

Accounting And Finance For Non Specialists Includes Myaccountinglab

Now in its sixth edition, this successful text introduces the basic principles and underlying concepts of accounting and finance. It adopts a practical, non-technical approach, making it the ideal text for students from non-accounting disciplines. The text is written from a 'user' perspective, demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making.

Business Accounting and Finance for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. It gives a lively and wide-ranging survey of the basic principles of finance, financial accounting and management accounting. The unique approach taken in the first Section of the book is to look at small to medium sized business organisations and their role in the economy ? how they are set up, factors in their success and failure and how they source funds for expansion. This leads to discussion of the role of financial markets and their need for financial information. Sections 2 and 3 then give an account of financial and management accounting principles, respectively. The text is clearly written and technical jargon is minimal - any technical terms are clearly explained and a glossary of terms is provided. The book does not present the hurdle of double-entry bookkeeping at an early stage ? students can progress through the book without double-entry. Illustrative case studies and reference to real-life business examples are used to bring the technical information to life. Business Accounting and Finance for Non-specialists includes a large number of worked examples, to give students valuable practice in using their new skills. Other pedagogic elements include aims and learning outcomes, summaries, Case Studies with questions and solutions, individual learning activities, self-test questions with answers provided in the book, and exercises - the answers to which are divided between the book and the Lecturer's Guide/Website. Business Accounting and Finance for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. The Essentials of Finance and Accounting for Nonfinancial Managers

Finance for Strategic Decision-Making

They say that numbers don't lie, but what if you can't even read them? Discover how great managers use financial data to guide decisions. Financial analysis reports, budgeting reports, forecasting and measuring reports—sometimes they all run together, don't they? The Essentials of Finance and Accounting for Nonfinancial Managers is here to help. This new edition of a business classic demystifies finance and accounting and gives managers the tools they need to make better decisions. Complete with fresh insights, case studies, and street-level exercises to help non-numbers people master the numbers game, this guide reveals how to: Understand the fundamentals of financial analysis, budgeting, and forecasting Interpret balance sheets, income/cash flow statements, and annual reports Sift through conflicting data to find the most relevant figures Locate key information about competitors and suppliers Analyze variances and calculate break-even points and other vital measures The numbers are too important to allow others to translate for you. The Essentials of Finance and Accounting for Nonfinancial Managers shows you how to read them yourself. Imagine the impact on future decisions when you grasp not only what the numbers mean but can use that insight to drive your business forward.

Now in its 10th edition, Accounting for Non-Accountants provides the perfect introduction to the basics of accounting and finance. Designed for non-specialists with little or no background in accounting, it guides readers through the maze of financial terms and accounting concepts and techniques in a clear and easy-to-follow style. Updated for 2015, Accounting for Non-Accountants includes information on the new UK GAAP accounting standards as well as an overview of current international standards, and is structured to provide in-depth understanding in three key areas: annual accounts (including income statements, balance sheets, cash flow and reporting standards); management accounting (costing, marginal costing and budgetary controls); and financial management (including the cost of capital, working capital, investment appraisal and performance analysis).

This edition of 'Accounting and Finance for Non-Specialists' provides comprehensive coverage of the basic concepts and practical applications of financial accounting, management accounting and financial management.

The 11th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. With a step-by-step approach and a focus on decision making, Accounting and Finance for Non-Specialists teaches you how to apply your learning to real-world business scenarios.

An Integrated Resource Management Guide for the 21st Century

An Introduction

Accounting and Finance for Non-Specialists PDF ebook

The McGraw-Hill 36-Hour Course: Finance for Non-Financial Managers 3/E

Accounting and Finance for the NonFinancial Executive

Finance and Accounting for Nonfinancial Managers, Third Edition, introduces the reader to financial terminology, relates financial measures to operating information, enables the student to understand and apply financial measures to operating performance, and ties all of this to the current business environment. Today's managers, whether supervisors or senior executives, are expected to understand and use financial and operational measures, prepare and utilize budgets, respond to inquiries about the financial consequences of actions taken by them or by their department or team, and understand and use financial and accounting terminology—the common language of business measurement. Written in a conversational, easy-to-understand tone, the course treats finance and accounting from the perspective of users of financial information—it enhances their ability to communicate effectively with subordinates, other managers, senior executives, and accounting and finance professionals. It offers managers the ability to use and analyze financial information to improve the performance of their operations and to identify—and avoid—potential problems. The third edition includes discussion of the continuing transition of financial reporting to an international standard as well as consideration of the effects on accounting and finance resulting from the Recession of 2007-2009. New sections on how to read an annual report and navigating the shifts in the marketplace are also included. This edition has been updated throughout to provide managers with the most current and complete information available. Selected Learning Objectives Participants will learn how to: Prepare budgets Read, understand, and use financial and operational measures Manage short-term assets Relate department performance to the big picture. This is an ebook version of the AMA Self-Study course. If you want to take the course for credit you need to either purchase a hard copy of the course through amaselfstudy.org or purchase an online version of the course through www.flexstudy.com.

