopy and offering job training in the growing sector of urban forestry. In New York, transit agencies are working to make streets safer for cyclists and pedestrians while shortening commutes. In San Francisco, community activists are creating shoreline parks while addressing historic environmental injustice. *From the Ground Up* is a call to action. When we make the places we live more climate resilient, we need to acknowledge and address the history of social and racial injustice. Advocates, non-profit organizations, community-based groups, and government officials will find examples of how to build alliances to support and embolden this vision together. Together we can build cities that will be resilient to the challenges ahead.

Aliens. Ley lines. Water dowsing. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it's arguing about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In *Weird Earth: Debunking Strange Ideas About Our Planet*, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity's most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology--hollow earth, expanding earth, and bizarre earthquakes--and mystical and paranormal happenings--healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophecies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero's *Weird Earth* examines each conspiracy and myth and leaves no question unanswered.

DU FU and a New Pupil by Art Aeon is a fictional narrative song about the poetry and life of Du Fu (712-770), the great Chinese poet, revered as the 'Poet-saint'. It unfolds imaginary dialogues between Du Fu and a fictional character, called 'Bright Moon': an earnest young admirer of Du Fu, who visits the sick frail poet, stranded on his worn boat-hut adrift the Yangtze River on his final day. Entreated by Bright Moon, who wishes to be his new pupil, Du Fu reminisces about his happy youth, how he studied poetry, and recites classic poems of Li Bai (701-762), Wang Wei (701 -761), and Tao Yuan Ming (365-427) for his new pupil to appreciate. Du Fu relates to the new pupil his indignations, frustrations, agonies and utter despairs on vile corrupted rulers and his sincere compassionate sympathy for the helpless, innocent common people by recounting his own experiences, which he had bravely revealed in his heart-rending and moving ballads. Suddenly sick and frail Du Fu collapses and swoons. When he recovers, he relates his mysterious dream to his elated pupil: Li Bai came to see Du Fu on his boat; they celebrated their blissful reunion by exchanging poetic chants. The full moon was rising on the Yangtze River. All of sudden, Li Bai jumped off the skiff, as if he tried to soar up to the moon. Then Du Fu awoke from the strange dream. When he finishes recalling his dream, a bright shooting star falls down, stunning the meek pupil. Du Fu gently passes away, blessing Bright Moon to write pure earnest poems heart and soul.
