Can the movements of Jupiter, Saturn and Uranus affect market cycles? Are prices swings on the Dow Jones Industrial Average and the S&P 500 a reflection of lunar and planetary placements? Many people are surprised to find that changes in price trends on the financial markets are a reflection of the changing psychological emotions of market participants. Our emotions are impacted by the varying gravitational pulls and energy levels in our planetary cosmos. Scientific techniques such as square root mathematics, the Golden Mean, the Golden Sequence and astrological phenomena like lunar events, planetary transits and planetary aspects can thus be used to identify short term changes in price trend and long term market cycles. In the early part of the 20th century many successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter understood that emotion was intimately linked to the forces of nature. They used these scientific techniques and astrological phenomena to predict changes to price trend and to profit from the markets. The Lost Science will acquaint you with an extensive range of astrological and mathematical phenomena. From the Golden Mean and Fibonacci Sequence through planetary transit lines and square roots to an examination of lunar astrology, planetary aspects and market cycles, the

Plan your investment strategy based on long-term economic and market outlook. Add commodity markets to your understanding of financial astrology. See when six major markets might make highs and lows through 2020. Written for those who might be unfamiliar with either commodities or astrology, Susan includes "101" chapters on each topic, as well as an astrological glossary. In addition, she covers how astrology can help you discover which markets you might be most attuned to trading. When *Markets Peak and Bottom* Susan researched six major commodity futures markets—S&P 500, Gold, Soybeans, Crude Oil, Euro FX and U.S. 10-year T-notes—and their connection to astrological transits, the ever-changing position of planets in the sky. To her delight, she found that each market showed tendencies to make important price highs and price lows when certain planets made certain connections to the horoscope chart cast for when each market began trading. This breakthrough research in the commodity markets required having the exact first-trade time and date. Susan obtained those dates and times with painstaking digging into exchange and news archives that sometimes revealed typos and errors in publicly available government documentation. This is where Susan's 40-year career in the commodity

The financial markets are inexorably influenced by Astrology. New Moons, Mercury Retrograde, Venus Retrograde, Planetary Declination, Superior Conjunctions, Elongations and Natal Transits all variously bear curious alignments to short term and long term trend changes on stocks, indices and commodity futures. This connection between Astrology and the markets is not new. In the early years of the 20th century the most successful traders on Wall Street, including the venerable W.D. They repeatedly used their knowledge of Astrology to profitably trade the markets at certain key astrological dates when price fluctuations and trend changes were most likely to occur. This 2019 Financial Astrology Almanac provides the reader with key astrological dates to watch for each month. These dates align to particular astrological occurrences that have been shown time and again to have a high propensity to result in trend changes on stocks, market indices and commodity futures. These key dates have been determined using exactly the same analytical process that Gann and McWhirter would have used. This Almanac then goes deeper to present the reader with critical Quantum Price Lines for various market indices and commodity futures for 2019. "Let's face it. Traders in the stocks, futures, options, or FOREX markets are dead meat if they aren't profiting from the astro-trading advantage!" That's what Tim Bost, editor of *FinancialCyclesWeekly.com* newsletter and author of *Mercury, Money and the Markets*, says it takes to survive in today's increasingly treacherous trading environment. "I've been working with planetary factors in market timing for over a quarter of a century," he says, "and I've never seen the odds stacked against individual traders more than they are now. To compete with market manipulation on a massive scale and the onslaught of high-frequency trading robots, you've got to have market timing tools that give you the agility and tactical superiority of a trading guerrilla. "That's what astro-trading is all about, and that's the focus in *Mercury, Money and the Markets*. It's aimed at short-term swing traders who want to level the playing field with high-precision, back-tested timing methods that most market players haven't

even heard about!" In *Mercury, Money and the Markets*, Bost reveals the impact of Mercury cycles on price trends and reversals in equities, precious metals, and international markets on 5 continents. He also provides detailed analysis of 30 major blue-chip stocks, showing the individual idiosyncrasies in their responses to repeating Mercury cycles. With dozens of charts and examples throughout the book, he makes a compelling case for the importance of this often-overlooked component of financial astrology, elevating it to a new level as a powerful market timing tool that can make the difference between disaster and success in high-pressure trading. But Tim Bost doesn't stop there. He understands that effective trading involves more than just knowledge of the markets and correct analysis of trading opportunities-- it also requires sufficient self-awareness to be able to maintain emotional equanimity under fire. So he adds plenty of unique information here about how astro-traders can use Mercury to better understand their personal horoscopes, gaining higher degrees of trading confidence. It's a perspective unavailable from any other source. Because he's a pioneering astrological researcher as well as an active trader and trading coach, Tim Bost has uncovered significant planetary dynamics to take this advanced astro-trading sourcebook far beyond the common material found in most books on stock market astrology. It includes

transneptunian factors, 90-degree dial analysis, nontraditional planetary angles and a great deal more. And it features tips on deciphering the trading code in W. D. Gann's strangest book, the role of Mercury in First-Trade horoscope analysis, and the money-making truth about the times when Mercury is retrograde. Mercury, Money and the Markets is also a book with lots of charm and intelligence. Bost is an excellent storyteller, so he makes the effects of Mercury come alive with examples from business, the markets, and personal experience. He also contributes his scholarly skill to this book, dipping back into the myths of antiquity to revive an ancient esoteric text that has surprising effectiveness in precisely timing trades today! This is a book to read and enjoy, and a valuable text filled with big payoffs for the active short-term trader. But it's also a book that you'll come back to again and again, since it features a unique cross-indexed Mercury Station Ephemeris that spans 201 years. In other words, while it's packed with energy and information you can use today for immediate profit, it has a long shelf life, too! If you're an astrologer looking for a way to make money, this may not be the book for you, since it's loaded with brass-tacks, down-to-earth insights about what it actually takes to profit from astro-trading. It will stretch your awareness well past the limits of what you thought astrology was all about. But if you're a trader who

