This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).

Passcards provide all the knowledge required for the Ethics for Accountants unit. Passcards are A6, spiral bound revision aids which students can carry to revise wherever, whenever. Features include: topics presented in the same order as the Course Book, ability to focus on tricky syllabus areas, aid revision by giving clear, visual emphasis to key points, suitable for both paper and computer based exams. Our materials and online equivalents will help ensure you are ready for your assessments and prepared for your career in accounting.

**\* Challenging and provocative book \* Shows how management accounting techniques can be integrated into the strategic decision making process \* Extensive use of practical examples from a variety of contexts. An introduction to business strategy for management accountants, financial accountants or managers with an accounting orientation. The book places management accounting clearly within the context of strategic management of the business. Offers qualified accountants a sound introduction to strategic management, and with practical examples and mini-cases provided throughout, this book is comprehensive yet concise. Keith Ward addresses strategic management accounting as a continuous process of analysis, planning and control. Management accounting is about supplying the right information to the right people at the right time, and this can only be expressed in the context of the business strategy and strategic plan. The implementation of appropriate management accounting systems to complement different strategies is discussed in detail. Applications and examples include multinational organizations, non-profit organizations and varying organizational structures. Finally the author covers methods of using management accounting for strategic advantage. This is the Student's Manual to accompany the leading international textbook Management and Cost Accounting by Colin Drury. Updated to correspond with the 6th edition of the textbook, it provides brief descriptions of the designated questions in the main text and then gives detailed solutions to them. Together, the main text and the Student's manual form an ideal learning package. The problems allow students to pursue topics in more depth and to concentrate on the application of principles in management and cost accounting. The key topics are covered in detail and provide a superb opportunity to practise answering exam questions, many of which are taken from past papers of professional accountancy bodies such as CIMA, ACCA, AAT, ICAEW and ICAI.
