

A Courthouse Conservation Handbook

This report examines some of the uses local governments have found for their old public buildings, some of the techniques that can help to support and encourage recycling, and some of the issues surrounding the recycling of particular types of buildings.

Helps managers, planners and field staff set and comply with Forest Practices Code standards for management of riparian management areas (RMAs).

An Annotated Bibliography : Volumes I and II

The Turret Clock Keeper's Handbook (New Revised Edition)

100 Courthouses

*A Report on North Carolina Judicial Facilities
Report*

Goochland County Courthouse

Describes and pictures buildings and places throughout the United States deemed worthy of preservation, and explains ways in which architecturally valuable structures and cities have been saved.

The Turret Clock Keeper's Handbook is a book specifically for those who look after a mechanical turret (tower) clock in a church, town hall, courthouse, stable block or public building. Information is presented in a clear concise manner and technical terms are explained. A turret clock keeper is taken through winding, setting to time, regulation and altering for summer and winter times. There is information on the history of turret clocks plus an explanation of the various frames, escapements, dials etc that can be encountered. A section on maintenance outlines what is expected but deliberately does not give a do-it-yourself guide. Restoration and conservation is covered along with conservation terminology and suggestions on finding a suitable restorer. Health & safety is discussed and a check list of suggested issues is given so that keepers can produce their own safety assessment. The Handbook has evolved from a previous edition first published in 1998. The New Revised Edition is almost twice the size and in a larger easy-to-read format. Many line drawings illustrate the text. The Keeper's Handbook focuses on clocks in the United Kingdom and there are many references to church clocks. Details are given of procedures in the Church of England to apply for major work being carried out on a turret clock. A short section outlines some issues on collecting turret clocks. Book size is A4, runs to 84 pages and has over 60 line illustrations. The book is perfect bound with a laminated cover. Contents of the Turret Clock Keeper's Handbook

Vols. for 1975- include publications cataloged by the Research Libraries of the New York Public Library with additional entries from the Library of Congress MARC tapes.

With the United States on the way to becoming an almost completely urban nation, the financing of cities has become an issue of great urgency; put simply, American cities do not have enough money. This book examines the role of local fiscal policies and fiscal politics in late nineteenth- and early twentieth-century America.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Tells the story of Robert E. Lee's surrender at Appomattox Court House, which ended the Civil War, and the battles fought in the days before it. Also contains essays on events leading up to the Civil War and the implications of Appomattox for the post-Civil War generation, and a tourist's guide to the park.

Because the subject for historic building interiors is so diverse, this annotated bibliography is not comprehensive, but selective in nature, and thus, may not list all of the references published on a specific topic. Includes those publications that are generally available in print or readily accessible in libraries. Covers: general and historical studies; conservation and maintenance; paint; plaster; metals; textiles; wallcoverings; floors and floor coverings; and wood. Also, includes systems and fixtures; rehabilitation case studies; inspection, evaluation and planning; and safety, fire protection, building codes and accessibility.
