background in accounting, it guides readers through the maze of financial terms and accounting concepts and techniques in a clear and easy-to-follow style. Updated for 2015, Accounting for Non-Accountants includes information on the new UK GAAP accounting standards as well as an overview of current international standards, and is structured to provide in-depth understanding in three key areas: annual accounts (including income statements, balance sheets, cash flow and reporting standards); management accounting (costing, marginal costing and budgetary controls); and financial management (including the cost of capital, working capital, investment appraisal and performance analysis).

Designed primarily for middle and junior management who deal with financial information without really understanding the content; students who are studying accounting as a non-specialist subject, for example on a business studies or engineering course. The book serves as a basic reference to be used throughout the course. It will also be particularly helpful in providing the basic grounding that is required before moving on to the more technical and in-depth study of the subject that

may be required on some courses. Students who are embarking on a course of study to become a professional accountant will also find this book of major benefit. In addition to revisions through out, a new new chapter 'Making long-term investment decisions' covering capital investment decisions, extends and rounds out the final part of the book: using Financial Information to Manage a Business. The chapter deals with the investment appraisal process and covers the main investment appraisal techniques from the point of view of a non-specialist: payback periods, accounting rate of return and discounted cash flow methods are just some of the new topics covered. The focus will be on the level of understanding that a non-specialist requires in the work place as such, in keeping with the rest of the book, the chapter includes practical examples and exercises to enhance the reader's understanding. \* Jargon free and easy to understand - no prior knowledge of the subject necessary \* Focuses on the principles and use of accounting information \* Review questions to assess progress at each stage and many fully worked exercises and examples

The focus of Deutsch and Chikarovski's Accounting for Non-Accountants A Question and Answer Handbook, is to promote an understanding of the fundamentals of accounting and financial statements. It is not a short cut to an in-depth knowledge of accounting. However the book will provide some useful insights to the language of accounting, the key principles involved and the sources and use of accounting information commonly encountered. The book should therefore be useful for lawyers and other users of accounting information to guide their understanding of that information. You might for example be: a barrister involved in a commercial matter requiring the review of the financial statements of a listed company a family law solicitor looking at the accounts of family entities as part of a property settlement an immigration lawyer presenting accounts as part of a visa application a small business operator reviewing the accounts of your business a so called mum and dad investor reviewing the accounts of the listed company that you have acquired shares in recently or a

*All businesses owners, administrators and key personnel need to know the numbers (Accounting) in a basic way, to be able to get the business on the right track and get maximum benefits from it. This book explains what Accounting is in a simple way, without CPA's technical words, with clear explanations and practical examples so that everyone who wants to learn Accounting, can do it. In this book you will find the basic information necessary to start understanding the finances of your business, you will understand the numbers and how you can use Accounting in small and medium businesses to analyze the information in a way that helps to get more profits. This book explains step-by-step, with simple examples, how Reports (Financial Statements) and business analysis are made and how they can help us in decision making. You shouldn't leave all the administrative responsibility to the Accountant, nobody is more interested in the business than the owner. And for him, the Reports (Financial Statements) are the most important tools, since if he can't read and understand the implications of the Reports, he will not be able to run his business successfully. This book also talks about the benefits of being a business owner and how to seek financial freedom. About the Autor: Facebook page CPRQ Business Consulting.
