

A Taxonomic Revision Of The South African Endemic Genus

Excerpt from A Taxonomic Revision of the Leptodactylid Frog Genus *Syrrhophus* Cope I have profited from discussions concerning this problem with several per sons, most notably William E. Duellman, Hobart M. Smith, Edward H. Taylor and Charles F. Walker. Nevertheless, the ideas and conclusions presented here should not be construed as necessarily reflecting their Opinions. David M. Dennis executed all of the figures, and my wife, Marsha, typed the manuscript. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

A Taxonomic Revision of the Vivianiaceae

Cacao and Its Allies

A Taxonomic Revision of the Terrestrial and Aquatic Aroids (Araceae) in Java

A Taxonomic Revision of the Tropaeolaceae

A Taxonomic Revision of the Rodent Genus *Phyllotis*

The species *Blepharis* forms a vital part of the flora of tropical and South Africa, many species being economically important fodder plants, despite their spiny habit. This monograph describes all 126 recognised species (35 as new), illustrates 59 of them, and contains 48 distribution maps.
