Thought experiments are tools philosophers and scientists use to investigate how things are, without actually having to go out and experiment in the real world. This book presents forty-two philosophical thought experiments. Each thought experiment is illustrated by De Cruz (who is an illustrator as well as a philosopher), and is summarized in one or two paragraphs, which is followed by a brief exploration of its significance. Each thought experiment also includes a longer (approximately 2-page) reflection, written by a philosopher who is a specialist in the field. De Cruz's unique illustrations serve as visual and accessible starting points for classroom discussions in Intro to Philosophy courses.

Matt is six years old when he discovers that he is different from other children and other people. To most, Matt isn't considered a boy at all, but a beast, dirty and disgusting. But to El Patron, lord of a country called Opium, Matt is the guarantee of eternal life. El Patron loves Matt as he loves himself - for Matt is himself. They share the exact same DNA. As Matt struggles to understand his existence and what that existence truly means, he is threatened by a host of sinister and manipulating characters, from El Patron's power-hungry family to the brain-deadened eejits and mindless slaves that toil Opium's poppy fields. Surrounded by a dangerous army of bodyguards, escape is the only chance Matt has to survive. But even escape is no guarantee of freedom... because Matt is marked by his difference in ways that he doesn't even suspect.

'MEIN KAMPF' is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF' was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany's deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany. The books narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Second volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and 'public statements' constitute a partial revision of his book and are to be taken as such. Also, the author has translated Hitler's ideal, the Volkischer Staat, as the People's State. The author has tried his best making German Vocabulary easy to understand. You will never be satisfied until go through the whole book. A must read book, which is one of the most widely circulated and read books worldwide.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

The Shades of Magic Series

In clear, impassioned prose, Enrico Manicardi analyzes the evils of our age from their genesis. This or that economic, technological or cultural model is not to blame for our current crisis; the blame lies with economics, technology and culture as such. It is the ideology of fear that makes us afraid. It is the mentality of domination that jeopardizes all of our relationships. In short, the problem is civilization. Through its oppressive classes, values and processes that pervade everyone's life, civilization domesticates us, weakens our perceptiveness and distances us from the living world. We must radically change our way of thinking, feeling and behaving before it's too late—we must dam the flood of devitalization that is washing over us, and return to our wilder natures, both inside and outside ourselves. Manicardi's appeal is crystal clear: if we are to survive we must begin to search inside ourselves, not to celebrate the distant past as if it were a cult, but to return to ourselves, to grip life with our own two hands, and build upon that earlier ecocentric conscience which once held the place of the egocentric conscience now leading us astray. Enrico Manicardi was born in 1966 and is a member of La Scintilla, the Society for Libertarian Culture of Modena. A lawyer and founder of the antiauthoritarian media project "Infection," he has also played guitar and written music for an eponymous band since the 1980s. His lifelong wish has been to live in a free, radically off-kilter, ecologically sound world, one characterized by warm, spontaneous, non-hierarchical relationships rather than those consecrated by the cult of technology. Troubled by the way people have succumbed to a civilization that estranges, domesticates and regulates everything and everyone, he continues to protest against the modern world's project to enslave us. This book augurs the rise of an increasingly harmonious chorus loud enough to put an end to that project.

Statistical Rethinking

A Shade of Vampire 16

Statistical Rethinking: A Bayesian Course with Examples in R and Stan builds readers' knowledge of and confidence in statistical modeling. Reflecting the need for even minor programming in today's model-based statistics, the book pushes readers to perform step-by-step calculations that are usually automated. This unique computational approach ensures that readers understand enough of the details to make reasonable choices and interpretations in their own modeling work. The text presents generalized linear multilevel models from a Bayesian perspective, relying on a simple logical interpretation of Bayesian probability and maximum entropy. It covers from the basics of regression to multilevel models. The author also discusses measurement error, missing data, and Gaussian process models for spatial and network autocorrelation. By using complete R code examples throughout, this book provides a practical foundation for performing statistical inference. Designed for both PhD students and seasoned professionals in the natural and social sciences, it prepares them for more advanced or specialized statistical modeling. Web Resource The book is accompanied by an R package (rethinking) that is available on the author's website and GitHub. The two core functions (map and map2stan) of this package allow a variety of statistical models to be constructed from standard model formulas.
