***Pain, especially chronic pain, is a major health care problem, a fact that has precipitated a recent dramatic expansion in pain-related research efforts. This revised edition of Dr Welden Bell's classic text has been updated to incorporate the latest findings from these studies, including advanced understanding of the neurophysiology and central processing of pain and the resulting changes to diagnostic, classification, and treatment guidelines. To assist clinicians in the difficult and often complicated task of managing patients suffering from oral and facial pain, this textbook provides documented information concerning pain and pain behavior so that one may better understand what pain is, how it behaves, and how it might best be managed; develops a useful classification of orofacial pain disorders; offers practical diagnostic criteria by which the different orofacial pain disorders can be identified on a clinical level; and suggests guidelines for the effective management of patients who suffer from pain in the region of the mouth and face. The concepts and techniques discussed are supplemented with case reports as well as new, full-color photographs and illustrations to help the clinician better understand orofacial pain disorders and how to treat them effectively.***

The authors of this oral rehabilitation text advocate the controversial Twin-Stage Procedure which they discovered, explaining that it provides the means to control the amount of disocclusion that average doctors using previous procedures have been unable to control. The results of the Twin-Stage Procedure produce precise disocclusion without the measurement of condylar path, and follow gnathological principles of scientifically-supported patient treatment. Topics include the articulator, the Twin-Stage Procedure, clinical evaluation test, full mouth reconstruction, fixed restorations and occlusal adjustment, and occlusion for osseointegrated implants. Contains mathematical formulae for analyzing mandibular movement. Annotation copyrighted by Book News, Inc., Portland, OR