needs an extra edge, then run, don't walk. Ancient strategies provide a valuable link to enhance your ability to survive and prosper in modern financial markets. In this fascinating book, experienced trader and best-selling author Daryl Guppy explains how The 36 Strategies of the Chinese are applied to trading financial markets. In trading there is rarely a single answer to any trading situation. The best answer, and its effective application, depends on the trader. The strategies by themselves do not guarantee success. The trader's skill in analyzing and assessing the situation determines how effective he is in selecting and applying the right strategy. Guppy was introduced to the book of The 36 Strategies of the Chinese by a Chinese friend. An ancient and classic text, it is a compilation of political and military strategies dating back more than 1800 years, drawn from classic Chinese poetry, history, philosophy, biographies and novels. This book includes specific methods for active investors and traders that are consistent with the meaning of the original ancient strategies. The 36 Strategies of the Chinese for Financial Traders follow the structure of the original 36 Strategies of the Chinese. The first 18 strategies are applied when you have the advantage -- the luxury of time and resources to examine techniques to recognize and maximize the return from these market opportunities. The

File Type PDF A Traders To Financial Astrology Forecasting Market

second 18 strategies are applied when you are at a disadvantage -- they are strategies used against investors and traders to inhibit success. Many of the strategies are enhanced using derivatives.

Original and thought-provoking, Quantum Trading presents a compelling new way to look at technical analysis and will help you use the proven principles of modern physics to forecast financial markets. In it, author Fabio Oreste shows how both the theory of relativity and quantum physics is required to makes sense of price behavior and forecast intermediate and long-term tops and bottoms. He relates his work to that of legendary trader W.D. Gann and reveals how Gann's somewhat esoteric theories are consistent with his applications of Einstein's theory of relativity and quantum theory to price behavior. understand and forecast market prices. While no trading approach is perfect, the techniques found within these pages have enabled the author to achieve a very attractive annual return since 2002. See what his insights can do for you. Market analysts and financial media commentators have led individual investors to believe that daily news, quarterly earnings reports and corporate events drive stock prices. Nothing could be further from the truth. The reality is - the financial markets are a reflection of the mass psychological emotion of traders, investors and fund managers. When market participants are feeling positive, they are driven to buy. When they are feeling uncertain or negative, they are driven to sell. So what then drives human emotion? In the opinion of stock trader and author M.G. Bucholtz, the ever-changing configurations of orbiting planets and other celestial bodies in our cosmos influence our body chemistry and thereby drive human emotion. The Sun is the centre of our planetary system. The Sun emits massive amounts of solar radiation in all directions into the vastness of space. This radiation is called solar wind. This solar wind interacts with the magnetic fields around Mercury, Venus, Moon, Mars,

File Type PDF A Traders To Financial Astrology Forecasting Market

Jupiter, Saturn, Uranus, Neptune and Pluto. These planets accept and then disburse the solar wind radiation. As the radiation is disbursed, a goodly amount of it finds its way towards the magnetic field around planet Earth. Changes in the density and speed of solar wind mean that the amount of radiation reaching Earth's magnetic field on a daily, weekly or monthly basis will be ever-changing. As a result, the intensity or flux of the Earth's magnetic field is also constantly changing. The alignment of the orbiting planets in our cosmos plays a significant role in determining how much solar radiation is deflected towards Earth's magnetic field. We all have an electrical field that runs through our tissues. Hence, basic physics demands that changes to the Earth's magnetic field will then induce subtle changes to our bodily electrical circuitry. These subtle changes are what drive our emotional responses. Human emotion changing in response to events in the cosmos is not a new concept. In the early 1900's, the venerable W.D. Gann recognized the connection between changing emotions and price fluctuations on the stock and commodity markets. His trading success realized from applying astro phenomena to the markets is

legendary. The astro models pioneered by other figures from this era including Louise McWhirter and Donald Bradley are as powerful today as they were back then. This Almanac begins by offering the reader an overview of the science of Astrology. The detailed examination that then follows will show the reader how: aspect angles between the various planets and the New Moon can set the tone for the equity markets each month. the Moon transiting past certain key points in the zodiac each month aligns to short term trend changes on the New York Stock Exchange. times when Mercury, Venus and Mars are Retrograde align to trend changes on equity and commodity markets. times Mercury, Venus, Mars and Jupiter registering maximum and minimum declination levels equate to trend changes on equity and commodity markets. times when transiting Sun, Mercury, Venus and Mars make hard aspects to planetary positions in the First Trade charts of individual commodity futures are profoundly significant for traders and investors. esoteric mathematical concepts such as Gann Lines and Harmonic Lines are extraordinarily powerful tools for traders and investors to use. readers will begin to enjoy an increased level of success with their trading and investing activity. It is further the author's hope that readers will then frequently pause to reflect on the deeper connection between the financial markets, the cosmos and the emotions of mankind.