Finance is key to every business organisation as well as outside. This book makes sense of the finance world from a non-finance perspective. It introduces, explains and demystifies essential ideas of business finance to those who do not have financial background or training. Lucid, accessible, yet comprehensive, the book delineates the financial workings of businesses and offers an overview of corporate finance in the global context. The volume: Contains effective tools for financial communication, monitoring, analysis and resource allocation; Provides important learning aids such as figures, tables, illustrations and case studies; Highlights fundamental concepts and applications of finance; Surveys global corporate practices, recent trends and current data. This updated second edition contains new sections on Tax Planning, including Income Tax and Goods and Services Tax in India. A guide to building financial acumen, this book will be a useful resource for executive and management development programmes (EDPs & MDPs) oriented towards business managers, including MBA programmes. It will benefit business executives, corporate heads, entrepreneurs, government officials, teachers, researchers, and students of management and business, as well as those who deal with finance or financial matters in their daily lives.

Financial Management for Non-Financial Managers is an accessible, practical and easy to understand guide that will allow any manager to gain confidence in understanding financial matters, managing a budget and dealing with bankers, accountants and finance professionals. A source of invaluable expert advice on all the essential aspects of financial management within the context of running a business, it covers: business structures, accounting and financial statements, analysis and ratios, planning, budgeting, product and service costing, setting selling prices, investment appraisal, finance and working capital, taxation and international transactions. This book explains financial literacy in the context of management, showing how improved awareness of finances can lead to increased value creation and protection for your business. Aimed at the practicing business manager, Financial Management for Non-Financial Managers includes case studies, spreadsheets and worked examples to accompany key skills and practices explained in the book.

"Filled with crystal-clear examples, the book helps you understand: balance sheets and income/cash flow statements; annual reports; fixed-cost and variable-cost issues; financial analysis, budgeting, and forecasting; and much more"--Back cover.

The 10th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. If you are new to accounting, or are studying a degree in accounting, this book will help you get to grips with the important principles of accounting and how to apply your learning to real-world business scenarios in a user-friendly manner.

Have you recently been promoted? Are you starting a new business? Do you suddenly find that you need to know more about finances than you ever expected, but have no time for formal training? If so, you need Accounting and Finance for the Non-Financial Executive. Whether you are a newly promoted middle manager or executive, a marketing manager of a small company, an entrepreneur, or own your own business, your results will be measured in dollars and cents. You need to know the basics of finance and accounting to make sound business decisions and become successful. Shim shows you the strategies for evaluating investment decisions such as return on investment analysis. You will see what you need to know, what to ask, which tools are important, what to look for, what to do, and how to do it. Easy to read and useful, the book presents many practical examples, illustrations, guidelines, measures, rules of thumb, graphs, diagrams, and tables that make comprehending the subject easy. Accounting and Finance for the Non-Financial Executive prepares you for additional managerial responsibilities. You will be better equipped to prepare, appraise, evaluate, and approve plans to accomplish departmental objectives. You will be able to back up your recommendations with carefully prepared financial support. Whether they are based on marketing, production, or personnel, by learning how to think in terms of finance and accounting you can intelligently express your ideas.

This book will provide non-specialist managers and students with a firm understanding of business financial matters. Readers will study three areas of business finance: financial accounting, managing finance, and management accounting. The book does not teach bookkeeping and accounting, there is no need to have prior knowledge of double-entry bookkeeping. The book provides an understanding of financial statements, budgets, management accounts statements, and interpretation. This is so important if any competent manager, no matter what their field, is to be able to make effective decisions. By the end of the book, the reader will know how money affects business operations and how they can control finance effectively. The book has been split into chapters with a very simple to follow structure. Chapters will include practical examples and assignments to get some real-world experience, not just theory. The book is written a way that someone with no prior experience will understand. The book is suitable for those undertaking study in a specialist managerial field, such as marketing, sales, engineering, retail, human resources. The book will be a good reference for a professional who is already a manager of a department looking to grasp a better understanding of business finance. A business owner with the responsibility to oversee financial matters will also find this book very useful. Anthony Dixon has studied Business Management at the University of Derby. He has been a company director and financial controller of a small limited company in the haulage industry. He has written a number of books in the business and property investment field.

Try this Innovative exercises illustrate what you've learnt and how to use it.?"

Financial reports speak their own language, and managers without a strong finance background often find themselves bewildered by what is being said. Finance for NonFinancial Managers helps managers become familiar with essential financial information, showing them how to "speak the language of numbers" and implement financial data in their daily business decisions. In addition, it clarifies how and why financial decisions impact business and operational objectives.
